1) Introduction Root Cause Analysis (RCA) is a method that is used to address a problem or non-conformance, in order to get to the " root cause " of the problem. It is used so we can correct or eliminate the cause, and prevent the problem from recurring. It is not " rocket science " — anyone can do it.

A Root Cause Analysis (RCA) is the process of finding the source of failures and accomplishments after completing a project. While RCAs are common after incidents, they do not only fit into this model of incident management. An RCA can be done after any project; whether it was technical or non-technical.
