Development of the

Leopard 1 can be traced back to November 1956, when the operational requirement for a new battle tank was formulated by the Federal German Armed Forces (Bundeswehr). Originally a Franco-German project, the tank under design was named the 'Standard-Panzer'. The French later dropped out, however, and on 1 October 1963 the 'Standard' tank was officially named 'Leopard', an appropriate choice considering Germany's wartime pedigree with the formidable Tiger and Panther. This book traces the development and service record of the Leopard 1, detailing its control systems, modifications and

variants.

Comet Hale-Bopp defines a milestone event for cometary science: it is the first "really big" comet observed with modern equipment on the ground and from space and due to that; it is considered the new reference object in cometary sciences. At the beginning

---

of a new era in spacecraft exploration of comets and five years after Hale-Bopp's perihelion passage these proceedings of invited and contributed papers for IAU Colloquium 186 "Cometary Science after Hale-Bopp" review the state-of-the-art knowledge on comets, the icy, dusty and most primordial left-overs of the formation disk of our own solar system. This is the first volume with

invited review papers. A second volume with contributed papers is published in ISBN 1-4020-0978-X. **Maths Ages 7-9** Atlantic Books Ltd  
What would you do if you discovered your whole life to be a lie? Daniel Henstock thinks he's an ordinary schoolboy but on his sixteenth birthday his world is turned upside down. He is the world's first one-hundred percent genetically-engineered

human - assigned the codename Tiberius - and Gregory Dryden, the man responsible, wants him back so that he can continue his deadly experiments. Running for his life, Daniel flees to New York and is forced to go 'off-grid'. In this near-future America, where the security-obsessed authorities require citizens to carry DNA cards, Daniel meets the feisty and beautiful Eleanor. But by falling for her,

---

Daniel also puts her in terrible danger. Daniel pursues the facts about his origins but is hunted by an agent sent by Dryden to bring him to heel. Can Daniel find out the truth whilst trying to evade those who think they own him? As his enemies close in Daniel must draw on resources he never knew he had to win his freedom - but in doing so he may be walking into a deadly trap ...

**TIBERIUS FOUND** is the first instalment in a thrilling series -

The Emperor Initiative - that introduces an engaging new hero that will appeal to fans of Alex Rider and Jason Bourne.

George Simling has grown up in the city-state of Illyria, an enclave of logic and reason founded as a refuge from the Reaction, a wave of religious fundamentalism

that swept away the nations of the twenty-first century. Yet to George, Illyria's militant rationalism is as stifling as the faith-based superstition that dominates the world outside its walls. For George has fallen in love with Lucy. A prostitute. A robot. She might be a machine, but the semblance of life is perfect. To the city authorities, robot sentience is a malfunction, curable by erasing and resetting silicon minds. But George knows that Lucy is something more. His only alternative is to flee Illyria, taking Lucy deep into the religious Outlands where she must pass as human because

---

robots are seen as mockeries of God, burned at the stake, dismembered, crucified. Their odyssey leads them through betrayal, war and madness, ending only at the monastery of the Holy Machine...

Our CLEP study guides are different! The Information Systems and Computer Applications CLEP study guide TEACHES you everything that you need to know to pass the CLEP test. This study guide is more than just pages of sample test

questions. Our easy to understand study guide will TEACH you the information. We've condensed what you need to know into a manageable book - one that will leave you completely prepared to tackle the test. This study guide includes sample test questions that will test your knowledge AND teach you new material. Your Information Systems and Computer Applications study guide also includes flashcards. Use these to memorize key concepts and

terms. Anyone can take and pass a CLEP test. What are you waiting for?

Photographic

imagery has

come a long way from the pinhole

cameras of the nineteenth

century. Digital imagery, and its

applications, develops in

tandem with

contemporary society's

sophisticated literacy of this

subtle medium.

