How the Ottomans
refashioned and legitimated
their rule through mystical
imageries of authority The
medieval theory of the
caliphate, epitomized by the
Abbasids (750 – 1258), was the
construct of jurists who

conceived it as a contractual leadership of the Muslim community in succession to the Prophet Muhammed ' s political authority. In this book, Hüseyin Yılmaz traces how a new conception of the caliphate emerged under the Ottomans, who redefined the caliph as at once a ruler, a spiritual guide, and a lawmaker corresponding to the prophet ' s three natures. Challenging conventional narratives that portray the Ottoman caliphate as a fading relic of medieval Islamic law, Yılmaz offers a novel interpretation of authority, sovereignty, and imperial ideology by examining how Ottoman political discourse led to the mystification of Muslim political ideals and redefined the caliphate. He illuminates how Ottoman Sufis reimagined the caliphate as a manifestation and extension of cosmic divine governance. The Ottoman Empire arose in Western

Anatolia and the Balkans, where charismatic Sufi leaders were perceived to be God ' s deputies on earth. Yılmaz traces how Ottoman rulers, in alliance with an increasingly powerful Sufi establishment, continuously refashioned and legitimated their rule through mystical imageries of authority, and how the caliphate itself reemerged as a moral paradigm that shaped early modern Muslim empires. A masterful work of scholarship, **Caliphate Redefined** is the first comprehensive study of premodern Ottoman political thought to offer an extensive analysis of a wealth of previously unstudied texts in Arabic, Persian, and Ottoman Turkish.

BESTSELLER “ An elegant synthesis done by the leading scholar in the field, which nicely integrates the work on the American Revolution over the last three decades but never loses contact with the older, classic questions that we have been arguing about for over two hundred years. ” —Joseph J.

Ellis, author of Founding Brothers A magnificent account of the revolution in arms and consciousness that gave birth to the American republic. When Abraham Lincoln sought to define the significance of the United States, he naturally looked back to the American Revolution. He knew that the Revolution not only had legally created the United States, but also had produced all of the great hopes and values of the American people. Our noblest ideals and aspirations-our commitments to freedom, constitutionalism, the well-

being of ordinary people, and equality-came out of the Revolutionary era. Lincoln saw as well that the Revolution had convinced Americans that they were a special people with a special destiny to lead the world toward liberty. The Revolution, in short, gave birth to whatever sense of nationhood and national purpose Americans have had. No doubt the story is a dramatic one: Thirteen insignificant colonies three thousand miles from the centers of Western civilization fought off British rule to become, in fewer than three decades, a huge, sprawling, rambunctious republic of nearly four million citizens. But the history of the American Revolution, like the history of the nation as a whole, ought not to be viewed simply as a story of right and wrong from which moral lessons are to be drawn. It is a complicated and at times ironic story that needs to be explained and understood, not blindly celebrated or

condemned. How did this great revolution come about? What was its character? What were its consequences? These are the questions this short history seeks to answer. That it succeeds in such a profound and enthralling way is a tribute to Gordon Wood ' s mastery of his subject, and of the historian ' s craft. The Bosnia List Bloomsbury Publishing
The Fall of a Great American City is the story of what is happening today in New York City and in many other cities across America. It is about how the crisis of affluence is now driving out everything we love most about cities: small shops, decent restaurants, public space, street life, affordable apartments, responsive government, beauty, idiosyncrasy, each other. This is the story of how we came to lose so much—how the places we love most were turned over to land bankers, billionaires, the worst people in the world, and criminal landlords—and how we can - and must - begin to take them back. Co-published with Harper's

Magazine, where an earlier version of this essay was originally published in 2018. As New York City approaches the third decade of the twenty-first century, it is in imminent danger of becoming something it has never been before: unremarkable. By unremarkable I don't just mean periodic, slump-in-the-art-world, all-the-bands-suck, cinema-is-dead boring. I mean flatlining. No longer a significant cultural entity but a blank white screen of mere existence. I mean The-World's-Largest-Gated-Community-with-a-few-cupcake-shops. For the first-time in our history, creative-youngpeople-will-no-longer-want-to-come-here boring. Even, New-York-is-over boring. Or worse, New York is like everywhere else. Unremarkable. This is not some new phenomenon, but a cancer that's been metastasizing on the city for decades now. Even worse, it's not something that anyone wants, except the landlords, and not even all of them. What's happening to New York now—what's already happened to most of Manhattan, its core, and what is happening in every

American city of means, Boston, Washington, San Francisco, Seattle, you name it—is something that almost nobody wants, but everybody gets. As such, the current urban crisis exemplifies our wider crisis: an America where we believe that we no longer have any ability to control the systems we live under.

