The Muncie 4-speeds, M20, M21, and M22 are some of the most popular manual transmissions ever made and continue to be incredibly popular. The Muncie was the top high-performance manual transmission GM offered in its muscle cars of the 60s and early 70s. It was installed in the Camaro, Chevelle, Buick GS, Pontiac GTO, Olds Cutlass, and many other classic cars. Many

owners want to retain the original transmission in their classic cars to maintain its value. Transmission expert and veteran author Paul Cangialosi has created an indispensable reference to Muncie 4-speeds that guides you through each crucial stage of the rebuild process. Comprehensive ID information is provided, so you can positively identify the cases, shafts, and related parts. It discusses available models, parts options, and gearbox cases. Most important, it shows how to completely disassemble the gearbox, identify wear and damage, select the best parts, and complete the rebuild. It also explains how to choose the ideal gear ratio for a particular application. Various high-performance and racing setups are also shown, including essential modifications, gun drilling the shafts, cutting down the gears to remove weight, and achieving race-specific clearances. Muncie 4-speeds need rebuilding after many miles of service and extreme use. In addition, when a muscle car owner builds a high-performance engine that far exceeds stock horsepower, a stronger high-performance transmission must be built to accommodate this torque and horsepower

increase. No other book goes into this much detail on the identification of the Muncie 4-speed, available parts, selection of gear ratios, and the rebuild process.

The Americans With Disabilities Act Handbook provides comprehensive coverage of the ADA's employment, commercial facilities, and public accommodations provisions as well as coverage of the transportation, communication, and federal, local, and state government requirements. In one comprehensive two-volume set, you'll get a complete analysis of the Act and all the forms and case law you'll need to prepare your case. Recognized ADA authority Henry H. Perritt, Jr., clearly defines statutory and regulatory requirements for public and private employers, commercial facilities and places of public accommodation. analysis is provided for the numerous federal and state cases and significant regulatory activity by the EEOC cropping up each year. You'll also get thorough analysis of how the Rehabilitation Act of 1973 relates to ADA. The statutory definition of disability and the concept of being "otherwise qualified" for a job are also discussed in-depth. And you'll see exactly what employers, business owners, and providers of governmental services must do to make "reasonable accommodation." Plus, a comprehensive section that organizes case law by type of physical and mental impairment and accommodation by type of job requirement, making analysis easier. Americans With Disabilities Act Handbook has been updated to include: Analysis of a Supreme Court case finding that Wal-Mart class action did not meet requirements of Federal Rules of Civil Procedure 23 Case law applying the 2008 Amendments and EEOC's implementing regulations Analysis of Supreme Court case providing a framework for "cat's paw" proof of disparate treatment Analysis of a Supreme Court case finding retaliation because of a fiancée's protected activity Analysis of a Supreme Court case allowing oral requests for FMLA leave Analysis of cases assessing whether the employer erroneously perceived an employee as unable to perform a "range of jobs" Discussion of a case denying safe harbor to a recovering drug abuser Analysis of case allowing an employer to assign an HIV-positive employee to train only those employees signing a waiver Discussion of a case finding that a return-to-

The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the

Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria".
