Some utopian plans have shaped our cities—from England 's New Towns and Garden Cities to the Haussmann plan for Paris and the L ' Enfant plan for Washington, DC. But these grand plans are the exception, and seldom turn out as envisioned by the utopian planner. Inviting city neighborhoods are more often works of improvisation on a small scale. This type of bottom-up development gives cities both their character and the ability to respond to sudden change. Hank Dittmar, urban planner, friend of artists and creatives, sometime rancher, "high priest of town planning" to the Prince of Wales, believed in letting small things happen. Dittmar concluded that big plans were often the problem. Looking at the global cities of the world, he saw a crisis of success, with gentrification and global capital driving up home prices in some cities, while others decayed for lack of investment. In DIY City, Dittmar explains why individual initiative, small-scale business, and small development matter, using lively stories from his own experience and examples from recent history, such as the revival of Camden Lock in London and the nascent rebirth of Detroit. DIY City, Dittmar 's last original work, captures the lessons he learned throughout the course of his varied career—from transit-oriented development to Lean Urbanism—that can be replicated to create cities where people can flourish. DIY City is a timely response to the challenges many cities face today, with a short supply of affordable housing, continued gentrification, and offshore investment. Dittmar 's answer to this crisis is to make Do-It-Yourself the norm rather than the exception by removing the barriers to small-scale building and local business. The message of DIY City can offer hope to anyone who cares about cities.

A true story of love and survival, this book profiles the lives of a couple who unwittingly become involved in a most unusual experience. Life was idyllic on the island paradise known as Roatan, located some 35 miles off the North Coast of Honduras, in the Western Caribbean Sea. Two unsuspecting people are hoodwinked into allowing a rascal cat into their lives and hearts where he soon becomes master of the house. A brainstorm of an idea brings four very young kittens, (otherwise condemned to certain death), onto the scene to complicate a once simple existence. Nature subsequently challenges the very lives of all the people on the island as Hurricane Mitch, a category 5 storm, hovers off shore for five days, with sustained winds of 140 miles per hour, creating thirty foot seas and torrential rains. It quickly became a life threatening situation. The "Storm of the Century" devastates the Bay Islands of Honduras and then crosses the entire Central American isthmus twice, leaving massive death and destruction behind before exiting through Guatemala and the Gulf of Mexico. The aftermath of this disaster is as frightening as the storm, but fate plays a friendly role in this frightening survival.

Collisions are expensive! Learning, understanding and remembering the International Regulations for Preventing Collisions at Sea (COLREGS) is essential for anyone venturing onto the water. Leisure boaters, as much as professional mariners, need to know the rules, and a firm understanding is required to pass many nautical exams. But with the COLREGS stretching to over 12,000 words, this is no small task. This is where Paul Boissier's excellent book comes in. Paul knows the COLREGS backwards having used them extensively in his career with the Royal Navy – from the bridges of submarines and warships which he has commanded, with each giving a rather different perspective on other shipping! He also

knows the other side well with his extensive cruising experience, from his early years with his father to now, sailing his own yacht. These experiences mean that he knows and understands the COLREGs from both sides and this gives him the ability to take you through the COLREGs from a mariners' and sailors' perspective. He brings the vital, but dry, document to life, going through it not in order, but by topics which are relevant to the mariner and sailor. Paul explains the intention of each rule and how it should be applied when at sea. He includes personal anecdotes (not all favourable to him!) which make everything real and tells us how he remembers different aspects of the Regulations through mnemonics and other devices. Finally, each chapter ends with a self-test to reinforce what has been learnt – other tests are also available online on the Fernhurst Books' website. This new edition has been updated with the 2016 changes to the CLOREGS. Whether you want to increase your confidence, pass an exam, require an on-board reference, or wish to improve your understanding of the nautical rules of the road, this is the ideal book for you.

Professional mariners, military and civilian, will find this book to be an invaluable reference in understanding the rules of the road and the role these rules play in managing the risk of collision. The author provides a thorough commentary on the rules and an analysis of collision cases involving abuse of the rules. Maritime attorneys and judges will find the book continues to be an indispensable reference on collision law as Craig Allen provides a mariner's insight into how the rules apply in context and their application by the courts and administrative tribunals. This new edition completely revises chapters on the rules pertaining to good seamanship and special circumstances and on restricted visibility, and it vastly expands coverage of the narrow channel rule, traffic separation schemes, and the application of the rules to high-speed craft. It also extensively revises materials on the look out and risk of collision responsibilities to update coverage on radar and ARPA and to address new technologies, such as integrated bridge systems, automatic identification systems, voyage data recorders and the increasingly active role of VTS. The first update in ten years, the eighth edition upholds and even surpasses the standards set over the past sixty years of the guide's publication.
