The White Goddess is perhaps  
the finest of Robert Graves's  
works on the psychological

---

and mythological sources of poetry. In this tapestry of poetic and religious scholarship, Graves explores the stories behind the earliest of European deities—the White Goddess of Birth, Love, and Death—who was worshipped under countless titles. He also uncovers the obscure and mysterious power of "pure poetry" and its peculiar and mythic language.

*Descendants of

Springer

Brands are now a dominant feature of everyday life.

Drawing on rich empirical material, this book builds up a critical theory, arguing that brands have become an important tool for transforming everyday life into economic value.

Hal Wallis (1898-1986) might not be as well known as David O. Selznick or Samuel Goldwyn, but the films he

produced—Casablanca, Jezebel, Now, Voyager, The Life of Emile Zola, Becket, True Grit, and many other classics (as well as scores of Elvis movies)—have certainly endured. As producer of numerous films, Wallis made an indelible mark on the course of America's film industry, but his contributions are often overlooked. Bernard Dick offers the first comprehensive assessment of the producer's incredible career. A former office boy and salesman, Wallis first engaged with the film

---

business as the manager of a Los Angeles movie theater in 1922. He attracted the notice of the Warner brothers, who hired him as a publicity assistant. Within three months he was director of the department, and appointments to studio manager and production executive quickly followed. Wallis went on to oversee dozens of productions and formed his own production company in 1944. Dick draws on numerous sources such as Wallis's personal production files and exclusive interviews with

many of his contemporaries to finally tell the full story of his illustrious career. Dick combines his knowledge of behind-the-scenes Hollywood with fascinating anecdotes to create a portrait of one of Hollywood's early power players. Sound Synthesis and Sampling University Press of Kentucky  
Unlock the lost and hidden meanings of the world's ancient and modern signs and symbols with the latest in the hugely popular series of 'Element Encyclopedias'. This

is the biggest A-Z reference book on symbolic objects you'll ever find.

The Signal Corps Taylor & Francis

This book is intended as a textbook for a course in behavioral economics for advanced undergraduate and graduate students who have already learned basic economics. The book will also be useful for introducing behavioral economics to researchers. Unlike some general audience books that discuss behavioral economics, this book

---

does not take a position of neuroeconomics, cultural and identity economics, completely negating and economics of traditional economics. Its happiness. These are position is that both and economics of behavioral and traditional distinctive subfields of economics are tools that economics that are have their own uses and different from, but closely limitations. Moreover, this related to, behavioral work makes clear that economics with many knowledge of traditional important overlaps with economics is a necessary behavioral economics. basis to fully understand Neuroeconomics, which is behavioral economics. developing fast partly behavioral economics. because of technological Some of the special progress, seeks to features compared with understand how the other textbooks on workings of our minds behavioral economics are affect our economic that this volume has full decision making. In chapters on addition to a full chapter on neuroeconomics, the book provides explanations of findings in neuroeconomics in chapters on prospect theory (a major decision theory of behavioral economics under uncertainty), intertemporal economic behavior, and social preferences (preferences that exhibit concerns for others). Cultural and identity economics seek to explain how cultures and people ' s identities affect economic

---

behaviors, and economics of happiness utilizes measures of subjective well-being. There is also a full chapter on behavioral normative economics, which evaluates economic policies based on findings and theories of behavioral economics.

