The brand with the crown is recognized worldwide as

an invaluable sports implement and luxury product.

In little more than one hundred years, it has

become one of the most successful and innovative watch brands on the planet. Rolex manufactures more than a half a million wristwatches per year while maintaining an outstanding reputation and near-perfect quality. From the beginning, the sponsorship of statesmen, movie stars, and athletes has driven its success, but the company has expanded to include more than just the rich and famous. The Rolex Oyster became the first watch to defy the elements when, in 1927, Mercedes Gleitze wore one while she swam the English Channel. In 1933, the company patented the first automatic winding mechanism. Learn more about this history and read updated reports written about new Rolex ideas and performance tests featured in the German watch magazine Armbanduhren (Wristwatch) from the past 15 years.

The history of Rolex is inextricably linked to its founder Hans Wilsdorf, who

took the first steps in the world of Swiss watchmaking as he dreamed about a

timepiece that could be worn around the wrist. This experimental research led

Rolex to achieve its highest goals in both technological innovation and in the use

of the finest materials alone. Its models have been photographed on the wrists of political leaders, sports champions, and film and fashion celebrities, transforming each rolex into a fully-fledged status symbol, a synonym of elegance and precision. Including essays with a historical and technical slant, in-depth descriptions of the most representative pieces and a brief glossary, the pages in this book sparkle with golden hands, diamond-studded dials and patent leather watchbands, illustrated in period photographs and macro-detail. The volume ends with a chapter dedicated to the most amazing auctions that saw the sale of the Geneva-based company's vintage watches.

from an official Rolex document: « THE BIRTH OF THE " DATEJUST "

in a small aperture with a Cyclops lens which enlarges it so as to make it easier to

read, was born. The next stage was the launch of the " Day-Date " , a perfected

model which also indicates, with letters, the days of the week. The day and the

date automatically change every evening at midnight. » These are the words of

Roger Federer, a living tennis legend, about his Day-Date II: " The reason I like
