MANAGEMENT SKILLS: ASSESSMENT AND DEVELOPMENT, 1E, offers a comprehensive, real world approach to mastering the skills needed for a career in management. Because instructors often express the difficulty of creating an active learning environment, this text offers an active, not passive, way for students to learn management skills by challenging students to be self-reflective and asking them to complete numerous assessments, exercises, cases, and other activities. The authors also address another major concern instructors have about students being visual learners by providing a unique Visualize the Skill section not found in any other text. To better enable students to

learn about management, chapters are organized in an easy-to-follow format that contains: Assessing Your Skills (pre-assessment scales); Learning About the Skills (concept portion of the text); Practicing Your Skills (exercises); Using Your Skills (case analysis); Extending Your Skills (group and individual exercises); Visualizing the Skills (video exercises); Your Skills Now (assessing skills after working through the chapter); and Interpretations (scoring keys and comparison data). Learning Lessons for leaders on resolving the ongoing struggle between instinct and the creative mind Kings, heads of government, and corporate executives lead thousands of people and manage endless resources, but may not have mastery over themselves. Often leaders know that right action is important, but have little (if any) understanding of what prevents them from acting in accordance with their intentions. In this important book, leadership expert Richard Daft portrays this dilemma as a struggle

between instinct (elephant) and intention (the executive) using the most current research on the intentional vs. the habitual mind to explain how this phenomenon occurs. Based on current research and real-life examples Offers leaders a method for directing themselves more productively Written by an expert in leadership, organizational performance, and change management Through real-life examples and recent studies in psychology, management and Eastern spirituality Daft provides guidance to all of us who struggle finding our

own balance and cultivating the behavior of others. Managing Training and Development Jonathan Ball Publishers

The Team Secret shows that the same principle applies in the business world - a small team has a much better chance of completing projects efficiently, on budget and on time. Teams, rather than individuals, form the DNA of many companies and they play a pivotal role in achieving strategic and financial success. Like Special Forces teams, they must function as a well-oiled machine firing on all cylinders. Koos Stadler tells in captivating detail about a real-life Special Forces

operation and the lessons learnt about team dynamics and achieving the goal. His story, combined with anecdotes from Anton Burger's experiences as a team leader in different work environments, show the many lessons the business world can take from the Special Forces. The book identifies the key characteristics of an effective team, how to select the right team members,

how to inculcate an ethos centred around team principles and how an effective team should be led. It speaks to both team members and team leaders across all managerial levels - from a team leader in a call centre to a project manager or CEO. In short: To fast-track your business, shape up your teams! *An International Perspective* Cengage Learning