If twenty-first-century urbanization is understood as a problem, its regional epicenter is the cities in Asia. Facing unprecedented diversity in scale, scope, and environmental dynamics in the Asian urban experience, scholars will need an approach that can truly capture the significance of place and context. The challenge, as this volume illustrates, can be met by the analytic of ecologies of urbanism. Eschewing a rigid, single ecology, the

contributors identify multiple forms of nature—in biophysical, cultural, and political terms—that have discernable impact on power relations and human social action. The case studies in this book—including leopards in Mumbai, a network of tubewells in northern India, an island that grows through reclamation in Hong Kong, and a railway continuum linking Khon Kaen and Bangkok—all attest to the versatility of ecologies of urbanism. Guided by urban processes rather than geopolitical boundaries, *Places of Nature in Ecologies of Urbanism* offers a picture of urban Asia that is composed of varied ecologies of urbanism. “ This intellectually adventurous work displays a deep cultural-ethical sensibility in its close attention to geographically variegated forms of place making. A first-rate contribution to urban scholarship on Asia and beyond. ” —Vinay K. Gidwani, Department of Geography, Environment and Society and Institute for Global Studies, University of Minnesota “ This volume derives from a several-year collaborative effort to bring scholars from different disciplines together to reflect on the constructed, shifting, and contested meanings of the forward-slash separating Urban/Natures. The essays in this volume are bold, rigorous, original, and sometimes even witty. Without losing track of the intellectual genealogies that enable their collective effort, the authors in *Places of Nature in Ecologies of Urbanism* give us new tools for imagining urban Asia ’ s

possible futures. ” —William Glover, Department of History, University of Michigan

So we need to learn about their ways as well." --Amy Laundrie, former Lake Delton Elementary School fourth grade teacher An essential title for the upper elementary classroom, "Native People of Wisconsin" fills the need for accurate and authentic teaching materials about Wisconsin's Indian Nations. Duck for President Farrar, Straus and Giroux

How do contemporary generations come to terms with losses inflicted by imperialism, colonialism, and war that took place decades ago? How do descendants of perpetrators and victims establish new relations in today ' s globalized economy? *With Inheritance of Loss*, Yukiko Koga approaches these questions

through the unique lens of inheritance, focusing on Northeast China, the former site of the Japanese puppet state Manchukuo, where municipal governments now court Japanese as investors and tourists. As China transitions to a market-oriented society, this region is restoring long-neglected colonial-era structures to boost tourism and inviting former colonial industries to create special economic zones, all while inadvertently unearthing chemical weapons abandoned by the Imperial Japanese Army at the end of World War II. *Inheritance of Loss* chronicles these sites of colonial inheritance — — tourist destinations, corporate zones, and mustard gas exposure sites — — to illustrate attempts by ordinary Chinese and Japanese to reckon with their

shared yet contested pasts. In her explorations of everyday life, Koga directs us to see how the violence and injustice that occurred after the demise of the Japanese Empire compound the losses that later generations must account for, and inevitably inherit.

The American Yawp Houghton Mifflin Harcourt
A wedding. A trip to Spain. The most infuriating man. And three days of pretending. Or in other words, a plan that will never work. Catalina Martín, finally, not single. Her family is happy to announce that she will bring her American boyfriend to her sister's wedding. Everyone is invited to come and witness the most magical event of the year. That would certainly be tomorrow's headline in the local newspaper of the small Spanish town I came from. Or the epitaph on my tombstone, seeing the turn my life had taken in the span of a phone call. Four weeks wasn't a lot of time to find someone willing to cross the Atlantic-from NYC and all the way to Spain-for a wedding. Let alone, someone eager to play along with my charade. But that didn't mean I was desperate enough to bring the 6'4 blue eyed pain in my ass standing

