Even before the heyday of Von Dutch and Big Daddy, the ultimate way to personalize your car or motorcycle was to lay some wicked lines on top of the paintwork. Done with a steady hand and an eye for style, pinstripes speak volumes. In *How to Pinstripe*, acclaimed veteran striper Alan Johnson teaches you everything you need to know to get started, to further your mastery of the form, or to simply understand how a good design comes together. Following a primer on the history and evolution of pinstriping, this book launches into a step-by-step guide to the pinstriping process--from choosing paint and brushes that suit your style and abilities, to preparing surfaces, experimenting with symmetrical and asymmetrical designs, striping freehand, and using grids and patterns. While stressing the importance of finding your own style and having fun with the hobby, Johnson also explains the basics of color theory and unique considerations for antique and classic cars, hot rods and customs, and motorcycles. For more advanced pinstripers, there's also tried-and-true advice on apprenticing and working car shows. Illustrated with color photography throughout, *How to Pinstripe* is the perfect source for beginners and veterans alike.

For over forty years in more than sixty countries, Raymond Baker has witnessed the free-market system operating illicitly and corruptly, with devastating consequences. In *Capitalism's Achilles Heel*, Baker takes readers on a fascinating journey through the global free-market system and reveals how dirty money, poverty, and inequality are inextricably intertwined. Readers will discover how small illicit transactions lead to massive illegalities and how staggering global income disparities are worsened by the illegalities that permeate international capitalism. Drawing on his experiences, Baker shows how Western banks and businesses use secret transactions and ignore laws while handling some \$1 trillion in illicit proceeds each year. He also illustrates how businesspeople, criminals, and kleptocrats perfect the same techniques to shift funds and how these tactics negatively affect individuals, institutions, and countries.

After WWII Americans were anxious to re-stoke the economy after a long "make-do with what you have" dry spell. By the 1950s new highways were being built, new trucking companies were being formed and old ones revived. Americans were buying newly-styled cars and the latest technologies once again. Semi-trucks helped pave the way for this huge growth spurt in America with dependable trucks built by Mack, GMC, Chevrolet, Ford, Dodge, International, White Freightliner, Peterbilt, Kenworth, Diamond T, Reo, Autocar, Brockway, Sterling and others, many using the increasingly popular diesel engines made by Buda, Hercules, Waukesha, and Cummins, which helped their heavy loads haul quicker. Ron Adams portrays this

booming era with over 300 superb photos of trucks hauling cement, fuel, and a variety of goods to enthusiastic Americans.
