A 17-year-old student has experienced reversible, periodic attacks of chest tightness with coughing, wheezing, and hyperpnea. She states that expiration is more difficult than inspiration. She is most comfortable sitting forward with arms leaning on some support. X-rays revealed mild overinflation of the chest. Results from

laboratory and pulmonary function tests are as follows: Frequency ...  
*Respiratory News, Research*  
Through experimental analysis of the physiological aspects of the human respiratory system, one can truly gain a better understanding of its inner-workings. A deeper look into the anatomy and the physiological mechanisms of the human lungs requires using the knowledge gained from research, lab and coursework of the respiratory system.

### **Respiratory System. - A Research Paper**

The Respiratory System. 591 Words | 3 Pages. The respiratory system is the process responsible for the transportation and

---

exchange of gases into and out of the human body. As we breath in, oxygen in the air containing oxygen is drawn into the lungs through a series of air pipes known as the airway and into the lungs.

Human Respiratory System Research Paper - 2880 Words

This page of the essay has 632 words. Download the full version above. The human body is organized into numerous complex systems that interact with each other in order for it to function and sustain life. One of those vital systems is the respiratory system. The main function of the respiratory system is to consume oxygen and expel carbon dioxide, otherwise known as breathing, or

ventilation.

Respiratory System Essay Examples - Free Research Papers ...

The respiratory system is the bodies system that introduces gases into the body and releases waste gases through breathing. The main function is to transport air into the lungs, facilitate the diffusion of oxygen into the blood stream, and exhale carbon dioxide from the blood through exhaling. The respiratory system consists of all the organs [...]

**Respiratory System - Research**

**Paper**

Excerpt from Research Paper : Human Respiratory System The drive to breathe is involuntary and generally automatic, although one can change breathing patterns, and they change when we sleep or are doing different activities. The lungs and respiratory system function to move air 24/7/365 because the body cannot 'store' oxygen that it needs for cellular respiration and energy production.
