But the satisfaction of the job well done, not to mention the possible cost savings on buying a new yacht, are immense. Nevertheless, it is not something that should be undertaken lightly and without careful consideration. That is where this book comes in, as Enric Rosell ó takes you through his restoration of a 30-year-old 40-foot

yacht. Broken down into 46 chapters, Enric details the stages of his restoration in chronological order. For each he starts with an overview of the task and the thinking behind the approach he took. Just these introductory pieces alone are ideal for someone contemplating a restoration (of all or part of a boat) to read before making the final decision as to whether to go ahead. For those who decide to take on the challenge, each overview is followed by an in-depth step-by-step account of what they did, accompanied by numerous informative photo sequences (with over 800 colour photos in total). The material in this book would be invaluable both to boat owners who are considering a complete overhaul and to those who have one or two smaller jobs to do. All possible subjects are covered, including dealing with osmosis, the interiors, deck, rigging, electrics and electronics, plumbing, engine, galley, heads and much more. The author is very honest about the amount of work and commitment required and also offers advice about when to call in the professionals and when to consider doing the work yourself. Anyone contemplating a complete or partial restoration is advised to read this book beforehand, so you know what is ahead, and to follow its guidance if you to decide to proceed.