before me, Aaron Blackford. The man whose main occupation was making my blood boil had just offered himself to be my date. Right after inserting his nose in my business, calling me delusional, and calling himself my best option. See? Outrageous. Aggravating. Blood boiling. And much to my total despair, also right. Which left me with a surly and extra large dilemma in my hands. Was it worth the suffering to bring my colleague and bane of my existence as my fake boyfriend to my sister's wedding? Or was I better off coming clean and facing the consequences of my panic induced lie? Like my abuela would say, *que dios nos pille confesados*. The Spanish Love Deception is an enemies-to-lovers, fake-dating. [Get Through MRC Psych Paper A2](#) Hong Kong University Press This collection offers a global perspective on the changing character of cities and the increasing importance that

consumer culture plays in defining their symbolic economies. Increasingly, forms of spectacle have come to shape how cities are imagined and to influence their character and the practices through which we know them - from advertising and the selling of real estate, to youth cultural consumption practices and forms of entrepreneurship, to the regeneration of urban areas under the guise of the heritage industry and the development of a WiFi landscape. Using examples of cities such as New York, Sydney, Atlantic City, Barcelona, Rio de Janeiro, Douala, Liverpool, San Juan, Berlin and Harbin this book illustrates how image and practice have become entangled in the performance of the symbolic economy. It also argues that it is not just how the urban present is being shaped in this way that is significant to the development of cities but also that a prominent feature of their

development has been the spectacular imagining of the past as heritage and through regeneration. Yet the ghosts that this conjures up in practice offer us a possible form of political unsettlement and alternative ways of viewing cities that is only just beginning to be explored. Through this important collection by some of the leading analysts of consumption, cities and space *Consuming the Entrepreneurial City* offers a cutting edge analysis of the ways in which cities are developing and the implications this has for their future. It is essential reading for students of Urban Studies, Geography, Sociology, Cultural Studies, Heritage Studies and Anthropology.

Indigenous and decolonizing perspectives on education have long persisted alongside colonial models of education, yet too often have been

subsumed within the fields of multiculturalism, critical race theory, and progressive education. Timely and compelling, *Indigenous and Decolonizing Studies in Education* features research, theory, and dynamic foundational readings for educators and educational researchers who are looking for possibilities beyond the limits of liberal democratic schooling. Featuring original chapters by authors at the forefront of theorizing, practice, research, and activism, this volume helps define and imagine the exciting interstices between Indigenous and decolonizing studies and education. Each chapter forwards Indigenous principles - such as Land as literacy and water as life - that are grounded in place-specific efforts of creating Indigenous universities and schools, community organizing and social movements, trans and Two Spirit practices, refusals of state

policies, and land-based and water-based pedagogies.

Death hovers around Ellie Morgan like the friend she never wanted.

The snow-swept town of Ossipee, New Hampshire, is the perfect place for Ellie to detach herself from a world where she doesn't belong. She certainly doesn't belong at a black tie party at a mansion in the woods, but that's where she is, and where he is:

Nicholas French. The man who mystifies her with a feeling of home she's been missing, and impossible knowledge of her troubled soul. Nicholas is one of the Shinigami-a heroic order of vampires that "save" their fated victims from other tragic ends.

And while he followed an abomination of his kind to New Hampshire, he finds that fate drove him there for another reason. Nicholas knows why Ellie is human repellent...and why physical agony grips them when apart. But as Ellie's quest for belonging finally nears an end, she's forced her to choose between two unfeasible sacrifices: love and the destiny she's longed for, or the sole companion who tethers her to the only world she knows.

Capricorn (Cap) Anderson has never watched television. He's never tasted a pizza. Never heard of a wedge.

Since he was little, his only experience has been living on a farm commune and being home-schooled by his hippie grandmother, Rain. But when Rain falls out of a tree while picking plums and has to stay in the hospital, Cap is forced to move in with a guidance counselor and her cranky teen daughter and attend the local middle school. While Cap knows a lot about tie-dying and Zen Buddhism, no education could prepare him for the politics of public school. Right from the beginning, Cap's weirdness makes him a moving target at Claverage Middle School (dubbed C-Average by the students). He has long, ungroomed hair; wears hemp clothes; and practises tai chi on the lawn. Once Zack Powers, big man on campus, spots Cap, he can't wait to introduce him to the age-old

tradition at C-Average: the
biggest nerd is nominated for
