Mastering Salesforce CRM Administration "O'Reilly Media, Inc."

Master the skills you need as a Salesforce B2C Solution Architect to design an optimized business-to-consumer (B2C) solution across the Salesforce Customer 360 ecosystem, including B2C Commerce, Service Cloud, and Marketing Cloud Key Features Create a unified view of the customer across Salesforce products and beyond Avoid inefficiencies and costly rework caused by poor architectural designs Prepare for the B2C Solution Architect exam and Salesforce certification with practical scenarios following Salesforce best practices Book Description A carefully designed Customer 360 solution spanning B2C Commerce, Marketing Cloud, and Service Cloud provides the foundation for a single view of the customer, unique insights, and transformational capabilities. There is currently a huge demand in the marketplace for professionals who understand how to leverage these components together. Salesforce B2C Solution Architect's Handbook will help you understand the integration options and products that help you deliver value for organizations. You'll start by developing a solid understanding of the capabilities of each component in the Customer 360 ecosystem, their data models, and governance. As you progress, you'll explore the role of a B2C solution architect in planning critical requirements and implementation sequences to avoid costly rework. The book will also guide you through the options for integrating products with the

Salesforce ecosystem and demonstrate best practices for data modeling across Salesforce products and beyond. Once you have the core knowledge required to be a successful solution architect, you'll learn about tools, techniques, and certification scenarios in preparation for the B2C Solution Architect exam. By the end of this book, you'll have the skills to design scalable, secure, and future-proof solutions supporting your customers' critical business demands. What you will learn Explore key Customer 360 products and their integration options Choose the optimum integration architecture to unify data and experiences Architect a single view of the customer to support service, marketing, and commerce Plan for critical requirements, design decisions, and implementation sequences to avoid sub-optimal solutions Integrate Customer 360 solutions into a single-source-of-truth solution such as a master data model Support business needs that require functionality from more than one component by orchestrating data and user flows Who this book is for This book is for B2C commerce architects, application architects, integration architects, and system architects familiar with one or more products within the Customer 360 suite who want to master B2C solutions. Enterprise architects, Salesforce architects, and CTO teams at Salesforce customer organizations looking to benefit from a unified solution will also find this book helpful. A general understanding of data integration, APIs, and connected systems, along with knowledge of the fundamentals of business-to-

consumer (B2C) customer experiences is necessary to get the most out of this book.

Longlisted for the National

Bestseller A former Wall
Street quant sounds an alarm
on the mathematical models
that pervade modern life --
and threaten to rip apart our
social fabric We live in the
age of the algorithm.
Increasingly, the decisions
that affect our lives--where
we go to school, whether we
get a car loan, how much we
pay for health insurance--are
being made not by humans, but
by mathematical models. In
theory, this should lead to

greater fairness: Everyone is
judged according to the same
rules, and bias is eliminated.
But as Cathy O'Neil reveals in
this urgent and necessary
book, the opposite is true.
The models being used today
are opaque, unregulated, and
uncontestable, even when
they're wrong. Most troubling,
they reinforce discrimination:
If a poor student can't get a
loan because a lending model
deems him too risky (by virtue
of his zip code), he's then
cut off from the kind of
education that could pull him
out of poverty, and a vicious

spiral ensues. Models are propping up the lucky and punishing the downtrodden, creating a "toxic cocktail for democracy." Welcome to the dark side of Big Data. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a society. These "weapons of math destruction" score teachers and students, sort resumes, grant (or deny) loans, evaluate workers, target voters, set parole, and monitor our health. O'Neil calls on modelers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change. -- Longlist for National Book Award (Non-Fiction) -- Goodreads, semi-finalist for the 2016 Goodreads Choice Awards (Science and Technology) -- Kirkus, Best Books of 2016 -- New York Times, 100 Notable Books of 2016 (Non-Fiction) --

This book is not intended to be a deep-dive on security, programming, reporting, configuration, etc. but more of a high-level overview on salesforce.com, Force.com development, tools, methodology

and other resources. We will not cover all aspects of salesforce.com. We wrote this book to (hopefully) become an invaluable resource for anyone new or inexperienced with the Force.com platform. For new administrators and developers coming on to the platform, we see a gaping hole in existing reference books. This book is not intended for end users or advanced developers. This book is for people somewhere in the middle; let's say a business analyst or a new Java or .NET developer. We would like this to be the first book you pick up after your boss walks in and says, "Let's take a look at salesforce.com and see if we can build some applications in the cloud." This book contains the

information that we wish we had when we started developing applications on Force.com.
