This work helps in rethinking behaviour management in the whole school through the use of restorative justice methods. School conferences have proved remarkably successful in teaching students about their responsibilities and accountability to other people. This manual fulfils an important role by outlining the techniques to learn and apply when planning and facilitating conferences. It includes guidance on: analysing current school practice; deciding whether to hold a conference; preparing a conference; convening and facilitating a conference; and, follow-up after a conference. The book contains many key documents such as preparation checklist, conference script, typical agreement, evaluation sheet and case studies. It is suitable for ages 8-16.

Restorative care nursing, currently referred to as function focused care, is a philosophy and method of care that enables caregivers to actively help older adults achieve and maintain their highest level of function. This is the only volume written to educate caregivers and administrators about the philosophy of restorative care and how to integrate this philosophy in all types of care settings. This updated second edition contains new content in each chapter along with several entirely new chapters on function-focused care for cognitively impaired adults, ethical issues, and patient-centered

" Designated a Doody's Core Title! Caring for the older adult population is a challenge and the goal of nursing practice is to help preserve or restore

an older adult's function and maximize their well-being and quality of life. This book is a wonderful resource for assisted living clinicians and nurses who wish to serve this population. It is well written, easy to read, and well organized so it can be used as a textbook for nursing students in geriatric nursing. Score: 94, 4 stars --Doody's This book, written by and for nurses across the spectrum of nurse providers (advanced practice nurses, delegating nurses, and the direct care workforce), covers all aspects of management as well as the many common clinical problems and syndromes we encounter among older adults.

Further, this book proposes wonderful assessment and intervention material that will help the entire health care team keep residents within their AL communities through early recognition and management of acute illnesses. Kudos to our nursing colleagues for editing this publication and may it serve as the useful guide for AL residents across the country. --John B. Murphy, MD President, American Geriatrics Society Professor of Medicine and Family Medicine Warren Alpert Medical School of Brown University This book provides a comprehensive overview of both management activities and clinical competencies for assisted living nurses. The authors provide practical guidelines and decision-making models to help nurses address both the large- and small-scale challenges of their daily practice. With Assisted Living Nursing, readers can gain the essential problem-solving and task management skills critical to their daily work. The contributors cover a wide range of topics, including: Management Ethics in nursing practice Regulatory oversight and reimbursement Organizational culture Leadership theories and styles Conflict resolution Finance and budget management Risk assessment Clinical Practice

Admission-transfer-discharge assessment Infection Control Cultural aspects of care Geriatric clinical syndromes and disorders Palliative and hospice care principles Rehabilitation/restorative nursing Theories of aging Ultimately, this book serves as the definitive, one-stop resource, addressing virtually every topic of interest to assisted living nurses.
