Diver Stress and Rescue Instructor Manual,  
2nd Edition MedToGo, LLC

Textbook of Medical Virology presents a critical review of general principles in the field of medical virology. It discusses the description and molecular structures of virus. It addresses the morphology and classifications of viruses. It also demonstrates the principal aspects of virus particle structure. Some of the topics covered in the book are the symmetrical arrangements of viruses; introduction to different families of animal viruses; biochemistry of virus particles; the immunological properties and biological activities of viral gene products; description of enzymatic activities of viruses; and haemagglutination, cell fusion, and haemolysis of viruses. The description and

characteristics of viral antigens are covered.

The identification and propagation of viruses in tissue and cell cultures are discussed. An in-depth analysis of the principles of virus replication is provided. A study of the morphogenesis of virions is also presented. A chapter is devoted to virus-induced changes of cell structures and functions. The book can provide useful information to virologists, microbiologists, students, and researchers.

25 OFFBEAT CAREER OPTIONS Pynto  
'Technical Diving From The Bottom Up' is a guide to both 'would be' and experienced technical divers. Covering a range of topics, it is designed to guide the reader through the basics such as physiology and equipment configuration, before moving onto deep mixed gas decompression diving and the use of rebreathers.

Periscope Publishing Ltd.

Education enables every human to live their best life and to handle different situations that life may present to them. Every individual has the right to get educated. Every person has special skills and abilities. One only needs to identify and tap into that potential. Some gifted,

driven students plan and join courses of their choice. Most students are confused with the number of courses available to them. They are not confident if they are making the right choices or whether they will do well in the course they choose. This book is an attempt to highlight course options for those students who do not take the formal education route like graduation, post-graduation, doctoral programmes or correspondence or open university courses. Such students still have many options open to them. One may have a good voice, love for animals, passion for cooking, an eye to capture the beauty of nature, ability to dance, skills in music, etc. They can all get trained and take up lucrative careers of their choice based on their aptitude. Self-confidence, perseverance, grit, motivation to achieve, and passion are absolutely needed for a

---

student to be successful. Make your choices based on your aptitude and interest. Once you put in the effort from your side, success will follow.

Public Safety Diving Jones & Bartlett Publishers

This volume offers new insight into an important and largely under-examined area of marine leisure and tourism: scuba diving tourism. Knowledge of scuba diving has long been hidden among broad discussions of water-based sports and activities and this focused book aims to shed further understanding and knowledge on this popular international activity. The book examines the current issues central to research

into and management of scuba diving Tourism from multidisciplinary perspectives such as health and safety, climate change, policy and regulation and the recreation/leisure context. It further reveals critical management issues of economic, environmental and socio-cultural impacts related to scuba diving tourism which extends to the influence of climate change on the industry's operations and future. This significant volume which conceptualizes the issues surrounding scuba diving tourism now and in the future is written by leading experts in this field and will be valuable reading for all those interested in marine leisure and tourism.

### *Diver Stress and Rescue Manual* PennWell Books

Teaching how to deal with diving emergencies, this is the British Sub-Aqua Club's standard textbook for divers of all standards. It begins with dive planning and accident prevention, and goes on to explain first aid and the treatment of injuries from burns and broken bones to hypothermia, decompression sickness and shock. A separate section on marine life describes treatment for bites and stings. Major rescue techniques are explained in detail, from towing an unconscious diver in the water to assisted ascents, and from rescuing an injured diver

---

from the depths to landing him on boat or beach. The book also covers rescue management, including the use of rescue equipment and after-care.
