The past decade has witnessed an explosion of our knowledge on the structure, coding capacity and evolution of the genomes of the two DNA-containing cell organelles in plants: chloroplasts (plastids) and mitochondria. Comparative genomics analyses have provided new insights into the origin of organelles by endosymbioses and uncovered an enormous evolutionary dynamics of organellar genomes. In addition, they have greatly helped to clarify phylogenetic relationships, especially in algae and early land plants with limited morphological and anatomical diversity. This book, written by leading experts, summarizes our current knowledge about plastid and mitochondrial genomes in all major groups of algae and land plants. It also includes chapters on endosymbioses, plastid and mitochondrial mutants, gene expression profiling and methods for organelle transformation. The book is designed for students and researchers in plant molecular biology, taxonomy, biotechnology and evolutionary biology.

The Panel on Juvenile Crime: Prevention, Treatment, and Control convened a workshop on October 2, 1998, to explore issues related to educational performance, school climate, school practices, learning, student motivation and commitment to school, and their relationship to

delinquency. The workshop was designed to bring together researchers and practitioners with a broad range of perspectives on the relationship between such specific issues as school safety and academic achievement and the development of delinquent behavior. Education and Delinquency reviews recent research findings, identifies gaps in knowledge and promising areas of future research, and discusses the need for program evaluation and the integration of empirical research findings into program design.

The Temple of Glas takes the form of an elusive and suspenseful-but for that reason all the more sensational-dream vision that

demands close attention to detail and the dynamic way in which the meaning of events unfolds. Seducing readers with possibilities remains what the poem does best, and that special magnetism speaks not only to the provenance and textual history of Lydgate's text but also to its literary qualities.

The landmark National Survey of Child and Adolescent Well-Being (NSCAW) study represents the first effort to gather nationally representative data, based on first-hand reports, about the well-being of children and families who encounter the child welfare system. NSCAW's findings offer an unprecedented national source of data that describe the developmental status and functional characteristics of children who come to the attention of child protective services. Much more than a simple history of placements or length of stay in foster care, NSCAW data chart the trajectory of families across service pathways for a multi-dimensional view of their specific needs. The NSCAW survey is longitudinal, contains direct assessments and reports about each child from multiple sources, and is designed to address questions of relations among children's characteristics and experiences, their development, their pathways through the child welfare service system, their service needs, their service receipt, and,

ultimately, their well-being over time. The chapters in this rich synthesis of NSCAW data represent thoughtful and increasingly sophisticated approaches to the problems highlighted in the study and in child welfare research in general. The authors capitalize on the longitudinal, multidimensional data to capture the experiences of children and families from the time they are investigated by CPS through multiple follow-up points, and to consider the interdependent nature of the traditional child welfare outcomes of safety, permanence, and well-being. The topics covered not only are critical to child welfare practice and policy, but also are of compelling interest to other child service sectors such as health, mental health, education, and juvenile justice. The authors of chapters in this volume are esteemed researchers within psychology, social work, economics, and public health. Together they represent the future of child welfare research, showcasing the potential of NSCAW as a valuable resource to the research community and providing glimpses of how the data can be used to inform practice and policy.
