This book is a study guide for any candidate preparing for the Java EE Web Component Developer exam (Oracle Exam 1Z0-899). It contains the theory behind how the Web container works, and important notes, hints and tips on the types of 'trick' questions to look for in the exam. By combining logical and easy-to-follow discussions with clear visual aids and diagrams, you will wonder by the end of the book why servlets, JSPs and tag libraries seemed so complicated before! By combining the theory taught in this book with practical experience, you will not only succeed in passing the exam, but will do so confident that you are able to solve problems and draw-up solutions 'on the job'. Reference Material Have you ever found that you couldn't quite remember the names of the XML elements or attributes in the Deployment Descriptor or Tag Library Descriptor? Or perhaps you've had problems recalling custom tag life cycles? Not a problem! Helpful visual diagrams show 'at a glance' the important schemas, without having to resort to knowing the XML Schema or DTD languages, as used in the specifications. Who

is this book suitable for? This guide assumes very basic prior knowledge of the Web container and the Extensible Mark-up Language (XML) core syntax. Servlets, JSPs and associated frameworks and Web application deployment are all presented beginning with the basic theory to ensure complete and thorough understanding. In addition, particular attention is devoted to the subjects of the Expression Language, custom tag libraries, annotations and asynchronous requests which are new or updated in the latest version of the exam. Key Features 1. Complete coverage of all objectives including annotations, modular deployment and AJAX support. 2. Authored by a Java developer who has helped thousands to pass the exam. 3. Theory introduced in an easy-to-follow, step-by-step manner. 4. Content split into manageable chapter sizes with clear objectives. 5. API details presented in condensed bulleted lists to make memorising easy. 6. Text reinforced with over 80 diagrams and figures to summarise key or difficult ideas. 7. 350 exam-style end of chapter questions with detailed answers. 8. One free online mock exam.

Best selling author Paul Sanghera offers cohesive, concise, yet comprehensive coverage of all the topics included in the Sun Certified Programmer for Java 5 exam (CX 310-055). With a laser sharp focus on the exam objectives, this study guide goes beyond just being an "exam cram."

The material is presented in a logical learning sequence: a section builds upon previous sections and a chapter on previous chapters. All concepts, simple and complex, are defined and explained when they appear the first time. There is no hopping from topic to topic and no technical jargon without explanation. No prior knowledge of Java programming is assumed. The single most difficult aspect of this exam is to read and understand the code in the exam questions in a limited amount of time. To help you get fluent and comfortable with the code, the book offers complete runnable code examples distributed over all the chapters and a codewalk quicklet feature at the end of each chapter. Although the primary purpose of the book is to help you pass the SCJP exam, it will also serve as a good reference after the exam.

Special features include: Hundreds of questions modeled after the real exam with fully explained answers. A complete practice exam with questions modeled after the real exam and fully explained answers. Hundreds of complete runnable code examples, explained in the book, that you can

download and experiment with. This is a code-intensive exam. The Codewalk Quicklet feature based on the process-based codewalk philosophy to prepare you for efficient response to the code-based questions in the exam. The Exam Quick Prep feature which recaps all the important points for the last hour of preparation before taking the exam. Useful information and analysis for the programmers who are considering updating the J2SE 1.4 certification to J2SE 5.