This report, prepared by the Office of Technological Assessment (OTA) in response to a request from the House Committee on the Judiciary, examines the rapid and complex

technological changes and trends in computer software technologies and their possible effects on the nation's intellectual property system. The three policy issues identified are: (1) the appropriate scope of copyright protection for computer software; (2) patent protection for software-related inventions and algorithms and how the U.S. Patent and Trademark Office will handle these types of applications; and (3) complications facing

---

libraries and commercial and private producers and users of digital information, including computer-based mixed media products. A summary of this report is published separately which contains information found in the first chapter of the complete report. The complete report is divided into six chapters: (1) Summary, Issues, and Options; (2) The Law (patents, copyright, and trade secret law); (3) The International Arena; (4) Software Technology and the Law; (5) Digital Information and Copyright (print and nonprint electronic publishing); and (6) Economics, Intellectual Property and Software. Three appendixes provide a review of selected computer hardware and software initiatives overseas; an analysis of the European Economic Community Treaty and its structure and function; and a list of workshop participants and reviewers. The names of the members of the Congressional Advisory Panel and the OTA project staff are also provided. (ALF). The Anatomy of the Gyroscope Taylor & Francis

The collection of Barbara and Lawrence Fleischman of New York is one of the most important private collections of ancient Greek and Roman art in the United States and among the most important in the world. Composed of

---

approximately three hundred objects from the Bronze Age to the Late Antique, it includes bronze statuettes, marble sculpture, vases, jewelry, lamps and candelabra, keys, weights, and silver bowls and utensils. The Fleischmans have a particular fascination with pieces associated with everyday life in antiquity, since these objects evoke a human connection to the past. They are also drawn to pieces that exemplify the human propensity to transform a functional object into a thing of beauty. Not only has their emotional response to an object 's aesthetic appeal or its historical significance guided them in their forty years of collecting, personal interests have been at work as well. The large number of pieces related to the theater or representing theatrical subjects reflects Barbara Fleischman 's lifelong love of that art. A Passion for Antiquities contains photographs and extensive catalogue entries on the objects included in the exhibition at the J. Paul Getty Museum and the Cleveland Museum of Art. Eighteen contributors provide art historical and descriptive information about each piece. The objects not selected for the exhibition are detailed in a checklist that specifies their origins, dates, media, and sizes. This book is the first major reference on the entire collection, since most of the objects have never before been

---

publicly shown. To facilitate finding specific objects or groups of objects, the book is organized first chronologically and then by medium. Bibliographic sources for each entry cite both publications where the specific work is discussed as well as references to related scholarship. Karol Wight provides a chronological overview of the collection, and Oliver Taplin relates selected pieces to the development of Greek theater. The

exhibition of Barbara and Lawrence Fleischman's collection and this catalogue allow us to enter into their minds and emotions so that, for a time, we can share their passion for antiquities. Task Force Report  
Viking Adult Works in the Museum's collection that embody the Renaissance interest in classical learning, fame, and beautiful objects are illustrated and discussed in this resource and will help educators introduce the

richness and diversity of Renaissance art to their students. Primary source texts explore the great cities and powerful personalities of the age. By studying gesture and narrative, students can work as Renaissance artists did when they created paintings and drawings. Learning about perspective, students explore the era's interest in science and mathematics. Through projects based on poetic forms of the time, students write about their

---

responses to art. The activities and lesson plans are designed for a variety of classroom needs and can be adapted to a specific curriculum as well as used for independent study. The resource also includes a bibliography and glossary. Air Corps Newsletter Berkeley : University of California Press "The Bedford Spotlight Reader Series brings critical topics to life in a portable, cost-effective reader. In this volume, you'll explore these

questions: why do we create monsters -- and why are we attracted to them? How do monsters adapt to reflect the values, beliefs, and culture of the times? Is the monster within us? Readings by a range of classic poets, contemporary fiction writers, pop-culture critics, philosophers, psychologists, occultists, ethicists, historians, and others take up these questions and more. The book helps you form your own questions and

responses as you investigate and write about this popular and intellectually rich topic." -- From back cover. Skylab Metropolitan Museum of Art The second volume of writings by Los Angeles artist Mike Kelley, focusing on his own work. What John C. Welchman calls the "blazing network of focused confluents" from which Mike Kelley's styles are generated is on display

