Read Jeff Carlson's blogs and other content on the Penguin Community. View our feature on Jeff Carlson's Plague Year. The nanotechnology was designed to fight cancer. Instead, it evolved into the Machine Plague, killing nearly five billion people and changing life on Earth forever. The nanotech has one weakness: it self-destructs at altitudes above ten thousand feet. Those few who've managed to escape the plague struggle to stay alive on the highest mountains, but time is running out—there is famine and war, and the environment is crashing worldwide. Humanity's last hope lies with a top nanotech researcher aboard the International Space Station—and with a small group of survivors in California who risk a daring journey below the death line...

When a disabled spaceship enters Earth's atmosphere, seven members of the advanced Tosok race are welcomed by the world. Then a popular scientist is murdered, and all evidence points to one of the Tosoks. Now, an alien is tried in a court of law—and there may be far more at stake than accounting for one human life.

Illegal Alien Macmillan

Exploring morals and ethics on both human and cosmic scales, Rollback is a new SF novel by Hugo and Nebula Award-winner Robert J. Sawyer. Dr. Sarah Halifax decoded the first-ever radio transmission received from aliens. Thirty-eight years later, a second message is received and Sarah, now 87, may hold the key to deciphering this one, too . . . if she lives long enough. A wealthy industrialist offers to pay for Sarah to have a rollback—a hugely expensive experimental rejuvenation procedure. She accepts on condition that Don, her husband of sixty years, gets a rollback, too. The process works for Don, making him physically twenty-five again. But in a tragic twist, the rollback fails for Sarah, leaving her in her eighties. While Don tries to deal with his newfound youth and the suddenly vast age gap between him and his wife, Sarah struggles to do again what she'd done once before: figure out what a signal from the stars contains. The Fall of Koli Macmillan

In *Hominids*, Nebula Award-winning author Robert J. Sawyer introduced a character readers will never forget: Ponter Boddit, a Neanderthal physicist from a parallel Earth who was whisked from his reality into ours by a quantum-computing experiment gone awry—making him the ultimate stranger in a strange land. In that book and in its sequel, *Humans*, Sawyer showed us the Neanderthal version of Earth in loving detail—a tour de force of world-building; a masterpiece of alternate history. Now, in *Hybrids*, Ponter Boddit and his Homo sapien lover, geneticist Mary Vaughan, are torn between two worlds, struggling to find a way to make their star-crossed relationship work. Aided by banned Neanderthal technology, they plan to conceive the first hybrid child, a symbol of hope for the joining of their two versions of reality. But after an experiment shows that Mary's religious faith—something completely absent in Neanderthals—is a quirk of the neurological wiring of Homo sapiens' brains, Ponter and Mary must decide whether their child should be predisposed to atheism or belief. Meanwhile, as Mary's Earth is dealing with a collapse of its planetary magnetic field, her boss, the enigmatic Jock Krieger, has turned envious eyes on the unspoiled Eden that is the Neanderthal world . . . *Hybrids* is filled to bursting with Sawyer's signature speculations about alternative ways of being human, exploding our preconceptions of morality and gender, of faith and love. His Neanderthal Parallax trilogy is a classic in the making, and here he brings it to a stunning, thought-provoking conclusion that's sure to make *Hybrids* one of the most controversial

books of the year. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Rollback Macmillan

Jeff Winston, forty-three, didn't know he was a replayer until he died and woke up twenty-five years younger in his college dorm room; he lived another life. And died again. And lived again and died again -- in a continuous twenty-five-year cycle -- each time starting from scratch at the age of eighteen to reclaim lost loves, remedy past mistakes, or make a fortune in the stock market. A novel of gripping adventure, romance, and fascinating speculation on the nature of time, *Replay* asks the question: "What if you could live your life over again?"

