Medical Assistant Exam Book Ascencia Test Prep Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description. A Comprehensive Study Guide for Success Test Prep Books This book explores contemporary military innovation, with a particular focus on the balance between anticipation and adaptation. The volume examines contemporary military thought and the doctrine that evolved around the thesis of a transformation in the character of war. Known as the Information-Technology Revolution in Military Affairs (IT-RMA), this innovation served as an intellectual foundation for the US defence transformation from the 1990s onwards. Since the mid-1990s, professional ideas generated within the American defence milieu have been further disseminated to military communities across the globe, with huge impact on the conduct of warfare. With chapters written by leading scholars in this field, this work sheds light on RMAs in general and the IT-RMA in the US, in particular. The authors analyse how military practice and doctrines were developed on the basis of the IT-RMA ideas, how they were disseminated, and the implications of them in several countries and conflicts around the world. This book will be of much interest to students of strategic studies, defence studies, war and technology, and security studies in general.
