Popular Photography Routledge Produced for only one year in the '70s, Blythe is a moony waif of a doll coveted by a growing group of devoted fans. Photographer Gina Garan fell to Blythe's charms and unusual looks years ago and has shot her in settings around the world, from Greece to Soho to Hooters. Hilarious, mesmerizing, and just a little spooky, This Is Blythe is the result of Garan's offbeat

passion and a photography book like no other. Here's mod Blythe pacing through an art gallery; a pensive Blythe in a tiny blue fur parka, the sun flaring orange behind her; Blythe emerging from a block of ice. Is that Blythe telling her Christmas wishes to Santa Claus? Like stills for a film that hasn't happened (yet?), these undeniably beautiful photographs create an entire world from each flawless frame. A no-explanation-necessary gift for that special someone, This Is Blythe will enchant fans of witty photography and pop culture with a taste for the unexpected.

Research, development, and applications in computer graphics have dramatically expanded in recent years. Because of decreasing prices, superior hardware is now being used and image quality is better than ever. Many people now require image-synthesis techniques and software for their applicaions. Moreover, the techniques of computer ani mation have become very

popular. In this book, we present a wide range of applications of computer graphics. This book is a collection of 44 papers in various areas of computer graphics selected from papers presented at Graphics Interface '85. Graphics Interface '85, held from May 27 to 31 in Montreal, was the first truly international computer graphics conference in Canada. This year, for the first time, the conference was presented jointly by the Com puter Graphics Society and the Canadian Man-Computer Communications Society. This new arrangement gave the conference international scope. The conference was spon sored by the Department of Communications in Ottawa, the Department of Science and Technology in Quebec, Supply and Services Canada, the Natural Sciences and Engineer ing Research Council of Canada, Hydro-Quebec, the "Association Canadienne Fran«aise pour I' Avancement des Sciences", and the Canadian Broadcasting Corpora tion. Graphics Interface '85 was organized by "1'Ecole des Hautes Etudes Commerciales" of the University of Montreal. Over 100 papers were submitted to the conference , but 64 were selected by the inter national program committee for presentation. This book contains new expanded versions of the papers.

Neural Information Processing and VLSI provides a unified treatment of this important subject for use in classrooms, industry, and research laboratories, in order to develop advanced artificial and biologically-inspired neural networks using compact analog and digital VLSI parallel processing techniques. Neural Information Processing and VLSI systematically presents various neural network paradigms, computing architectures, and the associated electronic/optical implementations using efficient VLSI design methodologies. Conventional digital machines cannot perform computationally-intensive tasks with satisfactory performance in such areas as intelligent perception, including visual and auditory signal processing, recognition, understanding, and logical reasoning (where the human being and even a small living animal can do a superb job). Recent research advances in artificial and biological neural networks have established an important foundation for high-performance information processing with more efficient use of computing resources. The secret lies in the design optimization at various levels of computing and communication of intelligent machines. Each neural network system consists of massively paralleled and distributed signal processors with every processor performing very

simple operations, thus consuming little power. Large computational capabilities of these systems in the range of some hundred giga to several tera operations per second are derived from collectively parallel processing and efficient data routing, through well-structured interconnection networks. Deep-submicron very large-scale integration (VLSI) technologies can integrate tens of millions of transistors in a single silicon chip for complex signal processing and information manipulation. The book is suitable for those interested in efficient neurocomputing as well as those curious about neural network system applications. It has been especially prepared for use as a text for advanced undergraduate and first year graduate students, and is an excellent reference book for researchers and scientists working in the fields covered.

This book draws upon a relational sociological paradigm to explore the processes of collective action in football fandom across Europe and the UK. Through a range of case studies, the authors address pertinent themes in football fandom, including anti-discrimination, 'home,' ticketing, name changes, 'ownership,' and broader leftist politics. Each of these case studies engages with the theoretical framework of cultural relational sociology, highlighting the different social and cultural changes English and European football has undergone, often over a very short period of time.

Life cycle engineering explores technologies for shifting industry from mass production and consumption paradigms to closed-loop manufacturing paradigms, in which required functions are provided with the minimum amount of production. This subject is discussed from various aspects: life cycle design, design for environment, reduce-reuse-recycle, life cycle assessment, and sustainable business models. This book collects papers from the 14th International CIRP Life Cycle Engineering Conference, the longest-running annual meeting in the field.

