Full facsimile of the original edition. Not reproduced with Optical Recognition software. As The New York Times wrote after his death, Henry B. Fried was "widely acknowledged as the dean of American watchmakers." In the revised, 1961 edition of his classic book *The Watch Repairer's Manual*, reprinted here, Fried addresses topics important to contemporary watch repairers, such as self-winding watches, waterproofing, calendar watches, alarm wristwatches, and chronographs. *The Watch Repairer's Manual* also includes a fine visual dictionary of exploded views in isometric, which are very helpful for ordering watch parts. One of the few modern books available on the techniques of watch repair and certainly the most esteemed, *The Watch Repairer's Manual* is outstanding for its sequence of presentation and its many useful illustrations, including enlarged details of alarm and self-winding watches. The consummate craftsman and master of details, Fried himself created the illustrations. From teaching others, Fried has learned that if you have a good

understanding of how and why the mechanisms work, you will become better at fixing any problems you face-often without needing to consult a book. *The Watch Repairer's Manual* provides: - Helpful background material, such as full descriptions of the main divisions of the modern watch mechanisms, including the purpose and function of each unit. - Complete directions for cleaning and overhauling a watch movement for casing. - A section devoted to general repairs and troubleshooting. For anyone interested in watch repair, this volume will serve as a working manual, a reference manual, and even a course of study. Assuming little previous knowledge on the part of the reader, Fried provides complete and clear detail on each operation. *The Watch Repairer's Manual* should be of great value to the student, hobbyist, watch collector, and instrument maker. Henry B. Fried wrote and illustrated 14 books, many pamphlets, and hundreds of articles on horology, the science of timepieces. The first American to receive the Silver Medal of the British Horological Institute, he served as president of the New York City Horological Society and the New York State Watchmakers Association and vice president of the old Horological Institute of America. He taught and lectured on horology and served as an industry consultant. He also was a consultant for the Random House Dictionary and the Merriam-Webster Dictionary. *Luxury Brand Management* John Wiley & Sons **COLLECTING ROLEX SUBMARINER: PRESENTATION OF SUBMARINER, SEA-DWELLER AND DEEPSEA** *Collecting Rolex Submariner* is an updated and complete book about Rolex Submariner, Sea-Dweller and DeepSea. The time-worn aphorism "close only counts in horseshoes and hand grenades" is clearly inadequate. Close also counts in golf, shuffleboard, archery, darts, curling, and other games of accuracy in which hitting the precise center of the target isn't to be expected every time, or in which we can expect to be driven from the target by skilled opponents. This book is not devoted to sports discussions, but to efficient algorithms for determining pairs of closely related web pages—and a few other situations in which we have found that inexact matching is good enough — where proximity suffices. We will

not, however, attempt to be comprehensive in the investigation of probabilistic algorithms, approximation algorithms, or even techniques for organizing the discovery of nearest neighbors. We are more concerned with finding nearby neighbors; if they are not particularly close by, we are not particularly interested. In thinking of when approximation is sufficient, remember the oft-told joke about two campers sitting around after dinner. They hear noises coming towards them. One of them reaches for a pair of running shoes, and starts to don them. The second then notes that even with running shoes, they cannot hope to outrun a bear, to which the first notes that most likely the bear will be satiated after catching the slower of them. We seek problems in which we don't need to be faster than the bear, just faster than the others fleeing the bear.

The Vintage Rolex Field Guide Watchprint.com Sarl An award-winning scientist offers his unorthodox approach to childrearing: " Parentology is brilliant, jaw-droppingly funny, and full of wisdom... bound to change your thinking about parenting and its conventions " (Amy Chua, author of Battle Hymn of the Tiger Mother). If you 're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley 's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You 'll be laughing and learning at the same time.

La numerosa clientela de los productos falsificados se compone sobre todo de personas con poco poder adquisitivo y más o menos conscientes de comprar artículos de imitación, pero poco avisadas de que algunos pueden resultar peligrosos para la salud, como los perfumes y los cosméticos. La mayoría también desconoce que, por dónde y cómo se venden esos artículos, prácticamente eliminan derechos básicos de los consumidores, como las garantías y la posibilidad de reclamación. Con las calles de las principales ciudades abarrotadas en busca de regalos, las Navidades son, junto con el verano, una de las épocas en que se dispara la venta de productos falsificados, artículos en general a precios "populares" que imitan o plagian los de marcas prestigiosas. Y, consecuentemente, aumenta el número de operaciones policiales, incautaciones y detenciones en el top manta, mercadillos, bazares, tiendas con pocos escritorios y almacenes para la distribución y venta ilegal a pie de calle o por Internet. Como muestra de esta realidad, el pasado verano fue prodigo en la "caza" del producto falso. A primeros de julio de 2018, la Guardia Civil desmanteló en Valencia dos fábricas de pilas falsas con más de un millón de unidades en stock y el doble de etiquetas y embalajes con los logotipos de marcas del sector. Fabricadas por empleados en condiciones penosas y sin controles de calidad, esas pilas podrían resultar peligrosas para los aparatos y las personas que las utilizaran. Durante los Sanfermines, la Policía Nacional detuvo en Pamplona a una banda especializada en delitos contra la propiedad industrial e intelectual con tres toneladas de calzado y ropa de vestir y deportiva, en apariencia, de marcas de primera fila valoradas en dos millones de euros. Pero no todo se limita a productos de uso cotidiano. A finales de julio, se desmanteló una organización que vendía vinos de Ribera de Duero de unos 20 euros a precios de hasta 1.900 euros la botella. Los hacían pasar por caldos de marcas tan exclusivas como Flor de Pingus, Vega Sicilia Único y Vega Sicilia Quinta Valbuena y los vendían en Internet, en portales de subastas e incluso en restaurantes de categoría. Muchas de estas operaciones parten de denuncias de marcas afectadas por la falsificación. Eso ocurrió, por ejemplo, a finales de agosto de 2018 con el decomiso en

