One of the most distinguished ?mmakers working today, David Lynch is a

director whose vision of cinema is firmly rooted in the art. He was motivated to make his first film as a student because he wanted a painting that “would really be able to move.” Most existing studies of Lynch, however, fail to engage fully with the complexities of his films’ relationship to other art forms. *The Film Paintings of David Lynch* fills this void, arguing that Lynch’s cinematic output needs to be considered within a broad range of cultural references. Aimed at both Lynch fans and film studies specialists, Allister MacTaggart addresses Lynch’s films from the perspective of the relationship between commercial film, avant-garde art, and cultural theory. Individual Lynch works – *The Elephant Man*, *Blue Velvet*, *Twin Peaks*, *Lost Highway*, *The Straight Story*, *Mulholland Drive*, *Inland Empire* – are discussed in relation to other films and directors, illustrating that the solitary, or seemingly isolated, experience of film is itself socially, culturally, and politically important. *The Film Paintings of David Lynch* offers a unique perspective on an influential director, weaving together a range of theoretical approaches to Lynch’s films to make exciting new connections among film theory, art history, psychoanalysis and cinema.

Notoriously reticent about his early years, violinist Jascha Heifetz famously reduced the story of his childhood to "Born in Russia. First lessons at 3. Debut in Russia at 7. Debut in Carnegie Hall at 17. That's all there is to say." Tracing his little-known upbringing, *Jascha Heifetz: Early Years in Russia* uncovers the events and experiences that shaped one of the modern era's most unique talents and enigmatic personalities. Using previously unstudied archival materials and interviews with family and friends, this biography explores Heifetz's meteoric rise in the Russian music world—from his first violin lessons with his father, to his studies at the St. Petersburg Conservatory with the well-known pedagogue Leopold Auer, to his tours throughout Russia and Europe. Spotlighting Auer's close-knit circle of musicians, Galina Kopytova underscores the lives of artists in Russia's "Silver Age"—an explosion of artistic activity amid the rapid social and political changes of the early 20th century.

Since its inception, cinema has evolved into not merely a 'reflection' but an indispensable index of human experience – especially our experience of time's passage, of the present moment, and, most importantly perhaps, of the past, in both collective and individual terms. In this volume, Kilbourn provides a comparative theorization of the representation of memory in both mainstream Hollywood and international art cinema within an increasingly transnational context of production and reception. Focusing on European, North and South American, and Asian films, Kilbourn reads cinema as providing the viewer with not only the content and form of memory, but also with its own directions for use: the required codes and conventions for understanding and implementing this crucial prosthetic technology — an art of memory for the twentieth-century and beyond.

"It has long been suggested that films have changed the way we listen, but cinema's contribution to broader listening cultures has only recently started to receive serious academic attention. Taking this issue as its central topic, *The Oxford Handbook of Cinematic Listening* explores—from philosophical,

archival, empirical, and analytical perspectives—the genealogies of cinema's audiovisual practices, the relationship between film aesthetics and listening protocols, and the extension of cinematic modes of listening into other media and everyday situations. Featuring scholars from musicology, film studies and literary studies, ethnomusicology and sound studies, media and communications and psychology, this Handbook aims to foster new ways of thinking about the intersection between the history of listening and the history of the moving image. It offers a wealth of original case studies and novel perspectives that show how cinematic listening is constantly being redefined in relation to shifting historical, spatial, textual and theoretical frameworks"--

Imagine sending a magazine article to 10 friends-making photocopies, putting them in envelopes, adding postage, and mailing them. Now consider how much easier it is to send that article to those 10 friends as an attachment to e-mail. Or to post the article on your own site on the World Wide Web. The ease of modifying or copying digitized material and the proliferation of computer networking have raised fundamental questions about copyright and patent--intellectual property protections rooted in the U.S. Constitution. Hailed for quick and convenient access to a world of material, the Internet also poses serious economic issues for those who create and market that material. If people can so easily send music on the Internet for free, for example, who will pay for music? This book presents the multiple facets of digitized intellectual property, defining terms, identifying key issues, and exploring alternatives. It follows the complex threads of law, business, incentives to creators, the American tradition of access to information, the international context, and the nature of human behavior. Technology is explored for its ability to transfer content