The name 's Lomax—Alex Lomax. I 'm the one and only private eye working the mean streets of New Klondike, the Martian frontier town that sprang up forty years ago after Simon Weingarten and Denny O ' Reilly discovered fossils on the Red Planet. Back on Earth, where anything can be synthesized, the remains of alien life are the most valuable of all collectibles, so shiploads of desperate treasure hunters stampeded here in the Great Martian Fossil Rush. I 'm trying to make an honest buck in a dishonest world, tracking down killers and kidnappers among the failed prospectors, the corrupt cops, and a growing population of transfers—lucky stiff who, after striking paleontological gold, upload their minds into immortal android bodies. But when I uncover clues to solving the decades-old murders of Weingarten and O ' Reilly, along with a journal that may lead to their legendary mother lode of Martian fossils, God only knows what I 'll dig up...

To Say Nothing of the Dog Pan Macmillan

Over its life the Review printed seminal writing on free market and conservative topics by remarkably mature students and by Russell Kirk, Ludwig von Mises, George Stigler, Benjamin Rogge, and other already established men. What characterized the Review writers was their rigor of thought and concern for principles, features that coexist naturally. —Chronicles Initially sponsored by the University of Chicago Chapter of the Intercollegiate Society of Individualists, the New Individualist Review was more than the usual "campus magazine." It declared itself "founded in a commitment to human liberty." Between 1961 and 1968, seventeen issues were published which attracted a national audience of readers. Its contributors spanned the libertarian-conservative spectrum, from F. A. Hayek and Ludwig von Mises to Richard M. Weaver and William F. Buckley, Jr. In his introduction to this reprint edition, Milton Friedman—one of the magazine's faculty advisors—writes that the Review set "an intellectual standard that has not yet, I believe, been matched by any of the more recent publications in the same philosophical tradition.

With such compelling and provocative novels as *Red Planet Blues*, *FlashForward* and *The WWW Trilogy*, Robert J. Sawyer has proven himself to be “a writer of boundless confidence and bold scientific extrapolation” (*New York Times*). Now, the Hugo and Nebula Award-winning author explores the thin line between good and evil that every human being is capable of crossing... Experimental psychologist Jim Marchuk has developed a flawless technique for identifying the previously undetected psychopaths lurking everywhere in society. But while being cross-examined about his breakthrough in court, Jim is shocked to discover that he has lost his memories of six months of his life from twenty years previously—a dark time during which he himself committed heinous acts. Jim is reunited with Kayla Huron, his forgotten girlfriend from his lost period and now a quantum physicist who has made a stunning discovery about the nature of human consciousness. As a rising tide of violence and hate sweeps across the globe, the psychologist and the physicist combine forces in a race against time to see if they can do

the impossible—change human nature—before the entire world descends into darkness.

Factoring Humanity Macmillan

A scientist in Berkeley, California discovers that a series of murders is the work of an insurance company. After collecting information on the genes of policy holders, the company analyzed them to see which ones were a bad risk and proceeded to kill them. By the author of *The Terminal Experiment*.

Before I Wake Del Rey

Finalist for the Hugo Award • “Ofelia—tough, kind, wise and unwise, fond of food, tired of foolish people—is one of the most probable heroines science fiction has ever known.” —Ursula K. Le Guin For forty years, Colony 3245.12 has been Ofelia’s home. On this planet far away in space and time from the world of her youth, she has lived and loved, weathered the death of her husband, raised her one surviving child, lovingly tended her garden, and grown placidly old. And it is here that she fully expects to finish out her days—until the shifting corporate fortunes of the Sims Bancorp Company dictates that Colony 3245.12 is to be disbanded, its residents shipped off, deep in cryo-sleep, to somewhere new and strange and not of their choosing. But while her fellow colonists grudgingly anticipate a difficult readjustment on some distant world, Ofelia savors the promise of a golden opportunity. Not starting over in the hurly-burly of a new community . . . but closing out her life in blissful solitude, in the place she has no intention of leaving. A population of one. With everything she needs to sustain her, and her independent spirit to buoy her, Ofelia actually does start life over—for the first time on her own terms: free of the demands, the judgments, and the petty tyrannies of others. But when a reconnaissance ship returns to her idyllic domain, and its crew is mysteriously slaughtered, Ofelia realizes she is not the sole inhabitant of her paradise after all. And, when the inevitable time of first contact finally arrives, she will find her life changed yet again—in ways she could never have imagined. . . . “Pure satisfaction from cover to cover.” —Anne McCaffrey
