EBay's own statistics suggest there are 1.3 million people around the world who make their primary or secondary source of income through eBay, with just over 700,000 of those people in the United States. Today, about 29 million people in more than 160 countries use Amazon.com. Last year, an IRS advisory committee recommended that online auction sites be required to file reports of sales transactions with the IRS. The committee also

suggested requiring sellers to obtain taxpayer identification numbers, which would let the government track the transactions. If you are an eBay or Amazon seller, you might be paying more than you have to in taxes because you have not focused on all that you can deduct. You will learn how to take advantage of the legal tax loopholes available and how to choose the proper, legal business structure. If you run your Internet sales business in a businesslike
