analyses regional state practice in terms of maritime delimitation, namely the conclusion of bilateral agreements based on the law of the sea rules, both conventional and customary, reflecting the East Med states' willingness to cooperate in order to reap the benefits of the energy windfall. Alongside this analysis, an outline of the hydrocarbon discoveries and the pertinent maritime activities is given, as well as further coverage of the overlapping maritime claims and disputes between Greece, Cyprus and Turkey on one side, and Lebanon and Israel on the other. Moreover, the book examines

the validity of maritime claims made by or through non-state entities in the region, namely the State of Palestine, the UK Sovereign Base Areas and the so-called ' Turkish Republic of Northern Cyprus ' and their potential impact on the delimitation agreements already in place. The book argues that the East Med paradigm concerning the successful application of the pertinent norms in maritime delimitation proves that international law is resilient and capable of providing solutions in other turbulent regions around the globe. This book will be of interest and

importance to academics and students of international law, professionals in the oil and shipping industries, legal professionals and government agencies.

A myth-shattering view of the Islamic world's myriad scientific innovations and the role they played in sparking the

European Renaissance. Many of the innovations that we think of as hallmarks of Western science had their roots in the Arab world of the middle ages, a period when much of Western Christendom lay in intellectual darkness. Jim al-Khalili, a leading British-Iraqi physicist, resurrects this lost chapter of

---

history, and given current East-West tensions, his book could not be timelier. With transporting detail, al-Khalili places readers in the hothouses of the Arabic Enlightenment, shows how they led to Europe's cultural awakening, and poses the question: Why did the Islamic world enter its own dark

age after such a dazzling flowering? Flying Magazine Routledge When a new, chatty, young couple and their two daughters move in next door, Ove's well-ordered, solitary world turns upside down.

AN INDEPENDENT BEST BOOKS ON RELIGION 2014 PICK Few things provoke controversy in the modern world like the religion brought by Prophet Muhammad. Modern media are replete with alarm over jihad, underage marriage and the threat of amputation or stoning under Shariah law. Sometimes rumor, sometimes based on fact and often misunderstood, the tenets of Islamic law and dogma were not set in the religion's founding moments. They were developed, like in other world religions, over centuries by the clerical class of Muslim scholars. Misquoting Muhammad takes the reader back in time through

---

Islamic civilization and traces how and why such controversies developed, offering an inside view into how key and controversial aspects of Islam took shape. From the protests of the Arab Spring to Istanbul at the fall of the Ottoman Empire, and from the ochre red walls of Delhi's great mosques to the trade routes of the Indian Ocean world, Misquoting Muhammad lays out how Muslim intellectuals have sought to balance reason and revelation, weigh science and religion, and negotiate the eternal truths of scripture amid shifting values.
