REFERENCE NUMBER APPEARANCE AND LOCATION. A Rolex reference number is as unique as the fingerprints of its owner. Every Rolex has a different reference number that is located between the lugs of the watch at the 12 o'clock position. Many counterfeit watches have a completely fictitious reference number and some may not even have one.

[The No.1 Vintage Rolex Buyer's Guide by Philipp Stahl](#)

The Submariner's rotatable bezel is a key functionality of the watch. Its engraved 60-minute graduations allow a diver to accurately and safely monitor diving time and decompression stops. Manufactured by Rolex from a hard, corrosion-resistant ceramic, the Cerachrom bezel insert is virtually scratchproof.

So below the reference number is 6538 for Rolex Submariner Big Crown produced between 1956-1959, then below you see I.56, which means it left production at first quarter 1956 and all the way down you see a stamp that has shortly been used around 1956, the 18 which stands for the (high) quality of steel that has been used.

Model or reference numbers within a particular series of watch (Submariners, say) tend to follow an evolutionary scheme (to wit: the modern Rolex GMT Master II with Pepsi bezel is the

126710BLRO, which sounds like a mouthful — but when you realize that the ref. 16710 was the last generation of the "Pepsi" bezel-quipped GMT Master II that Rolex produced before the current one came out, you can see how one reference number evolved into the next one).

[The Ultimate Guide To The Rolex Submariner | FashionBeans](#)

There is ongoing discussion on which Submariner reference came first, the 6200 or 6204. With a different 369 Explorer dial and different movement, the 6200 surely is the odd one compared to the 6204/6205. But, as you will find out more when dealing with Rolex history, conclusive evidence from Rolex HQ in Geneva is hard to find.
