With well over 25 years of experience, Sven Beiker is widely regarded as the mobility expert in Silicon Valley specializing in future trends for the automotive and mobility industries including autonomous driving, connectivity, electrification, and shared mobility. In *The Mobility Diaries: Connecting the Milestones of Innovation Leading to ACES*, he opens up his personal diary regarding his take on 50 years of mobility innovation and history interwoven with his experiences from 1978 to 2018. From the Foreword by Reilly P. Brennan: "Understanding how transportation itself evolved requires a unique prism. The core components of vehicles today have stories and engineering journeys worth their own telling, and that is what is so exciting about the way we can learn about them in this text. Dr. Beiker's curriculum vitae, from BMW to Stanford University to McKinsey, are a compendium of experiences that created this unique historical and biographical book." "Sven and I are kindred spirits in the mobility world. His view on the evolution of mobility and technology illustrates why Detroit and Silicon Valley need one another." Carla Bailo, Former President and CEO, Center for Automotive Research

John Masefield's dirty British coaster with a salt-caked smoke stack, butting through the Channel in the mad March days has become a ship type of universal appeal, both for its simple, functional beauty and its faithful toil before the advent of universal road haulage. In this new book a collection of more than 300 photographs has been drawn together to tell the story of the development of the steam and diesel coasters, which originated mainly in the UK and the Netherlands. The term coaster embraces a huge range of types including the steam colliers, the puffers, packets, steam flats and lighters mainly designed for inland seas, then the ubiquitous steam coaster itself, built in large numbers for use around British shores but also further afield in every corner of the world. Coastal tankers and other specialist types like chemical and cement carriers also evolved. As well as the details of the ships themselves, the book covers cargo handling and stowing, machinery, the coastal trades, the owners and builders and, not least, the crews and their jobs and their lives at sea. A hugely evocative and illuminating book to delight and inform ship enthusiasts everywhere.

The car - once everybody's dream and a key status symbol in most countries and cultures - has been extensively questioned in the last decades and in the last few years particularly. Urbanisation, traffic congestion, pollution problems, heavy reliance on scarce oil supplies, safety issues and ever-growing competition, have all provided significant business challenges for the automotive industry. Many car manufacturers have had to fundamentally rethink their design, brand and marketing strategies to thrive in a savvy, consumer-led culture, and markets that are becoming increasingly restrictive in size and opportunity. Auto Brand provides a roadmap to branding and marketing success in the automotive industry from a leading industry expert and features:

- Case studies on major car brands personally conducted by the author including: Audi, BMW, Holden, Mercedes-Benz, Opel, Porsche, Saab, Seat, Skoda, Vauxhall, Volkswagen, and Volvo
- The findings from 100 interviews conducted with CEOs, marketing managers, sales managers, sales people, after sales managers at all levels from the manufacturer level to small rural dealers, as well as industry experts, policy makers, free-standing repair shops and professional organizations
- The results of a new international study on car buyer behaviour based on 4,700 survey answers

Auto Brand is essential reading for marketing managers, sales managers, CEOs, development managers and dealers in all types of companies in the car industry including: manufacturers, national sales companies/importers, dealers, finance companies, insurance companies, free-standing repair shop channels and more. The first book to specifically address how to deal with the challenges facing the automotive industry it illustrates how companies can take advantage of new technologies, adapt to emerging trends in consumer behaviour, improve profitability and build even more successful brands in the future.

Automotive Quality Systems Handbook Cornell University Press

ISO/TS 16949:2002 (TS2) will have a huge impact on the whole of the automobile industry as it formalises, under a single world-wide standard, the quality system that must be met by vehicle manufacturers and their suppliers. This handbook is the only comprehensive guide to understanding and satisfying the requirements of ISO/TS 16949:2002. Written by best-selling quality author David Hoyle (ISO 9000 Quality Systems Handbook) this new book is ideal for those new to the standard or establishing a single management system for the first time, as well as those migrating from existing quality management systems. It will suit quality system managers and quality professionals across the automotive industry, managers and executive level readers, consultants, auditors, trainers and students of management and quality. The only complete ISO/TS 16949:2002 (TS2) reference: essential for understanding both TS2 and ISO 9001:2000 TS2 becomes mandatory for all auto manufacturers and their many thousands of suppliers in 2006 Includes details of the certification scheme, the differences with previous standards, check lists, questionnaires, tips for implementers, flow charts and a glossary of terms David Hoyle is one of the world's leading quality management authors

Dynamic technological developments in industrial production, the rise of new social movements in national politics, and great changes in the international political economy have left a deep imprint on the Federal Republic. A compelling explanation of West Germany's success in maintaining economic prosperity and political stability under such challenging conditions has continued to elude observers. Under the editorship of Peter J. Katzenstein, thirteen distinguished scholars from both sides of the Atlantic here provide an original interpretation of the political economy of the Bonn Republic during the forty years since its founding, and explore in particular its extraordinary capacity for accommodating change. Whereas studies in political economy have typically focused on one level of political action—either the shop floor, or national politics, or the international system—this innovative account analyzes the interaction of change at all three levels, bringing together case studies drawn from six manufacturing and service sectors.

Bloomberg Markets SAE International

Using state-of-the-art empirical techniques, contributors address the policy challenges raised by globalization, the internet and other technological advances, innovation, and the rise of security measures in response to the 9/11 terrorist attacks. Chapters are organized around five themes: recent developments and policy challenges, Canadian

firms in the information age, research and development and innovation, regulation and industrial performance, and securing trade and investment opportunities. The only substantive research volume on this subject in two decades, *Industrial Organization in Canada* is a welcome resource for policy makers, researchers, and academics concerned with industrial policy issues in contemporary Canada. Contributors include Ajay Agrawal (University of Toronto), Doug Allen (Simon Fraser University), Werner Antweiler (University of British Columbia), John Baldwin (Statistics Canada), Zhiqi Chen (Carleton University), Jean-Étienne de Bettignies (Queen's University), Marc Duhamel (Industry Canada), James Gaisford (University of Calgary), Avi Goldfarb (University of Toronto), Wulong Gu (Statistics Canada), Kathryn Harrison (University of British Columbia), Patrick Joly (Industry Canada), William Kerr (University of Saskatchewan), Kevin Koch (PricewaterhouseCoopers), Donald G. McFetridge (Carleton University), Peter W. B. Phillips (University of Saskatchewan), Mohammed Rafiquzzaman (Industry Canada), Someshwar Rao (Institute for Research on Public Policy), Thomas W. Ross (University of British Columbia), Camille Ryan (University of Saskatchewan), Michel Sabbagh (Industry Canada), Guofu Tan (University of Southern California), Henry Thille (Guelph University), Johannes Van Biesebroeck (K.U. Leuven, Belgium), and Lasheng Yuan (University of Calgary).
