This practical guide briefly covers the historical and epidemiological background of palliative care and the growth of palliative medicine as a specialty, before dealing with major physical, psychological, spiritual, and symptom management issues from diagnosis to bereavement care.

Restorative Resilience Through Supervision
Springer Publishing Company

This accessible, interactive resource book encourages front-line staff working with dementia sufferers in nursing and residential settings to examine their working practice and modify it to where appropriate to meet best practice guidelines. Packed with photocopiable training exercises, discussion points and questions to prompt care workers to reflect on their style of work, this practical training manual also provides a framework for care work in line with statutory requirements and national training standards. It can be used as a self-training guide by carers, who can work through it at their own pace or under the

supervision of a colleague, or by trainers running structured courses on good practice in dementia care. It is also suitable for use as a quick reference in daily practice. This comprehensive resource will provide useful guidance for all staff working face-to-face with people with dementia, whether in nursing, day-care or residential settings.

The purpose of restorative care nursing is to take an active role in helping older adults maintain their highest level of function, thus preventing excess disability. This book was written to help formal and informal caregivers and administrators at all levels to understand the basic philosophy of restorative care, and be able to develop and implement successful restorative care programs. The book provides a complete 6-week education program in restorative care for caregivers, many suggestions for suitable activities, and practical strategies for motivating both older adults and caregivers to engage in restorative care. In addition, the book provides an overview of the requirements for restorative care across all settings, the necessary documentation, and ways in which to complete that documentation.

Procedure icons next to content headings alert you to related procedures. Review questions at the end of each chapter help you evaluate learning.

The Long-Term Care Nursing Assistant's Guide to Advanced Restorative Skills DIANE Publishing

" Designated a Doody's Core Title! Caring for the older adult population is a challenge and the goal of nursing practice is to help preserve or restore an older adult's function and maximize their well-being and quality of life. This book is a wonderful resource for assisted living clinicians and nurses who wish to serve this population. It is well written, easy to read, and well organized so it can be used as a textbook for nursing students in geriatric nursing. Score: 94, 4 stars --Doody's This book, written by and for nurses across the spectrum of nurse providers (advanced practice nurses, delegating nurses, and the direct care workforce), covers all aspects of management as well as the many common clinical problems and syndromes we encounter among older adults. Further, this book proposes wonderful assessment and intervention material that will help the entire health care team keep residents within their AL

communities through early recognition and management of acute illnesses. Kudos to our nursing colleagues for editing this publication and may it serve as the useful guide for AL residents across the country.

--John B. Murphy, MD President, American Geriatrics Society Professor of Medicine and Family Medicine Warren Alpert Medical School of Brown University This book provides a comprehensive overview of both management activities and clinical competencies for assisted living nurses. The authors provide practical guidelines and decision-making models to help nurses address both the large- and small-scale challenges of their daily practice. With Assisted Living Nursing, readers can gain the essential problem-solving and task management skills critical to their daily work. The contributors cover a wide range of topics, including: Management Ethics in nursing practice Regulatory oversight and reimbursement Organizational culture Leadership theories and styles Conflict resolution Finance and budget management Risk assessment Clinical Practice Admission-transfer-discharge assessment Infection Control Cultural aspects of care Geriatric clinical syndromes and disorders Palliative and hospice care principles Rehabilitation/restorative nursing Theories of aging Ultimately, this book serves as the definitive, one-stop resource, addressing virtually every topic of interest to assisted living nurses. "

A Guide for All Care Settings Hcpro Incorporated Increased attention has been given in recent years to the effects of perinatal substance abuse on infants and children. The demand for programs targeting these populations has spiraled. Based on the experiences of 147 prevention and treatment projects, this guide was prepared as a resource for practitioners and program administrators seeking to establish and strengthen similar programs by providing practical knowledge on common implementation issues. Combining theory with practice, the guide provides common-sense advice, practical suggestions, and experience-based strategies in a user-friendly format.

Restorative Nursing Springer Publishing Company Peacemaking Circles, often referred to as the "bible" of Circles, lays out the inner and outer dynamics of the peacemaking Circle process. Circles are now being used in schools, families, workplaces, organizations, as well as in the justice system. The use of Circles shifts the focus from blame and punishment to finding out what happened and exploring as a group or community how to put things right.

Mosby's Textbook for Long-Term Care Nursing Assistants - E-Book Elsevier Health Sciences Expand your activity programming with all new Montessori-based activities for people with dementia. A follow-up to the popular first book, Volume 2 promotes increased opportunities for socialization and interaction. The book

includes intergenerational programming, group activities, ideas especially for men, and sensory stimulation exercises. Also, range-of-motion and self-care activities for enhancing restorative nursing and rehabilitation are described. Step-by-step instructions and tips for extension and adaptation are provided for all 38 activities.

Myers Research Inst

This textbook and the accompanying workbook is designed to instruct the student in basic uncomplicated nursing procedures to be performed under the supervision of a licensed nurse. The Certified Nurse Assistant will develop skills, attitudes and concepts which are essential to developing the Certified Nurse Assistant. These skills are taught with a holistic approach to include the impact on physical, psychological, social, ethnic, cultural, and environmental influences on the residents continued overall well-being. Becoming a Certified Nurse Assistant requires a basic knowledge of human anatomy, physiology, body systems and the impact of aging on those systems. It also requires specific skills which promote observation, interventions, individualization, resident choice, safety, and in general the overall well-being of the residents the CNA cares for. The course will utilize current federal and state regulations, principles of adult learning, ideas and resources for supplemental lessons and best practice approaches to Certified Nurse Assistant training with a focus on person-centered techniques.
