“One of the most profound and illuminating studies of this century to have been published in recent decades.”—John Gray, New York Times Book Review Hailed as “a magisterial critique of top-down social planning” by the New York Times, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail—sometimes catastrophically—in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. “Beautifully written, this book calls into sharp relief the nature of the world we now inhabit.”—New Yorker “A tour de force.”— Charles Tilly, Columbia University

Laws Relating to the Navy, Annotated ... Houghton Mifflin Harcourt

Black Officer, White Navy is likely the first memoir of a Black naval officer who rose from high school dropout to unrestricted line officer in the post-Vietnam War era. The author's unique career path and insightful analysis of both his personal experiences and those of others in the military give a clear picture of what was happening both within and outside the Navy, and how the forces of discrimination and institutional denial and damage control efforts can make a career in the military fraught with obstacles, as well as opportunities, for a well-qualified minority of any gender, race, or ethnic origin. Recent events and

the impact of the commander in chief's statements and actions, which have a direct impact on the thinking and behavior of persons in uniform, make this a timely addition to any military member's library. It is full of potential case study material for any military instructional or group facilitation activity, as well as providing an historical overview of what it was like to be a minority sailor or officer between 1975 and the mid-1990's. Any sailor in uniform, regardless of pay grade or commissioned status, can both benefit and learn lessons from this work. Families can use this work to prepare their own loved ones or to help them try to understand the often lingering consequences of their loved one's military service.

TO HELL AND BACK For the U.S., Guadalcanal was a bloody seven-month struggle under brutal conditions against crack Japanese troops deeply entrenched and determined to fight to the death. For Charles Walker, this horrific jungle battle – one that claimed the lives of 1,600 Americans and more than 23,000 Japanese – was just the beginning. On the eve of battle, 2nd Lt. Walker was ordered back to the States for medical reasons. But there was a war to be won, and he had no intention of missing it. In this devastatingly powerful memoir, Walker captures the conflict in all its horror, chaos, and heroism: the hunger, the heat, the deafening explosions and stench of death, the constant fear broken by moments of sheer terror. This is the gripping tale of the brave young American men who fought with tremendous courage in appalling conditions, willing to sacrifice everything for their country. Look for these books about Americans who fought World War II: **VISIONS FROM A FOXHOLE** A Rifleman in Patton 's Ghost Corps by William A. Foley Jr. **BEHIND HITLER ' S LINES** The True Story of the Only Soldier to Fight for Both America and the Soviet Union in World War II by Thomas H. Taylor **NO BENDED KNEE** The Battle for Guadalcanal by Gen. Merrill B. Twining, USMC (Ret.) **ALL THE WAY TO BERLIN** A Paratrooper at War in Europe by James Megellas

Questions and Answers for Deck Officers Simon and Schuster In 1950, when he commissioned the first edition of **The Armed Forces Officer**, Secretary of Defense George C. Marshall told its author, S.L.A. Marshall, that "American military officers, of whatever service, should share common ground ethically and morally." In this new edition, the authors methodically explore that common ground, reflecting on the basics of the Profession of

Arms, and the officer's special place and distinctive obligations within that profession and especially to the Constitution.
