Anthropologies of Revolution

Crossway

Thomas Kuhn's *The Structure of Scientific*

Revolutions can be seen, without exaggeration, as a landmark text in intellectual history. In his analysis of shifts in scientific thinking, Kuhn questioned the prevailing view that science was an unbroken progression towards the truth. Progress was actually made, he argued, via "paradigm shifts", meaning that evidence that existing scientific models are flawed slowly accumulates – in the face, at first, of opposition and doubt – until it finally results in a crisis that forces the development of a new model. This development, in turn, produces a period of rapid

change – "extraordinary science," Kuhn terms it – before an eventual return to "normal science" begins the process whereby the whole cycle eventually repeats itself. This portrayal of science as the product of successive revolutions was the product of rigorous but imaginative critical thinking. It was at odds with science's self-image as a set of disciplines that constantly evolve and progress via the process of building on existing knowledge. Kuhn's highly creative re-imagining of that image has proved enduringly influential – and is the direct

product of the author's ability to produce a novel explanation for existing evidence and to redefine issues so as to see them in new ways.

The End of the Revolution

Thomas Nelson Incorporated
2000 Gold Medallion Award winner!

Christianity is more than a personal relationship with Jesus Christ. It is also a worldview that not only answers life's

basic questions—Where did we come from, and who are we? What has gone wrong with the world? What can we do to fix it?—but also shows us how we should live as a result of those answers. How Now Shall We Live? gives Christians the understanding, the confidence, and the tools to confront the world's bankrupt

worldviews and to restore and redeem every aspect of contemporary culture: family, education, ethics, work, law, politics, science, art, music. This book will change every Christian who reads it. It will change the church in the new millennium.

Nigeria has become the arena of one of the most remarkable religious movements of recent times, reflecting the shift in the global center of Christianity from

the North to the South. This book tells the story of one sector of this movement from its root in the Nigerian civil war to the turn of the new millenium. It describes a revival that occurred among the Igbo people of Eastern Nigeria and the new Pentecostal churches it generated and documents the changes that have occurred as the movement has responded to global flows and local demands. As such, it explores the nature of revivalist and Pentecostal experience but does so against the backdrop of local socio-political and economic developments, such as decolonization and civil war, as well broader processes, such as modernization and globalization. *Why You Think the Way You Do*

Is there a growing gap in today's world between cultural aspirations and their fulfillment, a gap that is increasing social problems of all kinds? If so, what forces are producing that gap? How can these forces be changed? To answer these questions, Phillips and Johnston employ a very broad approach to the scientific method, drawing evidence from a wide variety of data and sources, including sociologists, psychologists, political scientists, historians, philosophers, educators, psychiatrists, and novelists. They find substantial evidence for a widening gap, suggesting an invisible crisis throughout

contemporary society. They also find substantial evidence that a simplistic and static metaphysical stance or worldview is largely responsible for that gap, and that an alternative worldview can work to close that gap.

The Dignity Revolution

Routledge

The introduction of 'Black' studies programs into institutions of higher education was a direct response to the mandate for change at all levels that characterized the civil rights movement and the social rebellions of the 1950s and 1960s. In *Out of the Revolution*, Delores P. Aldridge and Carlene Young

collect thirty-one of the nation's top scholars to provide a complete reference for understanding the impetus for, the development of, and future considerations for the discipline of 'Africana' studies. Topics addressed include epistemological considerations; humanistic perspectives; the role of bureaucracy and the academic institution; the social, psychological, political, and economic dimensions; the position of black women in the field; and how the discipline has empowered the black student. This invaluable resource for educators and

students alike concludes with a look at graduates in Africana studies and their careers and a discussion of the future of the field.

Explaining the English Revolution Ignatius Press

This book offers a thorough reanalysis of Charles Darwin's

Origin of Species, which for many people represents the work that alone gave rise to evolutionism. Of course, scholars today know better than that. Yet, few resist the temptation of turning to the Origin in order to support it or reject it in light of their own work. Apparently, Darwin fills the mythical role of a founding figure that must either be invoked or repudiated. The book is an invitation to move beyond what is currently expected of Darwin's magnum opus. Once the rhetorical varnish of Darwin's discourses is removed, one discovers a work of remarkably indecisive conclusions. The book comprises two main theses: (1) The Origin of Species never remotely achieved the theoretical unity to which it is often credited. Rather, Darwin was overwhelmed by a host of phenomena that could not fit into his narrow conceptual framework. (2) In the Origin of Species, Darwin failed at completing the full conversion to evolutionism. Carrying many ill-designed intellectual tools of the 17th and 18th centuries, Darwin merely promoted a special brand of evolutionism, one that prevented him from taking the decisive steps toward an open and modern evolutionism. It makes an interesting read for biologists, historians and philosophers alike.

