were categorized hierarchically. However, post-Cartesian readings of Shakespeare and other Renaissance literature have misunderstood Renaissance hierarchical creaturely relations, including human relations. Using critical animal studies work and new materialist theory, Bach	argues that attending closely to creatures and objects in texts by Shakespeare and other writers exposes this unequal world and the use and abuse of creatures, including people. The book also adds significantl y to animal studies by showing how central bird sociality and voices were to Renaissance	human culture, with many believing that birds were superior to some humans in song, caregiving, and companionship. Bach shows how Descartes, a central figure in the transition to modern ideas about creatures, lived isolated from humans and other creatures and denied ancient

knowledge about other creatures' minds, especially bird minds. As significant, Bach shows how and why Descartes' ideas appealed to human grandiosity. Asking how Renaissance categorizations of creatures differ so much from modern classifications, and why those modern classifications have	shaped so much animal studies work, this book offers significant new readings of Shakespeare's and other Renaissance texts. It will contribute to a range of fields, including Renaissance literature, history, animal studies, new materialism, and the environmental humanities.	<b>from Shakespeare</b> Longman "This collection of six short stories, based on Shakespeare's plays, is [an] introduction to one of the world's greatest writers. entailing the dynamic relation between the individual and the community on issues of authority, liberty, and cultural production. It investigates civic Shakespeare through Romeo and Juliet as a case study for an interrogation of the limits and possibilities of theatre and the idea of the civic. The play's focus on civil strife, political challenge, and the rise of a new conception of the individual within society makes it an ideal site to examine how early modern civic topics were received and reconfigured on stage, and how the play has triggered ever new interpretations and civic performances over time. The essays focus on the way the play reflects civic life through the dramatization of issues of crisis and reconciliation when private and public spaces are brought to conflict, but also concentrate on the way the play has subsequently entered the public space of civic life. Set within the fertile context of performance studies and inspired by philosophical and sociological approaches, this book helps clarify the role of theatre within civic space while questioning the relation between citizens as spectators and the community. The wide-ranging chapters cover problems of civil interaction and their onstage
