easy to make a personal salt water-based mouth rinse. Add ½ a teaspoon of salt to a cup of warm water, as recommended by Adirondack Oral & Maxillofacial Surgery. Rinse your mouth every two to three hours for the first few days after surgery, then use it three to four times a day thereafter.

### Salt Water Mouth

### Rinse: Is It Effective? | New

### Health Advisor

Most salt water rinse recipes call for 8 ounces of warm water and 1 teaspoon of salt. If your mouth is tender and the salt

water rinse is stinging, you can use ½ tsp of salt instead of a full teaspoon for the first day or two. To make the salt water rinse, bring your water to a boil using a stove or microwave.

### *How to Make Saline Solution or Salt*

### *Water Mouth Rinse*

After dental treatment a salt water rinse can speed up recovery and help with infections. Proper salt water rinses can ease pain and get rid of smells. A simple salt water mouth rinse (also known as a saline mouth rinse) can be very beneficial for the mouth and oral

health.
