This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the

city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

This volume contains all presentations at the MusicPhysio Congress, the first international conference on physiotherapy/occupational therapy and musicians' health. It covers current aspects of physiotherapy relating to the assessment and management of pain disorders in instrumentalists, singers, and dancers. As many musicians complain of neuromusculoskeletal pain, physiotherapy plays a major role in prevention, diagnosis and therapy. (Series: *Medicine / Medizin*, Vol. 14) [Subject: Health, Physiotherapy, Music Studies]

You say Lee-doh, We say Ly-doh From beautiful Art Deco lidos to humble, fiercely loved community pools, this is the definitive photographic guide to around 130 lidos in the UK and Channel Islands. Collected together for the first time, each entry details what makes the pool unique and what swimming there is like, as well as providing information about refreshments, accessibility and much more. This guide is organised geographically and includes information on how to find the lidos, it also suggests other nearby pools so you can plan your own lido road trips.

The WHO Global report on drowning: preventing a leading killer highlights that 372,000 people drown worldwide each year. Drowning is among the ten leading causes of death for children and young people in every region of the world. The report sets out the evidence showing a range of effective drowning prevention strategies, and makes a number of recommendations for concrete measures to be taken by national and local governments. With the release of this report, WHO aims to galvanize attention and action to this issue by highlighting how collaboration across sectors can save lives.--Publisher description.

Managing Health and Safety in Swimming Pools Toronto: Royal Life Saving Society Canada

The Health and Safety (First Aid) Regulations 1981 apply to workplaces in the UK, including those with less than five employees, and to the self-employed.

Pediatric First Aid and CPR Learning Matters

This booklet provides guidance for those who have any involvement with the operation and management of health and safety in swimming pools: primarily pool owners (including local authority clients), pool operators (including management contractors), architects, engineers, designers, manufacturers and constructors. Aspects of this guidance will also apply to pool hirers. Its aim is to provide guidance on the risks associated with swimming pool operation and the precautions which may be taken to help achieve a safer environment for people who use swimming pools and employees who work at them. The revision brings the guidance up to date with changes in health and safety law and new developments in relation to equipment, facilities and supervision arrangements.

The Pleasures of Life Health and Safety Executive (Hse)

As the number of community pools and waterparks grows nationwide, participation in aquatic activities is also growing. Lifeguards must receive proper and effective training, and maintain their skills to ensure their ability to work effectively with others as a part of a lifeguard team. This manual will supplement your in-service training to keep your knowledge and skills sharp.

American Red Cross Lifeguarding Manual Routledge

Covers lifeguarding responsibilities along with information on such topics as rescue breathing, CRP and AED, supplemental

oxygen support, spinal injury management, handling risks, and professionalism.

International Lifeguard Training Program CRC Press  
When a bad day at work culminates in losing out on a promotion, Jim Sanders shifts into his animal form to let off steam. Then his bad day turns into a bad night-while prowling his Atlantic City neighborhood as a large gray house cat, he's caught in a torrential downpour. What little luck he has washes down the gutter when his new boss, Andrew Wright, catches him taking shelter on his porch, brings him inside, and starts calling him Mr. Frosty. As a feline, Jim becomes the inadvertent confessor for his boss's lonely son, Tony, a victim of schoolyard bullying. As a human, he feels drawn to Andrew, a man he wanted to resent. Finding love was never part of Jim's plan for the future-not with his bizarre secret-yet suddenly he finds himself navigating that minefield anyway. But not everything is easy, especially for an interracial gay couple dealing with prejudice in the workplace, at Tony's school, and even within their own families.

Pool Lifeguard Staywell Company

The World Health Organization's recently published Global Report on Drowning found that drowning is the third leading cause of unintentional injury death worldwide—making the information presented in this new book an important part of the global effort to reduce this health risk. Written by leading researchers and academics from around the world, *The Science of Beach Lifeguarding* focuses on the scientific evidence that underpins what is taught to and practised by beach lifeguards. It is the first book to pull together all the different areas involved in beach lifeguarding and evaluate their evidence base. An accessible and informative reference underpinned by the best current research, the book's key themes cover the context of beach lifeguarding, the physical environment in which lifeguards work, medical aspects, practical lifeguarding techniques, physiological standards for lifeguards, safety education, and future developments in beach lifeguarding. The book presents groundbreaking work quantifying the scientific rationale behind a universally accepted fitness standard. It supplies an in-depth examination of the risks and hazards associated with the beach environment, including rip currents and cold water immersion. The book includes a state-of-the-art review of drowning and a comprehensive chapter on first aid. Detailing

the recently announced 2015 European Resuscitation Council Guidelines, this book is a must-have for beach lifeguards, beach lifeguard managers, search and rescue personnel, paramedics, sports scientists, health and safety practitioners, and occupational health practitioners.

CPR/AED for the Professional Rescuer SAGE

'Official SQA Past Papers' provide perfect exam preparation. As well as delivering at least three years of actual past papers - including the 2008 exam - all papers are accompanied by examiner-approved answers to show students how to write the best responses for the most marks.

Diving and Jumping Jones & Bartlett Learning

This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

Safe Practice in Physical Education Amer Red Cross

Understanding the law is now a more important part of youth work practice than ever before, and all successful youth work professionals need to understand the way that law and

---

policy supports good ethical practice. This book provides a coherent overview of the legal processes and requirements encountered by today's youth work professionals, helping readers learn how to make informed ethical judgements and offer appropriate advice to young people. It offers an insight into how laws are made, explains major legal requirements for safe youth work practice and details a range of guidance on the current frameworks and legislation students and practitioners need to be aware of. Using real world scenarios, case studies, and reflective questions, it helps the reader to engage critically with the current legal context of youth work, and develop their thinking, skills and practice. This is essential reading for all students working towards professional recognition in work with young people.
