Hoover's Handbook of Private Companies covers 900 nonpublic U.S. enterprises including large industrial and service corporations.

Ward's Business Directory of U.S. Private and Public Companies Business Information Agency
Strategic Planning and Performance Measurement: Develop & Measure a Winning Strategy, provides a clear and concise roadmap for designing, implementing and measuring strategy. The focus is on strategic factors, which are defined in a unique way as the criteria on which an organization or business unit has to do well in order to succeed. For organizations to be successful, they must take a stakeholder perspective of their performance - stakeholders such as customers, suppliers, employees and owners. The book cites many case studies including: 7-Eleven, Roche, K-mart, McDonald's, Levi Strauss, Accor Hotels, Gallo Wines, Daimler Chrysler, Sears Roebuck, Mont Blanc, Tag Heuer, Lexus, Semco, Bright Horizons, Burns Philp, Scania Trucks and British Airways. This book provides a quantum leap forward in improving organizational performance. Management practitioners across the globe will find immediate and practical applications of its methods.

Million Dollar Directory Gale / Cengage Learning

The courageous acts of whistleblowing that inspired the world over the past few years have changed our perception of surveillance and control in today's information society. But what are the wider effects of whistleblowing as an act of dissent on politics, society, and the arts? How does it contribute to new courses of action, digital tools, and contents? This urgent intervention based on the work of Berlin's Disruption Network Lab examines this growing phenomenon, offering interdisciplinary pathways to empower the public by investigating whistleblowing as a developing political practice that has the ability to provoke change from within.

"American Wholesalers and Distributors Directory provides detailed listings for more than 30,000 large and small wholesalers and distributors throughout the U.S and Puerto Rico. Entries include the name and address of the organization; phone and fax numbers; company e-mail and URL addresses; SIC code; principal product lines; total number of employees; estimated annual sales volume; and a list of principal officers with titles and personal e-mail addresses when available.

Membership Directory BoD - Books on Demand
** #8 on The Wall Street Journal best-selling business book list for September 13, 2014** Given the abundance of commercially available energy-saving technologies, talented technologists to apply them, and even generous rebates to help finance them, why in the world aren't more efficiency projects approved? Based on twenty years of experience influencing efficiency decision-making in more than three billion square feet of properties, this author concludes that many more projects would be approved if energy professionals were actually trained to "sell" rather than simply "promote" efficiency. Energy efficiency products, services and programs all require effective selling. Professional sales skills make you more successful at advancing any energy efficiency initiative, regardless of your role in the process. Moreover, you need to think of yourself as a sales professional even if your job title does not include the word "sales." This book contains more than 80 short essays, each of which examines a unique aspect of efficiency-focused professional selling. Many originally appeared on Jewell Insights, the Efficiency Sales Professional Institute's daily email and smartphone blog that offers drip-irrigation reinforcement of concepts borrowed from the award-winning, weeklong Efficiency Sales Professional Certificate Boot Camp. As of this writing, more than one thousand energy professionals had benefited from this training. Hundreds of testimonials confirm the link between efficiency-focused professional selling and increased sales success: higher closing ratios, shorter sales cycles, deeper retrofits, and more. So what does efficiency-focused professional selling look like? 1) The confidence to reframe the benefits of efficiency so that they can be measured with the yardsticks that prospects are already using to measure their success 2) A 15-second elevator pitch that is precisely tuned to a particular prospect's values 3) A one-page narrative proposal delineating efficiency targets, the rationale for change, financial projections, status, and action steps for moving forward 4) A one-page financial summary that offers a clear and compelling treatment of both "popular" and "proper" metrics 5) An ability and willingness to sell utility-cost-financial, non-utility-cost financial, and non-financial benefits 6) An ability to recognize and replace myths with the math and motivation that get projects approved. Whether you are a manufacturer, specifying engineer, contractor, utility program manager or account executive, third-party program implementer, eco-entrepreneur or any other energy-related professional or job-seeker, you are sure to benefit from the insights provided in this book."

Commercial Directory Gale Cengage

This upper-level Open Access textbook aims to educate students and professionals on how to develop business models that have a positive impact on people, society, and the social and ecological environment. It explores a different view of how to organize value creation, from a focus on an almost exclusively monetary value creation to one that creates positive impact through multiple values. The book offers students and entrepreneurs a structured approach based through the Business Model Template (BMT). It consists of three stages and ten building blocks to facilitate the development of a business model. Users, be they students or practitioners, need to choose from one of the three offered business model archetypes,

namely the platform, community, or circular business models. Each archetype offers a dedicated logic for value creation. The book can be used to develop a business model from scratch (turning an idea into a working prototype) or to transform an existing business model into one of the three archetypes. Throughout the book extra sources, links to relevant online video clips, assignments and literature are offered to facilitate the development process. This book will be of interest to students studying the development of business models, sustainable management, innovation, and value creation. It will also be of interest executives, and professionals such as consultants or social entrepreneurs seeking further education.--
Headquarters USA 2008

This book gives an introduction to Structured Text (ST), used in Programmable Logic Control (PLC). The book can be used for all types of PLC brands including Siemens Structured Control Language (SCL) and Programmable Automation Controllers (PAC). Contents: - Background, advantage and challenge when ST programming - Syntax and fundamental ST programming - Widespread guide to reasonable naming of variables - CTU, TOF, TON, CASE, STRUCT, ENUM, ARRAY, STRING - Guide to split-up into program modules and functions - More than 90 PLC code examples in black/white - FIFO, RND, 3D ARRAY and digital filter - Examples: From LADDER to ST programming - Guide to solve programming exercises Many clarifying explanations to the PLC code and focus on the fact that the reader should learn how to write a stable, robust, readable, structured and clear code are also included in the book. Furthermore, the focus is that the reader will be able to write a PLC code, which does not require a specific PLC type and PLC code, which can be reused. The basis of the book is a material which is currently compiled with feedback from lecturers and students attending the AP Education in Automation Engineering at the local Dania Academy, "Erhvervsakademi Dania", Randers, Denmark. The material is thus currently updated so that it answers all the questions which the students typically ask through-out the period of studying. The author is Bachelor of Science in Electrical Engineering (B.Sc.E.E.) and has 25 years of experience within specification, development, programming and supplying complex control solutions and supervision systems. The author is Assistant Professor and teaching PLC control systems at higher educations. LinkedIn:
