A major new history of the race between two geniuses to decipher ancient Egyptian hieroglyphs, set against the backdrop of nineteenth-century Europe In 1799, a French Army officer was rebuilding the defenses of a fort on the banks of the Nile when he discovered an ancient stele fragment bearing a decree inscribed in three different scripts. So begins one of the most familiar tales in

Egyptology—that of the Rosetta Stone and the decipherment of Egyptian hieroglyphs. This book draws on fresh archival evidence to provide a major new account of how the English polymath Thomas Young and the French philologist Jean-Fran ç ois Champollion vied to be the first to solve the riddle of the Rosetta. Jed Buchwald and Diane Greco Josefowicz bring to life a bygone age of intellectual adventure. Much more than a decoding exercise centered on a single

artifact, the race to decipher the Rosetta Stone reflected broader disputes about language, historical evidence, biblical truth, and the value of classical learning. Buchwald and Josefowicz paint compelling portraits of Young and Champollion, two gifted intellects with altogether different motivations. Young disdained Egyptian culture and saw Egyptian writing as a means to greater knowledge about Greco-Roman antiquity. Champollion, swept up in the political chaos of Restoration France and fiercely opposed to the scholars aligned with throne and altar, admired ancient Egypt and was prepared to upend conventional wisdom to solve the mystery of the hieroglyphs. Taking readers from the hushed lecture rooms of the Institut de France to the windswept monuments of the Valley of the Kings, *The Riddle of the Rosetta* reveals the untold story behind one of the nineteenth century's most thrilling discoveries.

Uncovering the Logic of English: A Common-Sense Solution to America's Literacy Crisis John Wiley & Sons

The Rosetta Stone remains one of the world's most recognizable ancient artifacts, and has come to symbolize not only Egypt, but also the art of translation. Dating from the Macedonian Ptolemaic era in Egypt (ca 196 BC), the Rosetta Stone contains a royal decree by King

Ptolemy V, set out in three languages: in hieroglyphic (suitable for a priestly decree), demotic (the native script used for daily purposes), and Greek (the language of the administration). By the fourth century AD, all knowledge and understanding of hieroglyphs had been lost by the mixed-race population, and it was only some 1400 years later, after the discovery of the Rosetta Stone, that scholars were able to use the Greek inscription on the stone as the deciphering key. Thomas Young, an English physicist, was the first to show that some of the hieroglyphs on the Rosetta Stone wrote the sounds of a royal name, that of Ptolemy. The French scholar Jean-François Champollion then realized that hieroglyphs recorded the sound of the Egyptian language and laid the foundations of our knowledge of ancient Egyptian language and culture. In this work, EA Wallis Budge, perhaps the British Museum's most famous Egyptian section curator of all time, tells the story of the stone and exactly how it was eventually deciphered. Starting with the events surrounding the stone's discovery-by French forces under Napoleon Bonaparte-and its capture by the British army and its transportation to London, Budge then discusses the slow process through which the hieroglyphic part of the stone was eventually deciphered. The majority of the booklet is given over to a graphic explanation of the logical process used to translate the Rosetta Stone,

and how, by cross-referencing it with the Coptic language and by using other clues the mystery of the ancient Egyptian's written language was eventually unlocked. Finally, Budge provides a fascinating transcript of what the Rosetta Stone actually says. What Rosetta Stone Arabic Won't Tell You - Learn That Language Now CreateSpace This volume presents the Rosetta Stone, an Ancient Egyptian artifact which was instrumental in advancing modern understanding of Egyptian hieroglyphic writing. The stone is a Ptolemaic era stele with carved text made up of three translations of a single passage -- two in Egyptian language scripts (hieroglyphic and Demotic) and one in classical Greek. It was created in 196 BC, discovered by the French in 1799 at Rosetta and contributed greatly to the deciphering of the principles of hieroglyph writing. The author tells of the discovery of the Stone,

and the story of how its mystery was solved. What Rosetta Stone Russian Won't Tell You - Learn That Language Now CreateSpace The fast-paced and “engrossing account” (The New York Times Book Review) of “one of the greatest breakthroughs in archaeological history” (The Christian Science Monitor): two rival geniuses in a race to decode the writing on one of the world’s most famous documents—the Rosetta Stone. The Rosetta Stone is one of the most famous objects in the world, attracting millions of visitors to the British museum every year, and yet most people don’t really know what it is. Discovered in a pile of rubble in 1799, this slab of stone proved to be the key to unlocking a lost language that baffled scholars for centuries. Carved in ancient Egypt, the Rosetta Stone carried the

same message in different languages—in Greek using Greek letters, and in Egyptian using picture-writing called hieroglyphs. Until its discovery, no one in the world knew how to read the hieroglyphs that covered every temple and text and statue in Egypt.

Dominating the world for thirty centuries, ancient Egypt was the mightiest empire the world had ever known, yet everything about it—the pyramids, mummies, the Sphinx—was shrouded in mystery. Whoever was able to decipher the Rosetta Stone would solve that mystery and fling open a door that had been locked for two thousand years. Two brilliant rivals set out to win that prize. One was English, the other French, at a time when England and France were enemies and the world's two great superpowers. Written “like a thriller” (Star Tribune, Minneapolis), *The Writing of*

the Gods chronicles this high-stakes intellectual race in which the winner would win glory for both himself and his nation. A riveting portrait of empires both ancient and modern, this is an unparalleled look at the culture and history of ancient Egypt, “and also a lesson...in what the human mind does when faced with a puzzle” (The New Yorker).