This book

examines the ways in which

digital images

have become

ever more

---

ubiquitous as legal and medical evidence, just as they have become our primary source of news and have replaced paper-based financial documentation. Crucially, the contributions also analyze the very profound problems which have arisen alongside the digital image, issues of veracity and progeny that demand systematic and detailed response: It looks real, but is it? What camera captured it? Has it been doctored or subtly altered? Attempting to provide answers to these slippery issues, the book

covers how digital images are created, processed and stored before moving on to set out the latest techniques for forensically examining images, and finally addressing practical issues such as courtroom admissibility. In an environment where even novice users can alter digital media, this authoritative publication will do much so stabilize public trust in these real, yet vastly flexible, images of the world around us. *Memory, Place and History, 1550-1700*

In this 2007 book, Kate Chedgzoy explores the ways in which women writers of the early-modern British Atlantic world imagined, visited, created and haunted textual

sites of memory. Asking how women's writing from all parts of the British Isles and Britain's Atlantic colonies employed the resources of memory to make sense of the changes that were refashioning that world, the book suggests that memory is itself the textual site where the domestic echoes of national crisis can most insistently be heard. Offering readings of the work of poets who contributed to the oral traditions of Wales, Scotland and Ireland, and analysing poetry, fiction and life-writings by well-known and less familiar writers such as Hester Pulter, Lucy Hutchinson

---

and Aphra Behn, this book explores how women's writing of memory gave expression to the everyday, intimate consequences of the major geopolitical changes that took place in the British Atlantic world in the seventeenth century.

learning convenient for students. It saves time and makes learning for students accessible anytime, anywhere. With Connect, instructors can easily manage assignments, grading, progress, and students receive instant feedback from assignments and practice problems. Congress Bulletin Springer Science & Business Media After World War II, a powerful conviction took hold among American intellectuals and policymakers: that the United States

could profoundly accelerate and ultimately direct the development of the decolonizing world, serving as a modernizing force around the globe. By accelerating economic growth, promoting agricultural expansion, and encouraging the rise of enlightened elites, they hoped to link development with security, preventing revolutions and rapidly creating liberal, capitalist states. In *The Right Kind of Revolution*, Michael E. Latham explores the role of modernization and development

in U.S. foreign policy from the early Cold War through the present. The modernization project rarely went as its architects anticipated. Nationalist leaders in postcolonial states such as India, Ghana, and Egypt pursued their own independent visions of development. Attempts to promote technological solutions to development problems also created unintended consequences by increasing inequality, damaging the

---

environment, and supporting coercive social policies. In countries such as Guatemala, South Vietnam, and Iran, U.S. officials and policymakers turned to modernization as a means of counterinsurgency and control, ultimately shoring up dictatorial regimes and exacerbating the very revolutionary dangers they wished to resolve. Those failures contributed to a growing challenge to modernization theory in the late 1960s and 1970s. Since the end of the Cold War the faith in

modernization as a panacea has reemerged. The idea of a global New Deal, however, has been replaced by a neoliberal emphasis on the power of markets to shape developing nations in benevolent ways. U.S. policymakers have continued to insist that history has a clear, universal direction, but events in Iraq and Afghanistan give the lie to modernization's false hopes and appealing promises.

This report develops a

framework that classifies investments according to different types of financial instruments and investment funds, and highlights the techniques that intermediaries can use to mobilise institutionally held capital.

*The Indian Mail*  
Fisher King Press  
This book, by one of the most prominent interpreters of Leo Strauss's thought, was the first to address the problem that Leo Strauss himself said was the theme of his studies: the theologico-political problem or the confrontation with the theological and the political alternative to

---

philosophy as a way of life. In his theologico-political treatise, which comprises four parts and an appendix, Heinrich Meier clarifies the distinction between political theology and political philosophy and reappraises the unifying center of Strauss's philosophical enterprise. The book is the culmination of Meier's work on the theologico-political problem. It will interest anyone who seeks to understand both the problem caused by revelation for philosophy and the challenge posed by political-religious radicalism. The appendix makes available for the first

time two lectures by Strauss that are immediately relevant to the subject of this book and that will open the way for future research and debate on the legacy of Strauss. *58th Annual Report* Cornell University Press  
Thinking Education Through Alain Badiou represents the first collection to explore the educational implications of French philosopher Alain Badiou's challenge to contemporary philosophical orthodoxy put forth in his 1993 work, *Ethics: An Essay on the Understanding of Evil*. Represents the first collection of work in

education to grapple with what Alain Badiou might mean for the enterprise of schooling Takes up Badiou's challenge to contemporary and conventional Anglo-American doxa Includes original essays by experts in several different educational fields