---

in all its diversity in this second volume of the artist's writings. The first volume, *Foul Perfection*, contained thematic essays and writings about other artists; this collection concentrates on Kelley's own work, ranging from texts in "voices" that grew out of scripts for performance pieces to expository critical and autobiographical writings. *Minor Histories* organizes Kelley's writings into five sections. "Statements" consists of twenty pieces produced between 1984 and 2002 (most of which were written to accompany exhibitions), including "Ajax," which draws on Homer, Colgate-Palmolive, and Longinus to present its eponymous hero; "Some Aesthetic High Points," an exercise in autobiography that counters the standard artist bio included in catalogs and press releases; and a sequence of "creative writings" that use mass cultural tropes in concert with high art mannerisms—approximating in prose the visual styles that characterize Kelley's artwork. "Video Statements and Proposals" are introductions to videos made by Kelley and other artists, including Paul McCarthy and Bob Flanagan and Sheree Rose. "Image-Texts"

---

offers writings that accompany or are part of artworks and installations. This section includes "A Stopgap Measure," Kelley's zestful millennial essay in social satire, and "Meet John Doe," a collage of appropriated texts. "Architecture" features an discussion of Kelley's Educational Complex (1995) and an interview in which he reflects on the role of architecture in his

work. Finally, "Ufology" considers the aesthetics and sexuality of space as manifested by UFO sightings and abduction scenarios. The Element Encyclopedia of Secret Signs and Symbols: The Ultimate A – Z Guide from Alchemy to the Zodiac Taylor & Francis The International Symposium on Molecular Spectroscopy is the premier annual meeting

interdisciplinary field. The symposium uniquely combines plenary talks from world leaders in the field with parallel sessions comprising shorter talks, many presented by graduate students, and fosters a collegial and collaborative atmosphere with a multitude of formal and informal interactions. Registration and housing costs are kept

---

low to enable entire research groups to attend, and in fact most senior people in the field gave their very first conference presentation at this symposium (to a very friendly audience). A wide range of topics is covered, from theory to experiment, from gas-phase to condensed-phase, from low resolution to ultra-high resolution, from the microwave to the ultraviolet, and from

fundamental science to applications such as astronomy and atmospheric science. Each year's meeting also includes three "mini-symposia" on topics of special interest.

The University Address Book Bedford/St. Martin's  
By investigating the relationship between acoustical technologies and twentieth-century experimental poetics, this collection, with an accompanying compact

disc, aims to 'turn up the volume' on printed works and rethink the way we read, hear, and talk about literary texts composed after telephones, phonographs, radios, loudspeakers, microphones, and tape recorders became facts of everyday life. The collection's twelve essays focus on earplay in texts by James Joyce, Ezra Pound, H.D., Samuel Beckett, William Burroughs, Amiri Baraka, Bob Kaufman, Robert Duncan, and Kamau

---

Brathwaite and in performances by John Cage, Caribbean DJ-poets, and Cecil Taylor. From the early twentieth-century soundscapes of Futurist and Dadaist 'sonosphers' to Henri Chopin's electroacoustical audio-poemes, the authors argue, these states of sound make bold but wavering statements--statements held only partially in check by meaning. The contributors are Loretta Collins, James A. Connor, Michael Davidson, N.

Katherine Hayles, Nathaniel Mackey, Steve McCaffery, Alec McHoul, Toby Miller, Adalaide Morris, Fred Moten, Marjorie Perloff, Jed Rasula, and Garrett Stewart. Order of Battle of the United States Land Forces in the World War Routledge Sound Synthesis and Sampling' provides a comprehensive introduction to the underlying principles and practical techniques applied to both

commercial and research sound synthesizers. This new edition has been updated throughout to reflect current needs and practices- revised and placed in a modern context, providing a guide to the theory of sound and sampling in the context of software and hardware that enables sound making. For the revised edition emphasis is on expanding explanations of software and computers, new sections include techniques for making

