As an alternative form of medicine, Unani has found favour in India. These Unani practitioners can practice as qualified doctors in India, as the government approve their practice. Unani medicine is very close to Ayurveda. Both are based on theory of the presence of the elements (in Unani, they are considered to be fire, water, earth and air) in the human body. According to followers of Unani medicine, these elements are present in different fluids and their balance leads to health and their imbalance leads to illness. Government have exclusive department of Indian system of medicine inclusive of Unani under Health ministry and several states have department

If you look at a piece of a leaf or a drop of saliva through a microscope, what do you see? Cells are the

basic building blocks of life and they make up every living thing, from plants to animals, from humans to bacteria! In *Cells: Experience the World at Its Tiniest*, readers ages 12 to 15 investigate cells and learn how they affect our health, reproduction, criminal investigations, and agriculture. More than 250 years ago, scientists discovered that all living things are made up of cells. Since then, cell science has been a foundational step on the path to understanding why living things function and develop and how we can use our knowledge of cells to improve human life. Through cell science, scientists have been able to create many things to help society, such as seeds that grow better in certain locations, which increases

---

the amount of crops to better feed the world. The criminal justice system now uses DNA to prove whether people committed crimes or not, helping to ensure that innocent people aren't punished for crimes they didn't commit. Through the study of certain cells, scientists have been able to create immunizations and medicines that have virtually eliminated some diseases, such as smallpox, which once killed almost a third of the people who caught it. This book will also encourage readers to examine the controversy that surrounds the way scientists use some types of cells. To reinforce learning and encourage investigation, hands-on activities include finding and identifying bacteria from pond water and human mouths and

building models of different types of cells. Links to online primary sources, videos, and other relevant websites provide a digital learning component that appeals to this age group and promotes further, independent learning while strengthening practical connections to the material. Additional materials include a glossary and a list of current reference works, websites, and Internet resources.

clear road map for people with drug or alcohol addiction. Announcing a completely revised and updated second edition of *The Recovery Book*, the Bible of addiction recovery. *The Recovery Book* provides a direct and easy-to-follow road map to every step in the recovery process, from the momentous decision to quit to the emotional, physical, and spiritual issues that arise along the way. Its comprehensive and effective advice speaks to people with addiction, their loved ones, and addiction professionals who need a proven, trusted resource and a supportive voice. This new edition features the revolutionary *Recovery Zone System*, which divides a life in recovery into three chronological zones and

provides guidance on exactly what to do in each zone. First is the *Red Zone*, where the reader is encouraged to stop everything, activate their recovery and save their life. Next is the *Yellow Zone*, where the reader can begin to rebuild a life that was torn apart by addiction. Finally, the reader reaches the *Green Zone*, where they can enjoy a life of recovery and help others. And the *Recovery Zone ReCheck* is a simple and effective relapse prevention tool. The *Recovery Zone System* works hand-in-hand with the 12-step philosophy and all other recovery methods. *The Recovery Book* covers new knowledge about addiction mechanisms and neuroplasticity, explaining how alcohol and drugs alter the brain. The authors outline a simple daily

---

practice, called TAMERS, that helps people to use those same processes to “remold their brains” around recovery, eventually making sobriety a routine way of life. Written by Al J. Mooney, M.D., a recovery activist who speaks internationally on recovery, and health journalists Catherine Dold and Howard Eisenberg, *The Recovery Book* covers all the latest in addiction science and recovery methods. In 26 chapters and over 600 pages, *The Recovery Book* tackles issues such as: *Committing to Recovery: Identifying and accepting the problem; deciding to get sober. Treatment Options: Extensive information on current options and how to choose a program. AA and other 12-Step Fellowships: How to get involved in a*

mutual-support group. *Addiction Science and Neuroplasticity: How alcohol and drugs alter pathways in the brain, and how to remold the brain around recovery. Relapse Prevention: The Recovery Zone ReCheck, a simple new technique to anticipate and avoid relapses. Rebuilding Your Life: How to handle relationships, socializing, work, education, and finances. Physical and Mental Health: Tips for getting healthy and handling common ailments. Pain Control: How to deal with pain in recovery and avoid a relapse if you need pain control for medical care. Family and Friends: How to help a loved one with addiction, and how to help yourself. Raising Substance-Free Kids: How to “addiction-proof” your*

A unique exploration of how  
dental health connects to  
holistic health, with a 40-day  
meal plan and long-lasting  
dietary guidelines that are  
easily integrable into everyday  
life Throughout the years,  
dental health has often been  
characterized as a reflection of  
our overall health, where bad

oral health results from issues  
with other parts of our body.  
But what if we flipped the  
paradigm? What if we thought  
about dental health as the  
foundation for our physical  
health as a whole? Dr. Steven  
Lin, an experienced dentist and  
the world's first dental  
nutritionist, has analyzed our  
ancestral traditions,  
epigenetics, gut health, and the  
microbiome in order to  
develop food-based principles  
for a literal top-down holistic  
health approach. Merging  
dental and nutritional science,  
Dr. Lin lays out the dietary  
program that can help ensure  
you won't need dental fillings  
or cholesterol medications  
—and give you the resources to  
raise kids who develop