cinco tiendas de un centro comercial de Benidorm (Alicante) de medio millar de bolsos, carteras, gorras, colgantes, pendientes y relojes de marcas conocidas. Uno de los denunciados fue la Federación de la Industria Relojera Suiza. La marca de ropa y complementos Michael Kors puso una denuncia similar que trajo consigo a primeros de septiembre una redada en seis locales de La Junquera (Girona) y que se saldó con la retirada de unas 5.000 piezas de ropa, calzado y bolsos. También a finales de verano, se desmanteló a partir de una denuncia un centro de distribución en Palma donde se incautaron 8.300 artículos presuntamente de marcas de lujo como Adidas, Louis Vuitton, Gucci, Hugo Boss y Armani, cuya venta callejera habría hecho una caja de más de dos millones de euros. Estas operaciones policiales se repiten en otras épocas del año y no son más que el reflejo de una realidad: mientras el marketing siga creando en la sociedad el ansia de poseer, usar y lucir artículos de marcas famosas, y mientras sus precios estén fuera del alcance de buena parte de los consumidores, habrá quien se la juegue con la ley fabricando, transportando y vendiendo falsificaciones, y no faltará quien, bien por desconocimiento o por "necesidad", las compre. Y no se atisba el menor indicio de que nada de eso vaya a cambiar. Al contrario, el mercado de lo falso sigue creciendo y alcanzando cifras asombrosas. En junio de 2018 la Oficina de Propiedad Intelectual Comunitaria (EUIPO) presentó los resultados de una investigación realizada en los últimos cinco años en toda la Unión Europea (UE) centrada en los 13 sectores más castigados por la piratería: artículos deportivos, baterías y pilas, bebidas espirituosas y vinos, bolsos y equipaje, cosméticos, perfumes y artículos de higiene personal, joyería y relojería, juguetes y juegos, música, neumáticos, pesticidas, productos farmacéuticos, ropa y teléfonos móviles. El informe de la EUIPO revela que, en esos sectores, las falsificaciones restan al mercado legal un 7,5 % de las ventas y que conllevan la destrucción de 434.000 puestos de trabajo y unas pérdidas en la UE de 60.000 millones de euros al año, por el no abono de impuestos, cotizaciones y otros ingresos. En todo el mundo, según la Interpol, estas pérdidas anuales ascenderían a más de 220.000 millones de euros. En España, estos 13 sectores pierden anualmente el 9,3 % de sus ventas: 6.200 millones de euros. En el caso de la perfumería y cosmética, ese porcentaje se eleva al 16,2 % (el doble de la media europea), según la patronal Stanpa: 933 millones de euros de los 5.828 que pierde

anualmente el sector en la UE. La piratería de artículos deportivos en nuestro país duplica la media de la zona del euro, donde esta industria emplea a 43.000 trabajadores en 4.271 empresas y pierde 7.500 millones al año solo en artículos como balones, esquís y complementos. Visto el perjuicio económico y social que provocan los productos falsificados, no es de extrañar la gravedad de las acusaciones que suelen recaer sobre las personas detenidas en operaciones contra la piratería: pertenencia a organización criminal, delitos contra la salud pública, contra la propiedad industrial, estafa, blanqueo de capitales, evasión fiscal... Pero ¿y los consumidores que adquieren productos falsificados? ¿Cometen algún delito? El artículo 298.1 del Código Penal dice que será castigado con pena de prisión de seis meses a dos años quien, con ánimo de lucro y sabiendo que comete un delito "contra el patrimonio o el orden socioeconómico", reciba, adquiera u oculte productos de origen ilícito. Pero... ¿quién va a denunciar a un joven que compra por 25 euros en una web pirata o en las redes sociales una camiseta de su equipo favorito que en la tienda oficial cuesta cinco o seis veces más? ¿Quién denuncia a un ama de casa que compra en un mercadillo por 30 euros un bolso que parece de Chanel? ¿Y a una chica que adquiere en un bazar "unas gafas de sol Ray-Ban" por 42 euros? ¿Cómo demostrar que eran conscientes de comprar cosas pirateadas y de ser cómplices de ese mercado ilegal? Habrá consumidores que compren productos falsos a sabiendas. Pero muchos otros piensan que han encontrado un chollo que estaba en promoción, y algunos son víctimas de una estafa pura y dura. De ahí que apenas se tengan noticias -en EKA/ACUV no conocemos ninguna- sobre denuncias, juicios y condenas a consumidores por comprar productos falsos. Cuando se hace una redada en el top manta o en un almacén con productos falsos, quienes tratan de escapar son los vendedores; a los compradores no los detiene la Policía ni los acusa de nada. Esa es la realidad, que no obsta para que, consciente o inconscientemente, los compradores de productos falsos contribuyan a sostener ese mercado y sus consecuencias. Rolex Encyclopedia Guido Mondani Editore e Ass

Along with plan and elevation, section is one of the essential representational techniques of architectural design; among architects and educators, debates about a project's section are common and often intense. Until now, however, there has been no framework to describe or evaluate it. Manual of Section fills this void. Paul Lewis, Marc Tsurumaki, and David J. Lewis have developed seven categories of section, revealed in structures ranging from simple

one-story buildings to complex structures featuring stacked forms, fantastical shapes, internal holes, inclines, sheared planes, nested forms, or combinations thereof. To illustrate these categories, the authors construct sixty-three intricately detailed cross-section perspective drawings of built projects—many of the most significant structures in international architecture from the last one hundred years—based on extensive archival research. Manual of Section also includes smart and accessible essays on the history and uses of section.
