Why do people do good? This very teachable and short new introductory text explores these and other riddles to stir students sociological curiosity and promote active learning as the sure path toward mastering the fundamentals of the discipline. "Once again, Pine Forge Press has done us Intro teachers a great service with The Riddles of Human Society. The authors have produced a remarkable text, designing it from the point of view of how students actually acquire sociological tools and imagination when reflecting on their social world. ... It is written as a conversation with readers, yet is organized with learning tools like chapter summaries, discussion questions, and an in-text glossary. It considers a broad range of topics from micro to macro levels, thus uniquely blending the best of a shorter textbook and a monograph. It will serve very well as a main text for introductory sociology courses. I recommend it highly." Stephen Sharkey, Department of Social Science, Alverno College

They lead to one-sided search processes in the memory and provoke extremely irrational (delusional) processing errors and further overneurotic changes in the thinking, feeling and acting of the schizophrenic. A comparison with the disturbable artificial intelligence of an Internet search engine serves to illustrate memory-psychological connections. A four-stage psychotherapy of schizophrenic disorders based on the Overencoding theory is presented in contrast to conventional neurosis therapy and discussed in an article by Prof. Manfred Bleuler.
