Note to Readers: Publisher does not guarantee quality or access to any included digital components if book is purchased through a third-party seller. Applied Problem-Solving in Healthcare Management is a practical textbook devoted to developing and strengthening problem-solving and decision-making leadership competencies of healthcare administration students and healthcare management professionals. Built upon the University of

Minnesota Master of Healthcare Administration Program 's Problem-Solving Method, the text describes the “ never assume ” mindset and the structured method that drive evidence-based, action-oriented problem-solving. The “ never assume ” mindset requires healthcare leaders to understand themselves and their stakeholders, and to engage in waves of divergent and convergent thinking. This structured method guides the problem solver through the phases of defining, studying, and acting on complex interrelated organizational problems that involve multiple root causes. The book also describes how the Problem-Solving Method is complementary to quality improvement methods and can be used in healthcare organizations along with Lean, Design Thinking, and Human Centered Design. Providing step-by-step instruction including useful tips, tools, activities, and case studies, this effective resource demonstrates the utility of the method for all types of health organization settings including health systems, hospitals, clinics, population health, and long-term care. For students taking health management, capstone, and experiential learning courses, including internship and residency projects, this book allows them to test and apply their problem-solving and decision-making skills to real-world situations. Beyond the classroom, it is an indispensable resource for organizations seeking to enhance the problem-solving skills of their workforce. The

authors of the text have nearly 75 years of combined experience in healthcare management, leadership, and professional consulting, and teaching and advising healthcare administration students in classrooms, on student capstone, internship and residency projects, and case competitions.

Synthesizing their expertise, this text serves as a guide for those who wish to strengthen their problem-solving abilities to systematically identify, analyze, study, and solve pressing organizational challenges in healthcare settings. Key Features:

Describes a mindset and a structured problem-solving method that builds leadership competencies
Encourages a step-by-step problem-solving approach to define, study, and act on problems to drive action-

oriented solutions Supports experiential learning and coaching for students and professionals early in their careers, applicable especially to healthcare management, capstone, and student consulting courses, internship and residency projects, case competitions, and professional development in organizations Compares the Problem-Solving Method to other complementary methods used in many healthcare organizations, including Lean, Design Thinking, and Human Centered Design

This book addresses a specific subset of nonprofits that are chartered with a single mission: decrease the burden of government. Designing and engaging nonprofits to lessen the burden of government requires a specific description and acknowledgement of the burden to be lessened, and these may include the provision of

infrastructure, the relief of debt, or the provision of general public services that are not motivated by charity. It also requires the assignment of specific operating powers to the nonprofit including the power of eminent domain. This book explores these and other related topics including the avoidance of resource dependence on government when attempting to reduce its burden. The book is addressed to the policy makers and rule makers who design policies that affect the ability of the nonprofit to effectively lessen the burden of government. It is also addressed to public administrators in

search of innovative ways of implementing these policies consistent with the laws, and to the creative nonprofit managers who are charged with carrying out the mission often in collaboration with the government or other entities. To the advanced student in all related fields, the author offers not only material for discussion, but enables discovery of what is possible by giving key examples of organizations meeting the terms and objective of lessening a significant burden of government.
