 The early 2000s were an important period, spanning a time when mechanical watches had quite rightly retaken their place in the world market. We all may have a digital device in our pocket that is more accurate than a mechanical watch, but a timepiece has soul, personality, and history. The collection in this book is a step into the world of vintage watch collecting, with a range of photographs, intricate research, and accessible reference material that will intrigue both the casual and avid enthusiast. The collection showcases some of the most interesting, luxurious, and functional 20th-century (1930-1980) mechanical timepieces ever to be produced, including Heuer's Autavia, Rolex's Submariner, Gallet's MultiChron, Zenith's De Luca, and the Universal Space Compax.  From 1949 to 2000, Moshe Dayan, Yitzhak Rabin, Ariel Sharon, and Ehud Barak conducted Israel ' s successful (and unsuccessful) talks with its Arab neighbors, from the armistice negotiations to Kissinger ' s shuttle diplomacy, to Camp David I and the Egyptian-Israeli peace treaty, and finally to the Oslo peace process. The four successful generals who became politicians are covered in four separate biographies, which discuss the early life and military career of each subject and his subsequent political career. Two other military politicians—Yigal Allon and Ezer Weizman—are covered within these four biographies. An overview of the phenomenon of military politicians in Israel is given and an appendix compares it with similar experiences in South Africa and the United States.

This american edition is filled with up-to-date authoritative valuations and photographs of more than 10,000 objects. A succinct description of each

item contains a price range. The Magic of Watches Guido Mondani Editore e Ass What is a beautiful watch? How do you make a good choice? "The Magic of Watches" explains how and why these little objects are so precious, fascinating and exciting. The Magic of Watches loves paradoxes: why a one-million-dollar watch might be less precise and more fragile than one that costs 15 dollars. The Magic of Watches comes back to the origins of the measurement of time: how did we go from the water clock to the wristwatch? The Magic of Watches dares to speak about technique: how does a mechanical movement work? How does a quartz watch work? The Magic of Watches delves into details: what is a "complication" and when do we speak about "chronometer"? The Magic of Watches likes art: how do we enamel a dial? The Magic of Watches is unique: it focuses in detail on the basics in order to understand and love watches better. Abbeville Press The history of Rolex is inextricably linked to its founder Hans Wilsdorf, who took the first steps in the world of Swiss watchmaking as he dreamed about a timepiece that could be worn around the wrist. This experimental research led Rolex to achieve its highest

goals in both technological innovation and in the use of the finest materials alone. Its models have been photographed on the wrists of political leaders, sports champions, and film and fashion celebrities, transforming each rolex into a fully-fledged status symbol, a synonym of elegance and precision. Including essays with a historical and technical slant, in-depth descriptions of the most representative pieces and a brief glossary, the pages in this book sparkle with golden hands, diamond-studded dials and patent leather watchbands, illustrated in period photographs and macro-detail. The volume ends with a chapter dedicated to the most amazing auctions that saw the sale of the Geneva-based company's vintage watches. Chasing Time Think eBooks The name Rolex is recognized around the world. As an icon of beauty, quality, accuracy, style, and taste. While there are other fine manufacturers of timepieces, none has reached this pinnacle of public respect and acclaim. The watches produced by Rolex over the last 90 years are celebrated in this lavishly illustrated classic, now in an expanded second edition. Dowling and Hess, both acknowledged Rolex authorities, have captured the watches'

beauty in color photography and present the most thorough and extensive history written of the company. Information for collectors and newly revised market values of the watches make this a truly useful volume, one that will be cherished by watch lovers around the world. "Rolex was established in 1908, a century ago, so one hundred years have passed from that day to the publication of this volume in which the author, John Goldberger, illustrates what he considers to be the 100 most beautiful examples ever produced. One hundred years of life, and one hundred examples, traced back through time thanks to painstaking research, with the collaboration of some of the most renowned collectors in the world, and photographed to show the characteristics of the movement, case and dial of each example in the best possible way. The top one hundred, we could say, also to narrow down the field of research, which would otherwise have been incredibly vast, to grasp the essence of a brand that has probably contributed more than any other to the development of the wristwatch. Giampiero Negretti Over 700 colour

illustrations and 400 descriptions provide the collector and watch enthusiast with invaluable information on reference numbers, watchcases, faces, movements, related calibres and the year of production of each watch. The book is divided into seven chapters: Watches with a destiny; Oyster; Chronograph and moon phases; Oyster chronograph and moon phases; Datejust, Day-Date; Sport Models; Cosmograph."--BOOK JACKET.
