Policymaking is of its very nature a people-  
centered business—a good reason why highly  
effective policy analysts display not only  
superb technical expertise but excellent  
people skills as well. Those "people skills"  
include the ability to manage professional  
relationships, to learn from others about

---

policy issues, to give presentations, to work in teams, to resolve conflict, to write for multiple audiences, and to engage in professional networking. Training programs for policy analysts often focus on technical skills. By working to enhance their people skills, policy analysts can increase their ability to produce technical work that changes minds. Fortunately, this unique book fills the gaps in such programs by covering the "people side" of policy analysis. Beyond explaining why people skills matter, this book provides practical, easy-to-follow advice on how policy analysts can develop and use their people skills. Each chapter provides a Skill Building Checklist, discussion ideas, and suggestions for further reading. People Skills is essential reading for

anyone engaged in public policymaking and public affairs as well as all policy analysts. Completely changing how we think about what it means to be an effective policy analyst, *People Skills for Policy Analysts* provides straightforward advice for students of policy analysis and public management as well as practitioners just starting their professional lives.

Conflict is a normal and predictable part of life.

How we respond to it, however, determines whether or not the conflict will be destructive.

'Mediating Interpersonal Conflicts' is an up-to-date presentation showing how the techniques of

negotiation and mediation can be applied in resolving a wide range of conflicts in families, communities, schools, and workplaces. Dr. Umbreit not only clearly outlines the communication, negotiation, and mediation skills involved in effective resolution of interpersonal conflict, he moves the reader beyond the mechanics of mediation to what he calls a journey of the heart through a humanistic mediation model that addresses the emotional context of the conflict.

Childhood is increasingly saturated by technology: from television to the Internet, video games to 'video nasties', camcorders to personal computers. Children, Technology and Culture looks at the interplay of children and technology which poses critical questions

for how we understand the nature of childhood in late modern society. This collection brings together researchers from a range of disciplines to address the following four aspects of this relationship between children and technology: \*children's access to technologies and the implications for social relationships \*the structural contexts of children's engagement with technologies with a focus on gender and the family \*the situatedness of children's interactions with technological objects \*the constitution of children and childhood through the mediations of technology \_ This book represents a substantial contribution to contemporary social scientific thinking both about the nature of children and childhood, the social impacts of technologies and the

various relationships between the two.
