This book constitutes the refereed proceedings of the 17th International Conference on Mobile Web and Intelligent Information

March, 26 2025

Systems, MobiWIS 2021, held as a virtual event, in August 2021. The 15 full papers presented in this book were carefully reviewed and selected from 40 submissions. The papers of MobiWIS 2021 deal focus on topics such as security and privacy; web and mobile applications; networking and communication; intelligent information systems; and IoT and ubiquitous computing.

Mobile Web and Intelligent Information Systems

John Benjamins
Publishing

This book on data mining explores a broad set of ideas and presents some of the state-of-the-art research in this field. The book is triggered by pervasive applications that retrieve knowledge from real-world big data. Data mining finds applications in the entire spectrum of science and technology including basic

sciences to life sciences and medicine, to social, economic, and cognitive sciences, to engineering and computers. The chapters discuss various applications and research frontiers in data mining with algorithms and implementation details for use in real-world. This can be through

characterization, classification, discrimination, anomaly detection, association, clustering, trend or evolution prediction, etc. The intended audience of this book will mainly consist of researchers, research students, practitioners, data analysts, and business professionals who

seek information on the various data mining techniques and their applications. 2006 Public Human Services Directory McGraw Hill Professional As the first of the nation's 78 million baby boomers begin reaching age 65 in 2011, they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs. Retooling for an Aging America calls for bold

initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers, who currently receive little or no training in how to tend to their aging loved ones. The book also recommends that Medicare, Medicaid, and other health plans pay higher rates to boost recruitment and retention of geriatric specialists and care aides. Educators and

health professional groups can use *Retooling for an Aging America* to institute or increase formal education and training in geriatrics. Consumer groups can use the book to advocate for improving the care for older adults. Health care professional and occupational groups can use it to improve the quality of health care jobs. [The AI Cure](#) National Academies Press

The Revolution of Modern Medicine Begins Here The world of medicine is changing faster than ever before, and it's all thanks to

the unprecedented advancements brought by artificial intelligence. Are you ready to explore the future of healthcare? "The AI Cure: How Artificial Intelligence is Revolutionizing Medicine" takes you on an eye-opening journey into the heart of this technological transformation. With every chapter, you'll witness the incredible evolution of AI, showcasing how it's enhancing diagnostic precision, revolutionizing treatments, and even taking surgical accuracy to new heights. From personalized medicine that promises bespoke treatment plans to the rapid discoveries in drug development, this book will captivate you with real-world success stories. Imagine AI-driven forces shaping the future

of patient care, chronic disease management, and even mental health treatment. You'll be enthralled by the stories of compassionate machines bridging empathy gaps, and inspired by the promise of AI in genomics unraveling the secrets of our DNA. But this book doesn't shy away from the hard questions either. Delve into the ethical considerations, privacy concerns, and biases that accompany AI's rise in healthcare. Explore how these challenges are being navigated today, ensuring that this revolution works for everyone, everywhere. What does the future hold for AI in medicine? With visionary projects on the horizon and the integration of AI into everyday practices, this is

your chance to stay ahead in understanding a world where AI and healthcare merge seamlessly. Dive deep into public perceptions and discover the innovations shaping elderly and pediatric care. This is more than just a book; it's a roadmap for anyone eager to see how AI is redefining our approach to health and well-being. Your journey into the future of medicine starts here.

Resources in Education Therese Johnson

In the United States, health care devices, technologies, and practices are rapidly moving into the home. The factors driving this migration include the costs of health care, the growing numbers of older adults, the increasing

prevalence of chronic conditions and diseases and improved survival rates for people with those conditions and diseases, and a wide range of technological innovations. The health care that results varies considerably in its safety, effectiveness, and efficiency, as well as in its quality and cost. Health Care Comes Home reviews the state of current knowledge and practice about many aspects of health care in residential settings and explores the short- and long-term effects of emerging trends and technologies. By evaluating existing systems, the book identifies design problems and imbalances between technological system demands and the capabilities of users. Health

Care Comes Home recommends critical steps to improve health care in the home. The book's recommendations cover the regulation of health care technologies, proper training and preparation for people who provide in-home care, and how existing housing can be modified and new accessible housing can be better designed for residential health care. The book also identifies knowledge gaps in the field and how these can be addressed through research and development initiatives. Health Care Comes Home lays the foundation for the integration of human health factors with the design and implementation of home health care devices,

technologies, and practices. The book describes ways in which the Agency for Healthcare Research and Quality (AHRQ), the U.S. Food and Drug Administration (FDA), and federal housing agencies can collaborate to improve the quality of health care at home. It is also a valuable resource for residential health care providers and caregivers.

Families Caring for an Aging America SAGE Publications Limited

"It has been 17 years since the first edition of *Navigating Human Service Organizations* (Navigating) was published-and about twenty years since the Margaret Gibelman began working on a unique and

engaging textbook that has been used in many dozens of classrooms. I did not participate in the initial writing of the book, I joined the project later. Yet shortly after it was released, I reviewed it for possible adoption for a practice class, so can semi-dispassionately reflect upon the initial notes I made about the latest book of the director of the doctoral program from which I graduated"--

Social Isolation and Loneliness in Older Adults
Department of Health and Human Services

According to the US Census Bureau, the US population aged 65+ years is expected

to nearly double over the next 30 years, from 43.1 million in 2012 to an estimated 83.7 million in 2050. These demographic advances, however extraordinary, have left our health systems behind as they struggle to reliably provide evidence-based practice to every older adult at every care interaction. Age-Friendly Health Systems is an initiative of The John A. Hartford Foundation and the Institute for Healthcare Improvement (IHI), in partnership with the

American Hospital Association (AHA) and the Catholic Health Association of the United States (CHA), designed Age-Friendly Health Systems to meet this challenge head on. Age-Friendly Health Systems aim to: Follow an essential set of evidence-based practices; Cause no harm; and Align with What Matters to the older adult and their family caregivers.