---

sound physically, sections within analog and digital electronics. Martin Russ is well known and the book praised for its highly readable and non-mathematical approach making the subject accessible to readers starting out on computer music courses or those working in a studio. Underground Water Resources of Long Island, New York Farrar, Straus and Giroux How can a smartwatch help patients with diabetes manage their

disease? Why can't patients find out prices for surgeries and other procedures before they happen? How can researchers speed up the decade-long process of drug development? How will "Precision Medicine" impact patient care outside of cancer? What can doctors, hospitals, and health systems do to ensure they are maximizing high-value care? How can healthcare entrepreneurs find success in this data-driven market? A

revolution is transforming the \$10 trillion healthcare landscape, promising greater transparency, improved efficiency, and new ways of delivering care. This new landscape presents tremendous opportunity for those who are ready to embrace the data-driven reality. Having the right data and knowing how to use it will be the key to success in the healthcare market in the future. We are already starting to see the impacts in drug development, precision

---

medicine, and how patients with rare diseases are diagnosed and treated. Startups are launched every week to fill an unmet need and address the current problems in the healthcare system. Digital devices and artificial intelligence are helping doctors do their jobs faster and with more accuracy. MoneyBall Medicine: Thriving in the New Data-Driven Healthcare Market, which includes interviews with dozens of healthcare

leaders, describes the business challenges and opportunities arising for those working in one of the most vibrant sectors of the world ' s economy. Doctors, hospital administrators, health information technology directors, and entrepreneurs need to adapt to the changes effecting healthcare today in order to succeed in the new, cost-conscious and value-based environment of the future. The authors map out many of the changes taking place,

describe how they are impacting everyone from patients to researchers to insurers, and outline some predictions for the healthcare industry in the years to come.

The Signal Corps Hal Leonard Corporation

In this book, the technical explanation of the nature of analog sound creation is followed by the story of its birth and its subsequent development by various designers, manufacturers and performers. The individual components of analog sound creation are then examined in detail,

---

with step by step examples of sound creation techniques. Then the modern imitative analog instruments are examined, again with detailed instructions for programming and using them, and the book is completed with appendices listing the major instrument lines available, hints on values and purchasing, other sources of information, and a discography of readily available recordings which give good examples of analog sound synthesis. The CD which accompanies the book gives many examples

of analog sound creation basics as well as more advanced techniques, and of the abilities of the individual instruments associated with classical and with imitative analog sound synthesis. Taming Liquid Hydrogen HarperCollins UK Score The Romance of Words ... University of Chicago Press Always connect—that is the imperative of today ' s media. But what about those moments when media cease to function properly, when messages go beyond the sender and

receiver to become excluded from the world of communication itself—those messages that state: “ There will be no more messages ” ? In this book, Alexander R. Galloway, Eugene Thacker, and McKenzie Wark turn our usual understanding of media and mediation on its head by arguing that these moments reveal the ways the impossibility of communication is integral to communication itself—instances they call excommunication. In

---

three linked essays, Excommunication pursues this elusive topic by looking at mediation in the face of banishment, exclusion, and heresy, and by contemplating the possibilities of communication with the great beyond. First, Galloway proposes an original theory of mediation based on classical literature and philosophy, using Hermes, Iris, and the Furies to map out three of the most prevalent modes of mediation

today—mediation as exchange, as illumination, and as network. Then, Thacker goes boldly beyond Galloway’s classification scheme by examining the concept of excommunication through the secret link between the modern horror genre and medieval mysticism. Charting a trajectory of examples from H. P. Lovecraft to Meister Eckhart, Thacker explores those instances when one communicates or connects with the inaccessible, dubbing

such modes of mediation “haunted” or “weird” to underscore their inaccessibility. Finally, Wark evokes the poetics of the infuriated swarm as a queer politics of heresy that deviates from both media theory and the traditional left. He posits a critical theory that celebrates heresy and that is distinct from those that now venerate Saint Paul. Reexamining commonplace definitions of media, mediation, and communication, Excommunication offers a

---

glimpse into the realm of Architecture