These essays have been written to honor W. W. Bledsoe, a scientist who has contributed to such diverse fields as mathematics, systems analysis, pattern recognition, biology, artificial intelligence, and automated reasoning. The first essay provides a sketch of his life, emphasizing his scientific contributions. The diversity of the fields to which Bledsoe has contributed is reflected in the range of the other essays, which are original scientific contributions by some of his many friends and colleagues. Bledsoe is a founding father of the field of automated reasoning, and a majority of the essays are on that topic. These essays are collected together here not only to acknowledge Bledsoe's manifold and substantial scientific contributions but also to express our appreciation for the great care and energy that he has devoted to nurturing many of the scientists working in those scientific fields he has helped found. The fifth edition of Numerical Methods for Engineers with Software and Programming Applications continues its tradition of excellence. The revision retains the successful pedagogy of the prior editions. Chapra and Canale's unique approach opens each part of the text with sections called Motivation, Mathematical Background, and Orientation, preparing the student for what is to come in a motivating and engaging manner. Each part closes with an Epilogue containing sections called Trade-Offs, Important Relationships and Formulas, and Advanced Methods and Additional References. Much more than a summary, the Epilogue deepens understanding of what has been learned and provides a peek into more advanced methods. Users will find use of software packages, specifically MATLAB and Excel with VBA. This includes material on developing MATLAB m-files and VBA macros. Also, many,

many more challenging problems are included. The expanded breadth of engineering disciplines covered is especially evident in the problems, which now cover such areas as biotechnology and biomedical engineering

"Mark Camilleri's new book provides an excellent overview of the eclectic academic literature in this

area, and presents a lucid description of how savvy companies can embed themselves in circular systems that reduce system-wide externalities, increase economic value, and build reputation. A valuable contribution." Charles J. Fombrun, Founder of Reputation Institute and a former Professor of Management at New York University and The Wharton School, University of Pennsylvania, USA "I am pleased to recommend Dr. Camilleri's latest book, Corporate Sustainability, Social Responsibility, and Environmental Management. The book is a rich source of thought for everyone who wants to get deeper insights into this important topic. The accompanying five detailed case studies on a wide array of corporate sustainable and responsible initiatives are helpful in demonstrating how theoretical frameworks have been implemented into practical initiatives. This book is a critical companion for academics, students, and practitioners." Adam Lindgreen, Professor and Head of Department of Marketing, Copenhagen Business School, Denmark "This book is an essential resource for students, practitioners, and scholars. Dr. Mark Camilleri skillfully delivers a robust summary of research on the business and society relationship and insightfully points to new understandings of and opportunities for responsible business conduct. I highly recommend Corporate Sustainability, Social Responsibility, and Environmental Management: An Introduction to Theory and Practice with Case Studies." Diane L. Swanson, Professor and Chair of Distinction in Business Administration and Ethics Education at Kansas State University, KS, USA "Mark's latest book is lucid, insightful, and highly useful in the classroom. I strongly recommend it." Donald Siegel, Dean of the School of Business and Professor of Management at the University at Albany, State University of New York, NY, USA "The theory and practice of corporate sustainability, social responsibility and environmental management is complex and dynamic. This book will help scholars to navigate through the maze. Dr Camilleri builds on the foundations of leading academics, and shows how the subject continues to evolve. The book also acknowledges the importance of CSR 2.0 - or transformative corporate sustainability and responsibility - as a necessary vision of the future." Wayne Visser, Senior Associate at Cambridge University, UK. He is the author of CSR 2.0: Transforming Corporate Sustainability & Responsibility and Sustainable Frontiers: Unlocking Change Through

Business, Leadership and Innovation "Corporate Sustainability, Social Responsibility and Environmental Management: An Introduction to Theory and Practice with Case Studies" provides a useful theoretical and practical overview of CSR and the importance of practicing corporate sustainability." Geoffrey P. Lantos, Professor of Business Administration, Stonehill College. Easton, Massachusetts, USA "This book offers a truly comprehensive guide to current concepts and debates in the area of corporate responsibility and sustainability. It gives helpful guidance to all those committed to mainstreaming responsible business practices in an academically reflected, yet practically relevant, way." Albert Caruana, Professor of Marketing at the University of Malta, Malta and at the University of Bologna, Italy "A good overview of the latest thinking about Corporate Social Responsibility and Sustainable Management based on a sound literature review as well as useful case studies. Another step forward in establishing a new business paradigm." René Schmidpeter, Professor of International Business Ethics and CSR at Cologne Business School (CBS), Germany "Dr. Camilleri's book is a testimony to the continuous need around the inquiry and advocacy of the kind of responsibility that firms have towards societal tenets. Understanding how CSR can become a modern manifestation of deep engagement into socio-economic undercurrents of our firms, is the book's leading contribution to an important debate, that is more relevant today than ever before." Mark Esposito, Professor of Business and Economics at Harvard University, MA, USA "Mark's book is a great addition to the literature on CSR and EM; it will fill one of the gaps that have continued to exist in business and management schools, since there are insufficient cases for teaching and learning in CSR and Environmental Management in Business Schools around the globe." Samuel O. Idowu, Senior Lecturer in Accounting at London Metropolitan University, UK; Professor of CSR at Nanjing University of Finance and Economics, China and a Deputy CEO, Global Corporate Governance Institute, USA "Corporate Social Responsibility has grown from 'nice to have' for big companies to a necessity for all companies. Dr Mark Camilleri sketches with this

excellent book the current debate in CSR and CSR communication and with his cases adds valuable insights in the ongoing development and institutionalization of CSR in nowadays business." Wim J.L. Elving, Professor at the University of Amsterdam, Netherlands
