Orthopaedic surgery is the branch of surgery concerned with the prevention, diagnosis and treatment of diseases and injuries of the musculoskeletal system.

Orthopaedic surgeons use surgical and nonsurgical treatment for musculoskeletal trauma, diseases of the spine, degenerative conditions, sports injuries, fractures, and infections, among many other musculoskeletal conditions.

[Review of surgery : basic science and clinical topics for ...](#)

Review of Surgery will help prepare residents for the American Board of Surgery In-Training Examination, a major milestone in beginning a career in surgery.

Apart from challenging the individual resident taking the exam, ABSITE also challenges each surgery program to provide the best possible grounding in the basic science of surgery.
