Industrial policy is a vital and important field that contributes to decisions about public policy and business and is directly responsible for promoting growth and increasing competitiveness in local and global economies. Examining the most significant industrial policy issues in Canada, *Industrial Organization in Canada* presents contributions from the top Canadian researchers in this field, who survey both new directions in the field and areas that have been neglected but remain important. Using state-of-the-art empirical techniques, contributors address the policy challenges raised by globalization, the internet and other technological advances, innovation, and the rise of security measures in response to the 9/11 terrorist attacks. Chapters are organized around five themes: recent developments and policy challenges, Canadian firms in the information age, research and development and innovation, regulation and industrial performance, and securing trade and investment opportunities. The only substantive research volume on this subject in two decades, *Industrial Organization in Canada* is a welcome resource for policy makers, researchers, and academics concerned with industrial policy issues in contemporary Canada.

INTERNATIONAL BESTSELLER "For anyone who wants to understand capitalism not as economists or politicians have pictured it but as it actually operates, this book will be invaluable."-Observer (UK) If you've wondered how we did not see the economic collapse coming, Ha-Joon Chang knows the answer: We didn't ask what they didn't tell us about capitalism. This is a lighthearted book with a serious purpose: to question the assumptions behind the dogma and sheer hype that the dominant school of neoliberal economists-the apostles of the freemarket-have spun since the Age of Reagan. Chang, the author of the international bestseller *Bad Samaritans*, is one of the world's most respected economists, a voice of sanity-and wit-in the tradition of John Kenneth Galbraith and Joseph Stiglitz. *23 Things They Don't Tell You About Capitalism* equips readers with an understanding of how global capitalism works-and doesn't. In his final chapter, "How to Rebuild the World," Chang offers a vision of how we can shape capitalism to humane ends, instead of becoming slaves of the market.

Dynamic technological developments in industrial production, the rise of new social movements in national politics, and great changes in the international political economy have left a deep imprint on the Federal Republic. A compelling explanation of West Germany's success in maintaining economic prosperity and political stability under such challenging conditions has continued to elude observers. Under the editorship of Peter J. Katzenstein, thirteen distinguished scholars from both sides of the Atlantic here provide an original interpretation of the political economy of the Bonn Republic during the forty years since its founding, and explore in particular its extraordinary capacity for accommodating change. Whereas studies in political economy have typically focused on one level of political action—either the shop floor, or national politics, or the international system—this innovative account analyzes the interaction of change at all three levels, bringing together case studies drawn from six manufacturing and service sectors.

The forces of globalization present challenges, risks, and opportunities to virtually every industry in every country. One of the most important implications of globalization is its effect on the economic competitiveness of countries and particular industries. The author explores how key elements of globalization have transformed national defense industries around the world, and how these changes will affect the U.S. defense industrial base in the coming years. He focuses on elements of globalization that are relevant especially to the defense industry: the globalization of capital (finance), production, trade, technology and labor, and the changes in global governance that structure the forces of globalization. He concludes by offering ten recommendations for policymakers who have the difficult task of maximizing U.S. economic competitiveness without compromising national security.
