engaging, student-centered every student has the

opportunity to succeed, Mirko Chardin and Katie Novak are absolutely convinced that teachers should serve as our primary architects. And by "teachers" they mean legions of teachers working in close collaboration. After all, it's teachers who design students' learning experiences, who build student relationships . . . who ultimately have the power to change the trajectory of our students' lives. Equity by Design is intended to serve as a blueprint for teachers to alter the all-too-predictable outcomes for our historically under-served students. A first of its kind resource, the book makes the critical link between social justice and Universal Design for Learning (UDL) so that we can equip students (and teachers, too) with the will, skill, and collective capacity to enact positive change. Inside you'll find: Concrete strategies for designing and delivering a culturally responsive, sustainable, and equitable framework for all students Rich examples, case studies, and implementation spotlights of educators, students

(including Parkland survivors), and programs that have embraced a social justice imperative Evidence-based application of best practices for UDL to create more inclusive and equitable classrooms A flexible format to facilitate use with individual teachers, teacher teams, and as the basis for whole-school implementation "Every student," Mirko and Katie insist, "deserves the opportunity to be successful regardless of their zip code, the color of their skin, the language they speak, their

sexual and/or gender identity, and whether or not they have a disability." Consider Equity by Design a critical first step forward in providing that all-important opportunity. "Our calling is to drop our egos, commit to removing barriers, and treat our learners with the unequivocal respect and dignity they deserve." ~Mirko Chardin and Katie Novak
21 Ways the Principle of Leaving Will Benefit Your Marriage National Council of Teachers of Mathematics, Incorporated

What?!! You want me to leave I thought this was a book about marriage, not divorce! Don't get too excited because you are exactly right. I am not talking about your leaving each other, but I am talking about something that, if it is neglected, can quickly destroy your marriage. For any marriage to be successful, there must be some leaving going on. If you do not implement this principle, you will experience great frustration in your marriage. If you do not implement this principle, you may see your children grow up to be involved in some quite unhappy marriages.

If you and your husband or wife do not implement this principle, you may find yourself despising your in-laws. If you do not implement this principle, you may spend your life putting yourself down. Furthermore, if you do not implement this principle, you may find resentment of your spouse growing so deeply within you that you may never experience the wonderful closeness that God intends for a husband and wife to experience. The shocking truth is ... If you want your marriage to be successful, you will have to ... LEAVE!

Structured around the Equality Act and written collaboratively, *Diverse Educators: A Manifesto* aims to capture the collective voice of

the teaching community and to showcase the diverse lived experiences of educators. The book is divided into ten chapters, one for each of the nine Protected Characteristics (Age; Disability; Gender Reassignment; Pregnancy and Maternity; Marriage and Civil Partnership; Race; Religion and Belief; Sex; Sexual Orientation) with a tenth chapter exploring intersectionality. Framed in theory and interweaving personal and professional narrative from over 100 contributors, this ground-breaking text responds to current and historic debates, while remaining accessible and

solutions-focused, with high-quality input on practice, pedagogy, people management and policy. Each chapter shares provocations for the reader and for the school system on the changes we would collectively like to manifest in education.

Springboard Mathematics Princeton Review

Gregory Bateson's contribution to 20th century thinking has appealed to scholars from a wide range of fields dealing in one way or another with aspects of communication and epistemology. A number of his insights were taken up and developed further in anthropology, psychology, evolutionary biology and

communication theory. But the large, trans-disciplinary synthesis that, in his own mind, was his major contribution to science received little attention from the mainstream scientific communities. This book represents a major attempt to revise this deficiency. Scholars from ecology, biochemistry, evolutionary biology, cognitive science, anthropology and philosophy discuss how Bateson's thinking might lead to a fruitful reframing of central problems in modern science. Most important perhaps, Bateson's bioanthropology is shown to play a key role in developing the set of ideas explored in the new field of biosemiotics. The idea that organismic life is indeed basically

semiotic or communicative lies at the heart of the biosemiotic approach to the study of life. The only book of its kind, this volume provides a key resource for the quickly-growing substratum of scholars in the biosciences, philosophy and medicine who are seeking an elegant new approach to exploring highly complex systems.
