Comprehensive Electrocardiology The Countryman Press

This Element infuses established scenario planning routines with an exploration of cognitive reasoning, by contextualising scenario thinking within the wider human endeavour of grappling with future uncertainties. A study of ancient civilisations shows that scenario thinking is not new, but has evolved significantly since ancient times. By de-coupling scenario thinking from scenario planning, it is elevated as the essential ingredient in managerial foresight projects. The historical theme continues, focussing on the evolution of modern scenario planning, by way of the French and Anglo-American schools of thought, using the intuitive logics methodology. Archival research has discovered early contributions in the UK around the development and use of scenario thinking in public policy, which has been overlooked in many received histories. Finally, the usefulness of scenario thinking for strategic management is challenged here and the argument that it is a heuristic device for overcoming cognitive biases and making better strategic decisions is refined.

Fishing from the Earliest Times Cambridge University Press

Seventy-nine Short Essays on Design brings together the best of designer Michael Bierut's critical writing—serious or humorous, flattering or biting, but always on the mark. Bierut is widely considered the finest observer on design writing today. Covering topics as diverse as Twyla Tharp and ITC Garamond, Bierut's intelligent and accessible texts pull design culture into crisp focus. He touches on classics, like Massimo Vignelli and the cover of *The Catcher in the Rye*, as well as newcomers, like McSweeney's Quarterly Concern and color-coded terrorism alert levels. Along the way Nabakov's *Pale Fire*; Eero Saarinen; the paper clip; Celebration, Florida; the planet Saturn; the ClearRx pill bottle; and paper architecture all fall under his pen. His experience as a design practitioner informs his writing and gives it truth. In *Seventy-nine Short Essays on Design*, designers and nondesigners alike can share and revel in his insights.

The Motor Chronicle Books

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

The previously untold story of the Zenith Trans-Oceanic, the world's most romantic and expensive series of portable radios. Long a companion of kings, presidents, transoceanic yachtsmen and world explorers, the Trans-Oceanic was also carried into battle by American troops in three wars. Its great popularity in spite of a very high price can be laid at the feet of several generations of armchair travelers who used the shortwave capabilities of the Trans-Oceanic as a window on the world. With access to the Zenith corporate archives and their long experience as radio enthusiasts and writers for both the popular and scholarly press, Professors Bryant and Cones present the engrossing stories of the development and use of the Trans-Oceanic throughout its forty year life. They present a wealth of never-before published photographs, documents and information concerning these fascinating radios, their collection, preservation and restoration.

TASER® Conducted Electrical Weapons are rapidly replacing the club for law-enforcement control of violent subjects within many countries around the globe. A TASER CEW is a hand-held device that delivers a 400-volt pulse with a duration tuned to control the skeletal muscles without affecting the heart at a distance of up to 6.5 meters over tiny wires. If necessary, it begins with an arcing voltage of 50,000 V to penetrate thick clothing; the 50,000 V is never delivered to the body itself. Due to the widespread usage of these devices and the widespread misconceptions surrounding their operation, this book will have significant utility. This volume is written for cardiologists, emergency physicians, pathologists, law enforcement management, corrections personnel, and attorneys.

Requirements for professional media editing have undergone enormous technological change. Editors still edit copy. But today they do much more. Mass media editors must demonstrate skills from computerized pagination to social media monitoring, from image manipulation to Search Engine Optimization. The need for editing skills is reaching far beyond traditional journalism and into all areas of mass media, from newspapers to strategic communication. Public relations practitioners are expected to edit. Even advertising creative professionals must edit. And journalists taking on new roles as social media editors need to understand editing at the speed of digital media. This textbook aims to prepare university-level students for these expanded editing roles in an age of convergence. Thirteen authors representing many years of collective media experience examine both traditional editing roles and new editing needs. While many mass media students will not become professional editors, this textbook assumes nearly all will need competent editing knowledge to produce products of professional quality. Editing, the authors believe, remains a bedrock skill for all students who hope to be successful in the mass media. Instructors considering this book for use in a course may request an examination copy here.