Revolution David C Cook
Challenging both the bureaucratic one-party regime and the Western neoliberal paradigm, China's leading critic shatters the myth of progress and reflects upon the inheritance of a revolutionary past. In this original and wide-ranging study, Wang Hui examines the roots of China's social and political problems, and traces the reforms and struggles that have led to the current state of mass depoliticization. Arguing that China's revolutionary history and its current liberalization are part of the same discourse of modernity, Wang Hui calls for alternatives to both its capitalist trajectory and its authoritarian

past. From the May Fourth Movement to Tiananmen Square, The End of the Revolution offers a broad discussion of Chinese intellectual history and society, in the hope of forging a new path for China's future.

Revolutionaries shattered empires, toppled social

hierarchies, and birthed a world of republics. But old injustices lingered on and the powerful engines of revolutionary change created new and insidious forms of inequality. In *The Age of Revolutions*, historian Nathan Perl-Rosenthal offers the first narrative history of this entire era. Through a kaleidoscope of lives both familiar and unknown—from John Adams, Toussaint Louverture, and Napoleon to an ambitious French naturalist and a seditious Peruvian nun—he retells the

revolutionary epic as a generational story. The first revolutionary generation, fired by radical ideas, struggled to slip the hierarchical bonds of the old order. Their failures molded a second generation, more adept at mass organizing but with an illiberal tint. The sweeping political transformations they accomplished after 1800 etched social and racial inequalities into the foundations of modern democracy. A breathtaking history spanning three

continents, *The Age of Revolutions* uncovers how the period's grand political transformations emerged across oceans and, slowly and unevenly, over generations.

From Philosophy to Technology, Tracing the Origin of Identity Politics
How did the world arrive at its current, disorienting state of identity politics, and how should the church respond?
Historian Carl R. Trueman shows how influences

ranging from traditional institutions to technology and pornography moved modern culture toward an era of "expressive individualism." Investigating philosophies from the Romantics, Nietzsche, Marx, Wilde, Freud, and the New Left, he outlines the history of Western thought to the distinctly sexual direction of present-day identity politics and explains the modern implications of these ideas on religion, free speech, and personal identity. Verso Books A "marvelous" (Economist) account of how the Christian Revolution forged the Western imagination. Crucifixion, the Romans believed, was the worst fate imaginable, a punishment reserved for slaves. How astonishing it was, then, that people should have come to believe that one particular victim of crucifixion-an obscure provincial by the name of Jesus-was to be worshipped as a god. Dominion explores the implications of this shocking

conviction as they have reverberated throughout history. Today, the West remains utterly saturated by Christian assumptions. As Tom Holland demonstrates, our morals and ethics are not universal but are instead the fruits of a very distinctive civilization. Concepts such as secularism, liberalism, science, and homosexuality are deeply rooted in a Christian seedbed. From Babylon to the Beatles, Saint Michael to #MeToo, Dominion tells the story of how Christianity transformed

the modern world.

Equipping the church to recover from sexual confusion In *After the Revolution*, David J. Ayers provides the Christian heirs of the sexual revolution a resource to understand their challenges and social context to find a way forward.

Drawing on social sciences and history, Ayers traces recent worldview shifts in North America and Europe. The historic Christian understanding of sex and marriage has been supplanted.

And sexual confusion has infiltrated the church, especially influencing younger Christians. The church can uniquely and compassionately support sexual faithfulness and flourishing, but we need to reject formulas, surefire methods, and judgmentalism. Instead, we must recover a positive vision for Christian sexuality, singleness, and marriage that is firmly grounded in God's word.

The Structure of Scientific Revolutions Zondervan

A remarkable change is taking place that will profoundly influence the

way we see ourselves and our change, diminishing world. The dominant materialistic, separatist worldview—a perspective that leads individuals to value their own needs over the good of the whole—is giving way to a humanitarian-spiritual orientation. This shift will revolutionize both the way humanity interacts on a global scale and how we live on a day-to-day basis. Global Shift, co-published with the Institute of Noetic Sciences (IONS), explores the roots of such current planetary crises as climate resources, poverty, and disease, and explains how a new convergence of scientific research and spiritual insight is propelling us toward a more enlightened future. It also presents a call to actions we can implement now, such as voluntary simplicity, nonviolent communication, caring for our bodies, and inclusive global thinking, that can foster personal healing and bring our lives into alignment with the needs of the planet and a conscious universe.
