Using state-of-the-art empirical techniques, contributors address the policy challenges raised by globalization, the internet and other technological advances, innovation, and the rise of security measures in

response to the 9/11 terrorist attacks. Chapters are organized around five themes: recent developments and policy challenges, Canadian firms in the information age, research and development and innovation, regulation and industrial performance, and securing trade and investment opportunities. The only substantive research volume on this subject in two decades, *Industrial Organization in Canada* is a welcome resource for policy makers, researchers, and academics concerned with industrial policy issues in contemporary Canada. Contributors include Ajay Agrawal (University of Toronto), Doug Allen (Simon Fraser University), Werner Antweiler (University of British Columbia), John Baldwin (Statistics Canada), Zhiqi Chen (Carleton University), Jean-Étienne de Bettignies (Queen's University), Marc Duhamel (Industry Canada), James Gaisford (University of Calgary), Avi Goldfarb (University of Toronto), Wulong Gu (Statistics Canada), Kathryn Harrison (University of British Columbia), Patrick Joly (Industry Canada), William Kerr (University of Saskatchewan), Kevin Koch (PricewaterhouseCoopers), Donald G. Dynamic technological developments in industrial production, the rise of new social movements in national politics, and great changes in the international political economy have left a deep imprint on the Federal

Republic. A compelling explanation of West Germany's success in maintaining economic prosperity and political stability under such challenging conditions has continued to elude observers. Under the editorship of Peter J. Katzenstein, thirteen distinguished scholars from both sides of the Atlantic here provide an original interpretation of the political economy of the Bonn Republic during the forty years since its founding, and explore in particular its extraordinary capacity for accommodating change. Whereas studies in political economy have typically focused on one level of political action—either the shop floor, or national politics, or the international system—this innovative account analyzes the interaction of change at all three levels, bringing together case studies drawn from six manufacturing and service sectors.

Launched in 1949 as the 92 before evolving into the 93, 96 2-stroke and 96V4, this car was in production for thirty-one years. Attracting global admiration and sales, it also excelled in motorsport and by the early 1960s was the most successful rally-car in Europe. A decline in sales in the 1960s was reversed with the launch of the 96V4 which resulted in its success continuing into the 1980s. With over 200 archive and colour photographs, this book provides a new description of the Saab company's original car and includes detailed biographies of important Saab figures and extensive discussion of the engineering and design decisions that made the car such a success. There is

coverage of the original Saab story in North and South America and a comprehensive review of Saab 92, 93, 96, motor sport history. Full technical details and specifications and tuning details are given and finally, there is a chapter on owners' experiences and Saab veteran's recollections.

With well over 25 years of experience, Sven Beiker is widely regarded as the mobility expert in Silicon Valley specializing in future trends for the automotive and mobility industries including autonomous driving, connectivity, electrification, and shared mobility. In *The Mobility Diaries: Connecting the Milestones of Innovation Leading to ACES*, he opens up his personal diary regarding his

take on 50 years of mobility innovation and history interwoven with his experiences from 1978 to 2018. From the Foreword by Reilly P. Brennan: "Understanding how transportation itself evolved requires a unique prism. The core components of vehicles today have stories and engineering journeys worth their own telling, and that is what is so exciting about the way we can learn about them in this text. Dr. Beiker's curriculum vitae, from BMW to Stanford University to McKinsey, are a compendium of experiences that created this unique historical and biographical book." "Sven and I are kindred spirits in the mobility world. His view on the evolution of mobility and technology illustrates why Detroit and Silicon Valley need one another."
