Since the 1950s, Latina activist Dolores Huerta has been a fervent leader and organizer in the struggle for farmworkers’ rights within the Latina/o community. A cofounder of the United Farm Workers union in the 1960s alongside C é sar Ch á vez, Huerta was a union vice president for nearly four decades before starting her own foundation in the early 2000s. She continues to act as a dynamic speaker, passionate lobbyist, and dedicated figure for social and political change, but her crucial contributions and commanding presence have often been overshadowed by those of Ch á vez and other leaders in the Chicana/o movement. In this new study, Stacey K. Sowards closely examines Huerta’s rhetorical skills both in and out of the public eye and defines Huerta’s vital place within Chicana/o history. Referencing the theoretical works of Pierre Bourdieu, Chela Sandoval, Gloria Anzald ú a, and others, Sowards closely analyzes Huerta’s speeches, letters, and interviews. She shows how Huerta navigates the complex intersections of race, ethnicity, gender, language, and class through the myriad challenges faced by women activists of color. Sowards’s approach to studying Huerta’s rhetorical influence offers a unique perspective for understanding the transformative relationship between agency and social justice.

“ This remarkable book is a testament to teachers who not only respect and advocate for children on a daily basis but who are the necessary guardians of the spirit. Every citizen who cares about the future of our children ought to read this. ” —Eric Carle, author of *The Very Hungry Caterpillar* and other classic works for children “ Kozol’s love for his students is as joyful and genuine as his critiques of the system are severe. He doesn’t pull punches. ” —The Washington Post
In these affectionate letters to Francesca, a first grade teacher at an inner-city school in Boston, Jonathan Kozol vividly describes his repeated visits to her classroom while, under Francesca’s likably irreverent questioning, he also reveals his own most personal stories of the years that he has spent in public schools. *Letters to a Young Teacher* reignites a number of the controversial issues Jonathan has powerfully addressed in his bestselling *The Shame of the Nation* and *On Being a Teacher*: the mania of high-stakes testing that turns many classrooms into test-prep factories where spontaneity

and critical intelligence are no longer valued, the invasion of our public schools by predatory private corporations, and the inequalities of urban schools that are once again almost as segregated as they were a century ago. But most of all, these letters are rich with the happiness of teaching children, the curiosity and jubilant excitement children bring into the classroom at an early age, and their ability to overcome their insecurities when they are in the hands of an adoring and hard-working teacher.

Utilizing experiences and expertise from English educators, young adult literature authors, classroom teachers, and mental health professionals, this book considers how secondary English Language Arts can address school gun violence. Curated by field experts, contributions to this volume pay special attention to how a school’s culture and climate affect how teachers and students communicate around difficult topics that are embedded in the curriculum, but not directly addressed. As the first book that helps teachers and teacher educators to grapple with the topic of school violence specifically in the English education classroom, this book promotes young adult literature and writing activities that address timely and unfortunately recurring events.

This handbook brings together scholars from around the globe who here contribute to our understanding of how digital rhetoric is changing the landscape of writing. Increasingly, all of us must navigate networks of information, compose not just with computers but an array of mobile devices, increase our technological literacy, and understand the changing dynamics of authoring, writing, reading, and publishing in a world of rich and complex texts. Given such changes, and given the diverse ways in which younger generations of college students are writing, communicating, and designing texts in multimediated, electronic environments, we need to consider how the very act of writing itself is undergoing potentially fundamental changes.

These changes are being addressed increasingly by the emerging field of digital rhetoric, a field that attempts to understand the rhetorical possibilities and affordances of writing, broadly defined, in a wide array of digital environments. Of interest to both researchers and students, this volume provides insights about the fields of rhetoric, writing, composition, digital media, literature, and multimodal studies.

In a series of comparative essays on a range of texts embracing both high and popular culture from the early modern era to the contemporary period, *The Ideology of Genre* counters both formalists and advocates of the "death of genre," arguing instead for the inevitability of genre as discursive mediation. At the same time, Beebee demonstrates that genres are inherently unstable because they are produced intertextually, by a system of differences without positive terms. In short, genre is the way texts get used. To deny

that genres exist is to deny, in a sense, the possibility of reading; if genres exist, on the other hand, then they exist not as essences but as differences, and thus those places within and between texts where genres "collide" reveal the connections between generic status, interpretive strategy, ideology, and the use-value of language.

Arabic letters on papyrus challenge the modern reader. There are few to no diacritical dots to distinguish homographs, no systematic spacing between single words, and in the majority of cases a low degree of graphical structuring. However, contemporary readers usually read and understood these documents easily - probably because the recipient of a letter knew what to expect. The letters are formulaic, and their information packaging follows an algorithm typical for their time and content. Here formulaic letter writing means not only the reuse of the same formulae or topoi but expressing thoughts in a predictable linguistic way and order, both as a matter of readability and as one of adequacy and politeness. The main concern of this work is to discover these unwritten rules and norms behind Arabic letter writing on papyrus.

This is the second edition of a book originally published in 1997. Today the internet virtually consumes all of our lives (especially the lives of

writers). As both readers and writers, we are all aware of blogs, chat rooms, and preprint servers. There are now electronic-only journals and print-on-demand books, Open Access journals and joint research projects such as MathOverflow—not to mention a host of other new realities. It truly is a brave new world, one that can be overwhelming and confusing. The truly new feature of this second edition is an extensive discussion of technological developments. Similar to the first edition, Krantz's frank and straightforward approach makes this book particularly suitable as a textbook for an undergraduate course.
