This unique workbook was written for the undergraduate Personality course where professors are looking for activities to help students learn and apply personality theories to real-life examples. The workbook is geared toward personality courses that are theories-based, as opposed to research-based. Because the cases explored are those based on normal behavior (as opposed to abnormal behavior), this workbook is especially useful. While most personality texts present the major concepts of personality theories, they don't help students apply the theories they have learned or to use the theories to understand other examples on their own. This workbook will help students do just that and is the perfect complement to any Personality text.
