Digital Literary Studies presents a broad and varied picture of the promise and potential of methods and approaches that are crucially dependent upon the digital nature of the literary texts it studies and the texts and collections of texts with which they are compared. It focuses on style, diction, characterization, and interpretation of single works and across larger groups of texts, using both huge natural language corpora and smaller, more specialized collections of texts created for specific tasks, and applies statistical techniques used in the narrower confines of authorship attribution to broader stylistic questions. It addresses important issues in each of the three major literary genres, and

intentionally applies different techniques and concepts to poetry, prose, and drama. It aims to present a provocative and suggestive sample intended to encourage the application of these and other methods to literary studies. Hoover, Culpeper, and O' Halloran push the methods, techniques, and concepts in new directions, apply them to new groups of texts or to new questions, modify their nature or method of application, and combine them in innovative ways.

This book offers a systematic introduction to the linguistic analysis of newspaper reports on crime. The author demonstrates how the linguistic analysis of newspaper texts helps to gain insight into the construction of offenders and victims in those texts and links the findings to criminological frameworks. Tabbert employs Critical Stylistics to explore the description of participants, the presentation of speech as well as actions, states or events, and other linguistic devices employed by journalists to present a particular image of an offender or a victim in the press. This book shows the fruitfulness of an interdisciplinary approach to reveal predominant discourse on crime in society and will be of great interest to researchers in linguistics, criminology and media studies.

assigned through linguistic means. The introductory chapter discusses and evaluates different theoretical approaches to the question, and the eight articles by leading scholars in the field offer a multiplicity of methodological and theoretical approaches to the description and interpretation of social roles as expressed in a variety of texts from the eighteenth and nineteenth centuries. While the specific period covered is Late Modern English, the theoretical insights offered will be of interest to any linguist interested in sociolinguistics, pragmatics and the history of English, as well as scholars in the social sciences and social history interested in the concept and realisation of roles.

The book, Teaching ELLs Across Content Areas: Issues and Strategies, is a unique, useful text written for K – 12 teachers. This book is the culmination of the professional knowledge, expertise, and experience from the distinguished authors who represent the entire range of the content areas, including: language arts, science, mathematics, technology, arts, psychology, and Hispanic studies. The ELL school population has reached 5.3 million with the increase rate of 51 percent from School Year 1998-1999 to 2008-2009 (NCELA, 2012). By 2025, one out of

---

four K-12 students will be ELLs (NEA Policy Brief, 2013). The NEA data states that the ELLs are the fastest-growing student population group in our schools and providing them with high-quality services and programs is an important investment in America's future (NEA Policy Brief, 2013). With the fast growth of the ELLs in schools, basic information and strategies are needed by all K-12 teachers. This book provides useful information and strategies for all K-12 teachers in content classrooms. This book has three significances. First, the book provides the most needed information for K-12 teachers with issues and strategies that are important in content areas to help ELLs' success. With the fast growth of the ELLs in schools, K-12 teachers need this information in content classrooms. Second, the book fills the gap related to teaching ELLs in content areas. There are some existing books with titles on teaching ELLs across content areas; yet, these books provide general information with fewer books that really address specific content topics. This book is unique because it has the dedicated chapters for specific content areas, e.g., Language Arts, Science, Math, Social Studies with issues and strategies in these respective contents as well as general information, e.g., L2 theories for teachers to know and work with ELLs. Third, the book is reader-friendly with carefully crafted chapters. Each chapter begins with a scenario to catch the reader's attention, is followed by issues and strategies, and ends with a summary. A scenario begins with each chapter for teachers to get to know the ELLs with the content that focuses on the related information and teaching strategies. With the continued increase in the ELL school population, this book is intended helping all K-12 teachers in

content areas have knowledge and strategies to better serve their ELLs.

York Notes for AQA GCSE (9-1) Rapid Revision: Romeo and Juliet - Refresh, Revise and Catch Up! Corwin Press

This book explores how humans in the Renaissance lived with, attended to, and considered the minds, feelings, and sociality of other creatures. It examines how Renaissance literature and natural history display an unequal creaturely world: all creatures were categorized hierarchically. However, post-Cartesian readings of Shakespeare and other Renaissance literature have misunderstood Renaissance hierarchical creaturely relations, including human relations. Using critical animal studies work and new materialist theory, Bach argues that attending closely to creatures and objects in texts by Shakespeare and other writers exposes this unequal world and the use and abuse of creatures, including people. The book also adds significantly to animal studies by showing how central bird sociality and voices were to Renaissance human culture, with many believing that birds were superior to some humans in song, caregiving, and companionship. Bach shows how Descartes, a central figure in the transition to modern ideas about creatures, lived isolated from humans and other creatures and denied ancient

---

knowledge about other creatures' minds, especially bird minds. As significantly, Bach shows how and why Descartes' ideas appealed to human grandiosity. Asking how Renaissance categorizations of creatures differ so much from modern classifications, and why those modern classifications have shaped so much animal studies work, this book offers significant new readings of Shakespeare's and other Renaissance texts. It will contribute to a range of fields, including Renaissance literature, history, animal studies, new materialism, and the environmental humanities.