Patient Safety Initiative
2000 IGI Global

Family caregiving affects millions of Americans every

day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population.

Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called “the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit “reply all” • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager “A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work.”—Booklist (starred review) “The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience.”—Library Journal (starred review) “I am a huge

fan of Alison Green’s Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* “Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way.”—Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together*

The Older American AHFE Conference
This book constitutes the refereed proceedings of the 16th International Conference on Mobile Web and Intelligent Information Systems, *MobiWIS 2019*, held in Istanbul, Turkey, in August 2019. The 23 full papers presented together with 3 short papers were carefully reviewed and selected from 74 submissions. The papers of the *MobiWIS 2019* deal with areas such as: mobile apps and services; web and

mobile applications; security and privacy; wireless networks and cloud computing; intelligent mobile applications; and mobile web and practical applications.
Elder Rage National Academies Press
Written by nationally-known elder law practitioner Robert Fleming, *The Elder Law Answer Book* gathers the most current legal, regulatory, and practice guidelines from the core topics of elder law; long-term care, estate planning, retirement planning,

healthcare decision making, and rights of the elderly--and presents this information in a thoroughly integrated, easy-access reference. Chapter highlights include: Estate planning And The elderly Key relationships between retirement planning and estate planning Commonly used approaches to ease tax burdens and preserve their wealth Medicaid and long-term care planning Special trusts useful To The elderly Guardianship and conservatorship Probate and trust administration Practice

management Retirement planning, including both qualified and non-qualified plans IRA's And The new distribution rules and much more!

The Sage Handbook of Nursing Education National Academies Press

Bringing together a multidisciplinary group of experts from the fields of labour studies, public health, ergonomics, epidemiology, sociology and law, *Sick and Tired* examines the inequalities in workplace health and safety. Using an anti-oppressive framework, chapters

interrogate a wide range of issues, including links between precarious employment and mental health, the inverse relationship between power and occupational health through the experiences of women, immigrants and older workers, and the need for creative strategies that promote health and safety in ways that support empowerment and equity.

The authors of this book set out a system of safety strategies and interventions for managing patient safety on a day-to-day basis and improving safety over the long term. These strategies are applicable at all levels of the healthcare system from the frontline to the regulation and governance of the system. There have been many advances in patient

safety, but we now need a new and broader vision that encompasses care throughout the patient's journey. The authors argue that we need to see safety through the patient's eyes, to consider how safety is managed in different contexts and to develop a wider strategic and practical vision in which patient safety is recast as the management of risk over time. Most safety improvement strategies aim to improve reliability and move closer toward optimal care. However, healthcare

will always be under pressure and we also require ways of managing safety when conditions are difficult. We need to make more use of strategies concerned with detecting, controlling, managing and responding to risk. Strategies for managing safety in highly standardised and controlled environments are necessarily different from those in which clinicians constantly have to adapt and respond to changing circumstances. This work is supported by the Health Foundation. The Health

Foundation is an independent charity committed to bringing about better health and health care for people in the UK. The charity's aim is a healthier population in the UK, supported by high quality health care that can be equitably accessed. The Foundation carries out policy analysis and makes grants to front-line teams to try ideas in practice and supports research into what works to make people's lives healthier and improve the health care system, with a particular emphasis on how to make

successful change happen. A key part of the work is to make links between the knowledge of those working to deliver health and health care with research evidence and analysis. The aspiration is to create a virtuous circle, using what works on the ground to inform effective policymaking and vice versa. Good health and health care are vital for a flourishing society. Through sharing what is known, collaboration and building people's skills and knowledge, the Foundation aims to make a

difference and contribute to a healthier population.

Sustainable Health and Long-Term Care Solutions for an Aging Population

Springer Publishing
Company

There were many challenges, successes, and concerns in providing long-term care to older adults during the COVID-19 pandemic.

Looking at central North Carolina, the authors highlight the implications of providing long-term care to older Americans, with an emphasis on the importance

of communication, resilience of staff, and value of human infrastructure. Based on extensive interviews, this collection of essays reflects on the participants' individual experiences and represents the voices of staff and caregivers working in long-term residential care communities, in-home and community-based programs, as well as regional aging service providers and advocates.

Stages of Senior Care: Your Step-by-Step Guide to Making the Best Decisions National

Academies Press
Lasting healthcare for the entire population, specifically the elderly, has become a main priority in society. It is imperative to find ways to boost the longevity of healthcare services for all users. Sustainable Health and Long-Term Care Solutions for an Aging Population is a pivotal reference source featuring the latest scholarly research on issues pertinent to health cost and finding effective ways of financing healthcare for the elderly. Including coverage on a number of topics such as provider accreditation, corporate social responsibility, and data management, this book is ideally designed for policy makers,

academicians, researchers, and advanced-level students seeking current research on the innovative planning and development of healthcare.

In the past several years, a revival of research devoted to nursing education has emerged. This emergence has changed the way many educators engage in their practice of working with learners; and learners have come to expect that they will have a rich learning experience designed to develop new (or enhance prior) knowledge, skills, and attitudes. The SAGE Handbook of Nursing Education provides a detailed map of the current discipline, with a carefully selected team of international contributors offering the latest thinking about

education in nursing across key areas. This handbook will be a key resource for academic educators, as well as graduate and postgraduate learners.
