ISC Mathematics book 1 for Class- 11 Oswaal Books and Learning Private Limited According to the defined canons of art technique, a portrait should be, above all, a faithful representation of its model. However, this gallery of 1000 portraits illustrates how the genre has been

transformed throughout history, and has proven itself to be much more complex than a simple imitation of reality. Beyond exhibiting the skill of the artist, the portrait must surpass the task of imitation, as just and precise as it may be, to translate both the intention of the artist as well as that of its patron, without betraying either É s wishes. Therefore, these silent witnesses, carefully selected in these pages, reveal more than faces of historic figures or anonymous subjects: they reveal a psychology more than

an identity, illustrate an allegory, serve as political and religious propaganda, and embody the customs of their epochs. With its impressive number of masterpieces, biographies, and commentaries on works, this book presents and analyses different portraits, consequently exposing to the reader, and to any art lover, a reflection of the evolution of society, and above all the upheavals of a genre that, over 300 centuries of painting, has shaped the history of art.

1000 Portraits of Genius S.
Chand Publishing

The revised edition of the series Foundation Mathematics for Classes 6, 7 and 8 is based on the latest curriculum prepared and recommended by the Council for the Indian School Certificate Examinations, New Delhi. The present mathematics curriculum aims to develop a number of Mathematical Skills (like Numerical Calculation, Algebraic Manipulation, Spatial Visualisation, Data Analysis, Measurement, Estimation and Approximation) and Mathematical Processes (like Reasoning, Communication and Connections, Problem solving and Heuristics, Estimation,

Technology etc.) among students at these levels. This series has been developed and designed keeping in mind the following objectives of the latest curriculum : Students should :
• Enjoy learning of mathematics.
• Learn important mathematics that is much more than few formulas and mechanical procedures of solving problems.
• Pose and solve meaningful problems.
• See mathematics as something to talk about, to communicate, to discuss among themselves, to work together on.
• Understand the basic structure of mathematics : Arithmetic, algebra, geometry

and trigonometry, the basic content areas of school mathematics, all offer a methodology of abstraction, structuration and generalization
