This book delves into the major developments triggered by the hydrocarbon discoveries in the Eastern Mediterranean over the last twenty years, focusing on maritime boundary delimitation. Examining the impact that the hydrocarbon discoveries have had on the application of the law of the sea rules by the East Med states, the book looks at the

new trends concerning the implementation of the law of the sea in the region. The book analyses regional state practice in terms of maritime delimitation, namely the conclusion of bilateral agreements based on the law of the sea rules, both conventional and customary, reflecting the East Med states' willingness to cooperate in order to reap the benefits of the energy windfall. Alongside this analysis, an outline of the hydrocarbon discoveries and the pertinent maritime activities is given, as well as further coverage of the overlapping maritime claims and disputes between Greece, Cyprus and Turkey on one side, and Lebanon and Israel on the other. Moreover, the book examines the validity of maritime claims made by or through non-state entities in the region, namely the State of Palestine, the UK Sovereign

Base Areas and the so-called ' Turkish Republic of Northern Cyprus ' and their potential impact on the delimitation agreements already in place. The book argues that the East Med paradigm concerning the successful application of the pertinent norms in maritime delimitation proves that international law is resilient and capable of providing solutions in other turbulent regions around the globe. This book will be of interest and importance to academics and students of international law, professionals in the oil and shipping industries, legal professionals and government agencies.

The European

Conference on Residual Stresses (ECRS) series is the leading European forum for scientific exchange on internal and residual stresses in materials. It addresses both academic and industrial experts and covers a broad gamut of stress-related topics from instrumentation via experimental and modelling methodology up to stress problems in specific processes such

as welding or shot-peening, and their impact on materials properties. Chapters: Diffraction Methods; Mechanical Relaxation Methods; Acoustic and Electromagnetic Methods; Composites, Nano and Microstructures; Films, Coatings and Oxides; Cold Working and Machining; Heat Treatments and Phase Transformations; Welding, Fatigue and Fracture: Stresses in Additive Manufacturing. **Advanced Steels**

Rufus of Ephesus' treatise On Melancholy represents perhaps the most influential medical monograph from the late first century AD, since his notion of melancholy links two diverse aspects: black bile as a cause for madness and depression and as a sign of intellectual genius. Rufus combines concepts of melancholy developed in the Aristotelian philosophy with concepts of famous physicians such as Hippocrates and Diocles. His ideas strongly influenced subsequent generations of physicians, and especially Galen, and dominated discourses on the

---

topic during the Middle Ages and the Renaissance. Moreover, the reception of Rufus' concepts was not limited to the Western world; in medieval Muslim culture, in particular, his work enjoyed great fame and favor, and many intellectuals read it eagerly. In this volume, the Greek, Latin and Arabic fragments of this work, lost in the original, have been collected for the first time. Arabic sources in particular yield hitherto unknown fragments, thus allowing for new interpretations of this work. The English introduction, translation and commentary reconstruct the main arguments of this important treatise, enabling the interested scholar to obtain easy access to it. Leading scholars contributed

interpretative essays which investigate Rufus and his ideas about melancholy in antiquity, the Middle Ages, the Renaissance and the early modern period from different vantage points, including history, philosophy, literature, art history and psychiatry. Saab Service Manual Springer  
The Saab Official Service Manual: 900 16 Valve: 1985-1993 contains in-depth maintenance, service and repair information for Saab 900 16 valve models from 1985 to 1993. This manual also includes coverage of the 1994 900 convertible model. The aim throughout has been simplicity and clarity, with practical explanations, step-by-step procedures and accurate specifications. Whether you're a professional

technician or a do-it-yourself Saab owner, this Saab repair manual will help you understand, care for, and repair your Saab. Saab 16-valve models covered: Saab Turbo, including Saab Turbo SPG 1985-1993 Saab Convertible 1987-1993 Saab 900S 1986-1993 Saab 900 1989-1993 Though the do-it-yourself Saab owner will find this manual indispensable as a source of detailed maintenance and repair information, the Saab owner who has no intention of working on his or her car will find that owning and reading this manual will make it possible to discuss Saab service information repairs more intelligently with a professional technician.
