The True Story of 28,800 Bath Toys Lost at Sea & of the Beachcombers, Oceanographers, Environmentalists & Fools Including the Author Who Went in Search of Them "O'Reilly Media, Inc."

Funny, thought-provoking, and incredibly disturbing, *Slow Death* by Rubber Duck reveals that just the living of daily life creates a chemical

soup inside each of us. Pollution is no longer just about belching smokestacks and ugly sewer pipes - now, it's personal. The most dangerous pollution has always come from commonplace items in our homes and workplaces. Smith and Lourie ingested and inhaled a host of things that surround all of us all the time. This book exposes the extent to which we are poisoned every day of our lives. For this book, over the period of a week - the kind of week that would be familiar to most people - the authors use their own bodies as the reference point and tell the story of pollution in our modern world, the miscreant corporate giants who manufacture the toxins, the weak-kneed government officials who let it

happen, and the effects on people and families across the globe. Parents and concerned citizens will have to read this book. Key concerns raised in *Slow Death by Rubber Duck*:

- Flame-retardant chemicals from electronics and household dust polluting our blood.
- Toxins in our urine caused by leaching from plastics and run-of-the-mill shampoos, toothpastes and deodorant.
- Mercury in our blood from eating tuna.
- The chemicals that build up in our body when carpets and upholstery off-gas.

Ultimately hopeful, the book empowers readers with some simple ideas for protecting themselves and their families, and changing things for the better.

This work presents a model for novel compound interpretation using Cognitive Grammar and schema theory. The model, based on analysis of established compounds and responses to novel compounds, claims that speakers try using real-world schemas attached to both element nouns to construct a relationship between them by matching already established patterns. When this is impossible, speakers often "metaphorize" the head noun.
